Deltek Defect Tracking Number:

Issues Resolved:

**Description:** When you entered a new employee record, the application generated a vendor record that used the employee ID as the user ID. However, the application did not populate the **User Login ID** (user\_login\_id) column in the Employee (EMPL) table with the employee ID. As a result, users accidentally generated a second vendor record.

**Customers Impacted:** This defect affects Costpoint Employee users.

**Workaround Before Fix:** None.

**Additional Notes:** None.
