Overview

The Deltek Mobile Expense for Ajera 3.0.5 release includes all the software issues resolved and enhancements that were made in Mobile Expense for Ajera 3.0.1 through Mobile Expense for Ajera 3.0.5.

Note: The official name of the application is *Deltek Mobile Expense for Ajera*. This document only uses it at first mention. The succeeding instances of the application name display *Mobile Expense for Ajera*. In addition, the application name in *Apple App Store* and *Google Play* displays *Deltek Expense for Ajera*.

Mobile Expense for Ajera 3.0 Cumulative Update 05

Released: June 27, 2025

This is an application release only and not installed from Deltek Software Manager (DSM).

Enhancements

This section includes enhancements for this release.

Updated Developer Mode Restrictions on Android and iOS

Deltek no longer restricts application usage when **Developer mode** is on for Android and iOS devices. However, enabling **USB debugging** on Android will still prevent access to ensure device integrity and application security.

Previously, turning on **Developer mode** caused an error indicating the device was rooted or jailbroken, which blocked access. After reassessing the security risks, Deltek has determined that this restriction is no longer required-- as long as **USB debugging** remains disabled on Android.

This update gives you more flexibility without compromising critical security measures.

Software Issues Resolved

There are no software issues resolved in this release.

Documentation Changes

This CU version uses the updated Deltek documentation template, which aligns with the new marketing design standards.

The following changes were made:

- Updated the title page
- Replaced headers (footers remain unchanged)
- Applied the Figtree font throughout the document
- Removed the end page
- Adjusted the blue tones used in headings and table headers to a slightly darker shade

Mobile Expense for Ajera 3.0 Cumulative Update 04

Released: April 23, 2025

Enhancements

This section includes enhancements for this release.

Support for PHP 8.3.19

The Touch Server has been upgraded to support PHP 8.3.19.

Latest Supported Mobile Operating Systems

The Mobile Expense for Ajera now supports Android 15.

The minimum supported version for Android is now version 13.

Support Flutter Framework Update to Version 3.27.2

This release updates the Flutter framework to the latest stable version 3.27.2, bringing performance improvements, bug fixes, and compatibility with the most recent Flutter features and tools.

Update to Veryfi Flutter Lens 2.0.16

This release updates the Veryfi Flutter Lens library to version 2.0.16, ensuring compatibility with the latest features, improvements, and security updates.

Warning Message for Duplicate Receipt

The Mobile Expense for Ajera now displays a warning message if it detects a receipt that has already been uploaded and scanned. This helps prevent duplicate entries and ensures more accurate tracking of scanned receipts.

Software Issues Resolved

There are no software issues resolved in this release.

Documentation Changes

This section includes details of sections changed in the printed documentation.

Document Name	Description of Change
Deltek Mobile Expense for Ajera 3.0 Installation Guide	Updated supported component versions.

Mobile Expense for Ajera 3.0 Cumulative Update 01

Released: May 13, 2024

Enhancements

This section includes enhancements for this release.

Support for PHP 8.3.6

The Touch Server has been upgraded to support PHP 8.3.6.

No URL Transfer from 2.x and Earlier Versions

When updating from version 2.x to 3.0, the Mobile Expense for Ajera application no longer retains the previously used Ajera URL from the 2.x application.

Support for Non-US Formats in Date Fields

The date fields in Mobile Expense for Ajera now accommodate non-US date formats, such as placing the day before the year and using dashes as the date separator.

Software Issues Resolved

Intelligent Character Recognition

Defect 2099608

Description: When trying to capture an image with an iPad mini or adjusting the device's orientation sideways or upside down, the Intelligent Character Recognition (ICR) menu options (Long Receipt, Receipt, Bill, and Other) would not display correctly.

Customers Impacted: Mobile Expense for Ajera users capturing an image with iPad mini.

Workaround Before Fix: Select another application while keeping the ICR screen open, then return to the ICR screen.

Quick Capture

Defect 2109094

Description: When using Quick Capture to add a receipt and modifying or removing captured values, all fields holding these values would remain highlighted in green.

Customers Impacted: All Mobile Expense for Ajera users using Quick Capture.

Workaround Before Fix: None.

Floating Action Button

Defect 2099659

Description: The Floating Action Button (FAB) would occasionally disappear on the **Expenses** and **Expense Report** screens.

Customers Impacted: All Mobile Expense for Ajera users.

Workaround Before Fix: The FAB is the primary action button used to add expense lines.

Documentation Changes

This section includes details of sections changed in the printed documentation.

Document Name	Description of Change
Deltek Mobile Expense for Ajera User Guide	Updated information on saving Ajera URL.

Appendix A: Download and Install the Cumulative Update

Note: This section only applies to the Touch Server.

Download and Install the Cumulative Update

1. From your web browser, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Cumulative Updates folder for your product and select the update to download.
6. Click **Download** at the bottom of the screen.
7. Download the file to a local workstation or a centralized server location.
8. Double-click the file to start the cumulative update.

Verify the Cumulative Update Installation

1. On the Mobile Expense for Ajera application, tap **Settings » About**.
2. In the **Native App** or **Web App** field, confirm that the version number reflects the update.
