PEOPLE/EMPLOYEE/PRMEBT/Maintain Employee Bank Info

[Deltek Defect Tracking Number:](#)

1042344

[Issues Resolved:](#)

Description: The application only allowed you to select a bank account type of **Savings** when the account type was **HSA**. The application should allow you to select checking accounts for HSA account types as well.

Customers Impacted: This defect affects Costpoint Employee users.

Workaround Before Fix: Use the following steps as a workaround for this issue:

1. Employees should set up their HSA bank information as savings accounts.
2. Run a script to change the **ACH Transaction Code** (S_ACH_TRN_CD) from **Savings** to **Checking** in both the Active Bank Acct and Pending Bank Acct subtasks where the **Account Type** (ACCT_TYPE) is equal to **HSA**. This changes all the HSA accounts from **Savings** to **Checking**.

If you have a mix of savings and checking accounts for the employees, you have to run the script for each employee that wants to change it

to a checking account. Once you run the script, you will not be able to edit those records manually unless you rerun the script since the error will display again until you apply the fix for this issue. Running the scripts will also not update the audit tables.

Additional Notes: None.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:
