*Released: August 14, 2015*

## Enhancements

### Protected Veteran Information in VETS-4212 Reporting

Costpoint now allows you to identify employees who are protected veterans but declined to self-identify which specific veteran categories (Active Duty Wartime or Campaign Badge Veteran, Armed Forces Service Medal Veteran, Disabled Veteran, and Recently Separated Veteran) they may belong. These employees shall be counted under the Protected Veterans column in the VETS-4212 report.

The following are the updates in Costpoint:

- **Manage Employee Information (LDMEINFO)**

The screen now contains **Protected Veteran (Declined to Self-Identify)** check box that allows you to identify employees who belong to specific veteran categories but have refused to identify to which category they belong.

- **View Employee Information (PRQEINFO)**

The screen now contains **Protected Veteran (Declined to Self-Identify)** check box that indicates employees who belong to specific veteran categories but have refused to identify to which category they belong.

- **Import Employee Data (AOPUTLEL)**

The new field, **Protected Veteran (Declined to Self-Identify)**, is now available in Record 4 of both Comma-Separated Values Format (CSV) and Fixed-Length Format input files.

- **Manage Employee Import User-Defined Format (AOMSUEBP)**

The new field, **Protected Veteran (Declined to Self-Identify)**, is now available in Record 4.

- **Print VETS-4212 Report (HARV100)**

The report now includes employees marked as **Protected Veteran (Declined to Self-Identify)** in the count of Protected Veterans.
