## **MATERIALS/MATERIAL PRODUCTION SCHEDULING/MSQPINV/View Part Inventory**

**Deltek Defect Tracking Number:**

977869

**Issues Resolved:**

**Description:** A separate application ID, MSQPINV, has been created for View Part Inventory in the Master Production Scheduling (MS) module. This is to allow you to assign a different organization security group/profile for the View Part Inventory in the MS module.

**Customers Impacted:** This change affects users who use organization security feature.

**Workaround Before Fix:** Assign the same organization security profile code for each of the modules assigned to View Part Inventory where organization security is already enabled.

**Additional Notes:** If you access the View Part Inventory screen via INQPINV and your module rights are under the IN module, you now have to set up user rights and profiles for the View Part Inventory screen using the MSQPINV application ID. However, license for both screens remain under the IN module.

**Custom Programs Affected:**

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

**To Download the Hot Fix:**

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

**More Information:**

If you have any questions, please contact Deltek support at <https://deltek.custhelp.com>.
