CG/CT/CTMSETNG/Configure Contract Management Settings

Deltek Defect Tracking Number:

1009274

Issues Resolved:

Description: When users tried to save records in Manage Contracts using the **Save & Continue** function, a performance issue occurred due to the way that the application retrieves financial information. Several screens have been updated, and a new application has been created to resolve this issue. In Configure Contract Management Settings, changes have been made in the **FY/Period/Subperiod Selection** group box. The **Use latest available report** option has been replaced with the **Use Accounting Period Below** option and three new fields:

- **Fiscal Year** - Enter the fiscal year to be used for viewing project reports for contracts and subcontracts.
- **Period** - Enter the period to be used for viewing project reports for contracts and subcontracts.
- **Subpd** - Enter the subperiod to be used for viewing project reports for contracts and subcontracts.

Select **Use Accounting Period Below** to use the fiscal year/period/subperiod specified on this screen in the reports. The values in these fields are updated by the Update Project Status Report Tables application if the accounting period used in processing is later than what exists in Configure Contract Management Settings, but can be modified. These values are updated whether or not the **Use Accounting Period Below** option is selected. The fiscal year, period, and subperiod indicated on this screen will always be used by the View Contract Financial Information application whether or not the **Use Accounting Period Below** option is selected. In addition, these fields are required whatever selection is made in the **FY/Period/Subperiod Selection** group box.

Customers Impacted: This change affects users of Configure Contract Management Settings in Costpoint.

Workaround Before Fix: None.

Additional Notes: None.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:
