Deployment Date: 10/31/2018

Hot Fix: cp711_pjpuppsr_012.zip

PJ/PI/PJPUPPSR/Update Project Status Report Table

Deltek Defect Tracking Number:

1010193

Issues Resolved:

Description: When users tried to save records in Manage Contracts using the **Save & Continue** function, a performance issue occurred due to the way that the application retrieves financial information. Several screens have been updated, and a new application has been created to resolve this issue.Update Project Status Report Tables now updates the fiscal year, period, and subperiod values on the Configure Contract Management Settings and Configure Opportunity Settings screens if the fiscal year, period, and subperiod values in Update Project Status Report Tables are later than those that exist in Configure Contract Management Settings and Configure Opportunity Settings. The fiscal year, period, and subperiod will not be changed in Configure Contract Management Settings and Configure Opportunity Settings screens if the fiscal year, period, and subperiod processed in Update Project Status Report Tables are earlier.**Note:** The fiscal year, period, and subperiod on the Configure Contract Management Settings screen are updated whether or not the **Use Accounting Period Below** option is selected on that screen. On the other hand, values on the Configure Opportunity Settings screen are updated only if the **Use Accounting Period Below** option is selected on that screen.

Customers Impacted: This change affects users of the Contract Management feature in Costpoint.

Workaround Before Fix: None.

Additional Notes: None.
