

Deltak Costpoint HotFix Readme

Release Date: May 30, 2018

Enhancement

Manage CER Settings

The new Manage CER Settings (BIMCERSETTINGS) screen has been added in preparation for an upcoming change to Costpoint Enterprise Reporting (CER). This screen would allow the selection of the data source for project budget reporting in CER which can either be Costpoint or Budgeting and Planning. You can also enable security for future models and reports that will be added to CER.

As default, model security will be enabled which at the same time will turn off the Cognos framework model security. You can turn off the model security anytime through this new screen.

Although this screen is already available in the Reports and Analytics domain, it has no impact on the current functionality of CER yet. A future version of CER will be required for this screen to take effect.

System Requirements

This enhancement requires the following:

- PATCH3324.sql
- PATCH3402.sql
- PATCH7149.sql

Application JAR Requirement

Domain	Module	Application ID	Application Name	Application File
Reporting & Analytics	Configuration	BIMCERSETTINGS	Manage CER Settings	cp711_bimcersettings_001.zip

More information about this release is on the following page.

Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Support Center at <https://deltek.custhelp.com> before you install the update.

To Download the HotFix/Feature Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Support Center credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix/Feature Update:

Refer to the installation instructions posted on Deltek's Support Center site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

To Check to See if the Feature is Installed:

1. Click **Help > About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).

More Information:

If you have any questions, please contact Deltek Support Center at <https://deltek.custhelp.com>.
