

## Deltek Costpoint HotFix Readme

Released: April 18, 2018

### Ability to Establish Limit for Year to Date (YTD) Leave Accrued Hours/Amount

Executive Order 13706 requires a parties that enter into government contracts with the Federal Government to provide covered employees with up to seven days of paid sick leave annually, including paid leave allowing for family care. To comply with the Executive Order, Costpoint now allows you to establish a limit to the hours/amount that an employee may accrue during the leave year.

The following Costpoint screen were updated to support this enhancement:

#### Compute Leave Accruals (LDPCLHF)

The application can now apply period-accrual and year-accrual ceilings based on Leave Type's **Accrual Ceiling Method** (in addition to existing period-balance and year-balance ceiling).

#### Manage Leave Codes (LDMLVTAB)

- The application now allows you to specify a ceiling that will limit the number of hours (or amount for leave types being tracked by amount) an employee may accrue during the leave year. Use the new **Year Accrual Ceiling** field to specify an annual accrual limit.
- The field label changed from "Leave Period Ceiling" to "Period Balance Ceiling."
- The field label changed from "Year Ceiling" to "Year Balance Ceiling."

#### Manage Leave Types (LDMLVTP)

- You can now whether or not a ceiling should be applied to the number of hours (or amount for leave types being tracked by amount) accrued for a given employee during the leave year and/or a given leave period. For this purpose, the screen provides a new **Accrual Ceiling Method** drop-down list with the following options: **Period and Year**, **Year**, and **No Ceiling**.
- The group box label changed from "Leave Balance Ceilings" to "Leave Ceilings."
- The drop-down list label changed from "Ceiling Method" to "Balance Ceiling Method"
- You can now specify whether the Period and/or Anniversary Leave Year ceiling is applied before or after the period's accrual is calculated. For this purpose, the screen provides the following **Ceiling Timing** group box options: **Before Accrual**, **After Accrual**, and **Not Applicable**.
- You can now specify whether excess leave is tracked as lost leave, transferred to an Excess Leave Type, or neither. For this purpose, the following changes were applied:
  - The Balance **Ceiling Method** drop-down list no longer lists the **Lost Leave Tracking** option. The screen now contains a **Track as Lost Leave** check box.
  - The screen contains new **Track as Lost Leave** and **Transfer Balance in Excess of Year Ceiling** check boxes for **Excess Leave Handling**.

### Patch and System JAR Requirements

This enhancement requires Costpoint 7.1.1 PATCH3150

### Application JAR Requirements

The following table shows the required application JAR version for each screen affected by this update:

Domain	Module	Application ID	Application Name	Application File
People	Leave	LDPCLHF	Compute Leave Accruals	cp711_Idpclhf_013.zip
People	Leave	LDMLVTAB	Manage Leave Codes	cp711_Idmlvtab_004.zip
People	Leave	LDMLVTP	Manage Leave Types	cp711_Idmlvtp_005.zip

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Support Center at <https://deltek.custhelp.com> before you install the update.

## To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Support Center credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix Update:

Refer to the installation instructions posted on the Deltek Support Center site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help » About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## To Check to See if the Feature is Installed:

1. Click **Help » About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).
