## Overview

Welcome to Deltek Touch Time & Expense for GovCon 1.2.9 Release Notes. These release notes contain a summary of the following:

- Major New Features
- Enhancements
- Software Issues Resolved
- Database Changes

**Note:** The official name of the application is *Deltek Touch Time & Expense for GovCon*. This document only uses it at first mention. The succeeding instances of the application name display *Touch Time & Expense*.

In addition, the application name in the Google Play Store and the Apple App Store displays *GovCon Time & Expense*.

## Pre-Installation Information

Before you begin the installation of Deltek Touch Time & Expense for GovCon, it is important to understand the information discussed in this section.

### Technical Considerations

The following requirements must be met to run Touch Time & Expense:

- Touch Time & Expense supports mobile devices that run on the following operating systems:
  - Apple iOS 9.0 and higher
  - Android 4.4 and higher
- Touch Time & Expense works with Deltek Time and Expense 9.0.1 and Hot Fix Bundle #8 or higher.
- Touch Time & Expense supports communication with the Time and Expense server via HTTP or HTTPS. Deltek recommends that you use HTTPS protocol in your production deployment. HTTPS encrypts the data in transit.

**Note:** If you are going to access Touch Time & Expense from the Internet, open a port in your firewall to access the Touch Time & Expense virtual directory, which will be installed on the IIS server.

- You must install Touch Time & Expense on an IIS Web server that is installed on Windows 2008, Windows Server 2008 R2, or Windows Server 2012.
- When using Secure Sockets Layer (SSL), you must have a certificate issued by a trusted certificate authority. You must not use self-signed certificates. Wild card certificates are acceptable if they come from a trusted certificate authority.
- Touch Time & Expense supports mobile applications downloaded from the *Apple App Store* and *Google Play Store*. You may be able to use the device native browser to enter your organization's Touch Time & Expense URL. The default URL can be changed to something else by the administrator. The Touch Time & Expense URL has the format <https://<server>/deltektouch/govcon/time>, where <server> refers to the host name of your Touch server.

### Compatibility Mode Definitions

Compatibility Mode	Description
<b>Fully Compatible</b>	You must be in Touch application 1.2.9 and Touch Server 1.2.9. All features and functions in the application are available to you. <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> Deltek strongly suggests that you install the latest version of each component (Touch Time application, Touch server, and API.)</p> </div>
<b>Partially Compatible</b>	At least one of the components (Touch server and/or API) is an older version. Some features of the application are disabled or hidden and not available to you.

<b>Compatibility Mode</b>	<b>Description</b>
<b>Browser Compatible</b>	At least one of the components (Touch server and/or API) is an older version. The current application does not work with the Touch server or API, but you can still use the application through the mobile browser.
<b>Incompatible</b>	There are some combinations of API and Touch server that make it impossible to even use the browser version to run the application.

## New Features

This release includes no new features.

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### PHP Upgrade

PHP version 7.2.1.0, which provides updated security, is now packaged with Touch Server version 1.2.9. To use and install the updated version, you must first uninstall your current Touch server.
