Deltek Costpoint Essentials and Costpoint Foundations Hot Fix Readme

Release Date: July 14, 2019

Print Quarterly State Unemployment Report Based on Pay Period Dates

Prior to this release, the Print Quarterly State Unemployment Report (PRRSTTAX) screen only used check dates as the basis of selecting records from the Employee Earnings table for reporting SUTA wages and employee counts. The application did not include the Employee Earnings record in the employee count if the check date on the record did not fall within the date range and payroll year specified on the screen.

As a result of this limitation, even if the pay period of the Employee Earnings record fell within the specified date range on the screen, the application did not include the record when the check date was outside the specified date range.

To address this issue, the Print Quarterly State Unemployment Report screen provides a new **Use Pay Period Dates to Select Records from Employee Earnings** check box. When you select the new check box, the application will include Employee Earnings records which have pay period dates that fall within the report's date range parameter and it will not use check dates to select records. If you do opt not to select this check box, the application will select records based on check dates.

> **Note:** Costpoint disables the new **Use Pay Period Dates to Select Records from Employee Earnings** check box if you select the **Use Reference Date for X, Y, Z, V, and W Records (Applies to Taxes only)** check box on the Configure Payroll Settings screen.
