## **MATERIALS/INVENTORY/INMISSU1/Enter Sales Order Inventory Issues**

**Deltek Defect Tracking Number:**

982562

**Issues Resolved:**

**Description:** A separate application ID, INMISSU1, has been created for the Manage Sales Order Inventory Issues in the Inventory (IN) module. This change allows you to assign different organization security group/profile for the Manage Sales Order Inventory Issues in the IN module.

**Customers Impacted:** This change affects users who use organization security feature.

**Workaround Before Fix:** None.

**Additional Notes:** If you access the Manage Sales Order Inventory Issues screen via OEMISSU1 and your module rights are under the Sales Order Entry (OE) module, you now have to set up user rights and profiles for the Manage Sales Order Inventory Issues screen using the INMISSU1 application ID. However, license for both screens remain under the OE module.
