

# Deltek Costpoint HotFix Readme

*Released: March 7, 2017*

## Company Codes in Job Codes for Deltek Talent Management Integration

The Costpoint 7.1.1 Deltek Talent Management Integration now adds company codes to job codes when you run the export process for detail job titles. The export process will transfer a job code/company ID combination to Talent Management in the following format: **<Job Code> + '\_COMPANY\_' + <Costpoint Company ID>**.

This enhancement allows you to perform the following:

- Specify multiple companies that use a specific job code
- Set a default company that will be used when exporting job codes

If you opt not to associate companies to a specific job code, or if you did not specify a default company, exporting detail job titles to Talent Management will create job code/company ID combinations for all existing Configure Labor Settings screen records.

Before applying the patch for this enhancement, please contact Deltek Customer Care to ensure that detail job titles/jobs profiles will not be duplicated in your Deltek Talent Management environment.

---

To support the feature, this release includes the following updates to the corresponding Costpoint screens:

### Configure Labor Settings (LDMLABOR)

A new **Use this company as the default when exporting Job Codes** check box allows you to indicate if the login company ID is the default company when exporting job codes to Talent Management.

If you do not specify companies in the Talent Management Company ID's subtask on the Manage Detail Job Titles screen, when you select the new check box, only the Login company will be used to create job codes when exporting to Talent Management.

### Manage Detail Job Titles (HSMDETL)

A new Talent Management Company ID's subtask allows you to enter the company ID's for companies that use a specific job title code in Talent Management.

If you choose not to add a company ID, and you want to set a default company instead, you can set the Login company as the default on the Configure Labor Settings screen.

### Transfer Talent Management Data (EMPHRSDAT)

The application now adds the company ID's to job codes when exporting Detail Job Titles to Talent Management.

## Patch Requirements

These enhancements require Costpoint 7.1.1 PATCH3158.

## Application JAR Requirements

The following table shows the required application JAR files version for each screen affected by this update:

Domain	Module	Application ID	Application Name	Application JAR
PE	EM	EMPHRSDAT	Transfer Talent Management Data	cp711_emphrsdat_008.zip
PE	HS	HSMDETL	Manage Detail Job Titles	cp711_hsmdetl_001.zip
PE	LD	LDMLABOR	Configure Labor Settings	cp711_ldmlabor_006.zip

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

## To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
