2.0 Release Notes

These release notes topics contain a summary of features, enhancements, and software issues resolved made in ComputerEase Field 2.0.

Summary of Changes

New Features

The following is a list of new features for this release:

- ComputerEase Field Browser Interface

Enhancements

The following is a list of enhancements for this release:

- Filtering of GPS Events with Low Accuracy
- Geolocation Information Attached to a Job in a Time Entry Without Using Notifications
- ExpenseEase Inaccessible for Login and Account Creation
- Duplicating Time Entries Displays Edit Time Entry Screen
- Approvals Screen Enhancements

Software Issues Resolved

The following is a list of software issues resolved for this release:

- Application Link in Email Invite Led to Old Inactive Portal
- Missing Decimal on Numeric Keypad for Units Field
- Auto Advance Required Input for Job Field with Configured Value

New Features

This section includes new features in this release.

ComputerEase Field Browser Interface

You can now access ComputerEase Field using your browser at field.computerease.com. When you use ComputerEase Field with a browser, the UI is optimized when viewed on a larger screen. Like the ComputerEase Field application, you can also use ComputerEase Field in your browser to do the following:

- Create, edit, and sign time entries
- Approve summarized by cost code, pay type, and date for each period
- Create, edit, and submit expenses
- Upload receipts with your file browser using **Capture Expense**
- Create, edit, and delete job location geofences
- Configure settings
- Access the online help

Enhancements

This section includes enhancements in this release.

Filtering of GPS Events with Low Accuracy

Location accuracy is now improved to filter out inaccurate readings due to the inconsistent service of a mobile device. This ensures that geofence departures and arrivals are recorded accurately based on precise location data for geofence notifications.

Geolocation Information Attached to a Job in a Time Entry Without Using Notifications

When you create a time entry offsite or at a later time, ComputerEase Field now checks for corresponding geofence entries for the time period or date covered and attaches it to the time entry.

Note: ComputerEase Field never tracks the user and only accesses your device location information to identify the time when your device is in a job geofence.

Payroll Administrators can run a QTool report using ComputerEase to view time entries with attached geolocation information, even if the user did not interact with a notification.

ExpenseEase Inaccessible for Login and Account Creation

You can no longer access ExpenseEase and will need to install ComputerEase Field. This includes the following:

- When you try to login to ExpenseEase, a dialog box is now displayed for your invalid login.
- When you try to access your account management for ExpenseEase, the page will no longer be available.

Duplicating Time Entries Displays Edit Time Entry Screen

When you tap **Duplicate** for a time entry, the Edit Time Entry screen is now displayed. This enables you to quickly change the copied information for the duplicated time entry as needed.

Approvals Screen Enhancements

The following enhancements were made on the Approvals screen:

- The default period displayed is now the earliest period with time entries pending for approval
- The default starting day of the week is now based on the payroll setting configured in ComputerEase

Software Issues Resolved

This section includes software issues resolved in this release.

Application Link in Email Invite Led to Old Inactive Portal

Defect 2095740: When you invited a user to create a ComputerEase Field account, the application link led to the old inactive portal.

Missing Decimal on Numeric Keypad for Units Field

Defect 2108704: When you tapped the **Units** field on the Add Time Entry screen, the decimal on the numeric keypad displayed was missing.

Auto Advance Required Input for Job Field with Configured Value

Defect 2115161: When a value was configured for the **Job** field on the Add Time Entry screen and **Auto Advance New Entries** was enabled, you were still prompted to select an item in the **Job** field instead of moving to the next available field.

About Deltek

Better software means better projects. Deltek delivers software and information solutions that enable superior levels of project intelligence, management, and collaboration. Our industry-focused expertise makes your projects successful and helps you achieve performance that maximizes productivity and revenue.
