Overview

Welcome to the Deltek Learning Zone Version 17.1 Release Notes. These release notes contain a summary of the following:

- Enhancements
- Known Issues
- Software Issues Resolved

Important Note

Talent Information Center

For fast and easy access to the information that you need, Deltek offers the [Talent Information Center](#) (TIC), which collects all Talent Management documentation in one convenient location.

On the TIC page, you can access:

- Online Help and tips about how to maximize your searches
- Instructions for sending feedback to Deltek about any Help topic
- Links to the Talent Management GA and Cumulative Update release notes
- Learning Aids for the Talent Management user interface and individual modules
- Links to Talent Management user guides, administrator guides, and technical guides
- Information about the Talent Management Cloud Solutions for SaaS Administrators
- Information about the Deltek Learning Zone

To access the TIC, click this link: [Talent Information Center](#)

Talent Information Center Overview Video:

To view a two-minute orientation video about the TIC, click this link: [TIC Intro Video](#)

Enhancements

This section includes summaries of the enhancements made to existing features in this release.

Certain feature controls in this release have the following default settings. You enable feature settings on the Features screen (**Administration » Global Settings » System Administration » Features**).

Module	Feature Name	Location on the Features Screen	Default Setting

Deltek Learning Zone

Add Courses to Learning Path

This enhancement introduces design improvements to make it easier for Administrators and Learning Managers to search for and assign courses to learning paths. When you launch the **Add a Course** screen from the Manage Learning Paths application (**Administration » Learning Paths Management » Manage Learning Path » Actions » Add a Course**), the course selection process has been completely redesigned.

- **New Dynamic Course Listing.** The courses are now displayed in a two-pane Dynamic Forms interface. Active courses that you can add are listed under **Available Items** on the left pane; while courses selected for the learning path are listed under **Selected Items** on the right pane.

To add a course to the learning path, click **+** in the **Available Items** pane. To remove a course from the learning path, click **x** in the **Selected Items** pane. You can rearrange the sequence of the selected courses using the toggle to drag and drop the courses according to your desired order.

- **New Smart Search Functionality.** Two new fields have also been added to help you more quickly find the courses you need:
- **Sort:** You can display the course titles in ascending or descending alphabetical order from this drop-down list.
- **Filter:** Enter a full or partial course name to display course titles containing your search key.

The View Course screen (**Administration » Learning Paths Management » Manage Learning Path » Courses » <#>**) has also been updated to allow you to reorder the sequence of courses. You can drag and drop the course names to change the display order using the toggle. You can also click **x** to remove a course from the learning path. Any change you make in this screen is reflected in the **Selected Items** pane of the Add a Course screen.

Support for New Media File Types for E-Learning Courses

DLZ now supports MP4 videos and PDF file types, allowing you to upload .mp4 and .pdf files for E-Learning courses. This enhancement adds new options to the following screens:

- Add Course (**Administration » Course Management » Create a New Course » E-Learning**)
- Edit Course (**Administration » Course Management » Actions » Edit**)
- EPIQ Jobs (**Administration » EPIQ Jobs Management**)
- Course Profile (**Administration » Course Management » Courses » <Course Name>**)

Changes to the Add Course and Edit Course Screens

On the E-Learning Package tab, the **E-Learning Standard** field is now a drop-down list field rather than a radio button field. It includes the following new options in addition to **SCORM** and **AICC**:

- **Video (mp4)**: This enables you to upload courses in .mp4 video format. The maximum file size is 250MB. Selecting this e-learning standard enables the following sub-field:

Field Name	Definition
Media Content Threshold	This sets the percentage of video length a user must view to be considered complete. This field accepts only values ranging from 1 to 100 . If left blank, it defaults to 95 .

- **PDF**: This enables you to upload courses in .pdf format. The maximum file size is 250MB. Selecting this e-learning standard enables the following sub-fields:

Field Name	Definition
Media Content Threshold	This sets what percentage of the total document page count a user must read for the course to be considered complete. This field accepts only values ranging from 1 to 100 . If left blank, it defaults to 95 .
PDF Page Duration in Seconds	This sets the number of seconds a user must view a page for it to be credited for progress/completion. This field must have a value greater than 0 . If left blank, it defaults to 5 .
PDF Content Scaling	This sets the page magnification of the PDF document by selecting from the following options: <ul style="list-style-type: none"> ▪ Auto: For pages in portrait mode, this scales the page by height. However, if the PDF is too wide to fit horizontally, then it scales the page by width. ▪ Page Actual: This displays the page in its original dimensions. ▪ Page Fit: This scales the page to fit the available size of the document viewer. ▪ Page Height: This scales the page to fit the document viewer vertically. ▪ Page Width: This scales the page to fit the document viewer horizontally.

Enhancements

If you select either **Video (mp4)** or **PDF** as the **E-Learning Standard**, and then upload a non-corresponding file format in the **Upload Package** field, for example, a .zip file, this will result in an error message, preventing you from saving the course. Similarly, for the fields that accept only numeric values, typing a value outside the accepted range also results in an error message and will prevent you from saving the course.

Changes to the EPIQ Jobs Screen

The E-Learning Package Import Jobs screen now includes MP4 and PDF files in the package import jobs listing.

Changes to the Course Profile screen

The Launch Package Properties Editor pop-up screen now includes the following options depending on whether the course is an MP4 video or a PDF document:

Field	Description
Media Content Threshold	This displays only for video and PDF courses. This field sets the percentage of video length or the total document page count, respectively, a user must view or read for the course to be considered complete. This field accepts only values ranging from 1 to 100. If left blank, it defaults to 95.
PDF Page Duration in Seconds	This displays only for PDF document courses. This sets the number of seconds a user must view a page for it to be credited for progress/completion. This field must have a value greater than 0 . If left blank, it defaults to 5.
PDF Content Scaling	<p>This displays only for PDF document courses. This sets the page magnification of the PDF document by selecting from the following options:</p> <ul style="list-style-type: none"> ▪ Auto: For pages in portrait mode, this scales the page by height. However, if the PDF is too wide to fit horizontally, then it scales the page by width. ▪ Page Actual: This displays the page in its original dimensions. ▪ Page Fit: This scales the page to fit the available size of the document viewer. ▪ Page Height: This scales the page to fit the document viewer vertically. ▪ Page Width: This scales the page to fit the document viewer horizontally.

PHP 8.1 Upgrade

The Deltek Learning Zone is now fully compatible with PHP 8.1 upgrade.

DLZ Gainsight Attribute Addition

In order to improve on the ability to report on specific customer data, an attribute is now added to the code snippet to correctly pass the customer's name to Gainsight.

Single Registration Link Auto-Generate

A Single Registration Link is now automatically generated for DLZ customers and provided through a new merge code **[single_registration_link]** in the site deploy welcome email to the primary POC. This enables the POCs to share the link as needed, without having to generate the initial single registration link themselves.

Mandatory Product Association

DLZ new users are now required to choose an active product upon registration, while existing users without a product associated to them are redirected to their user page upon login, with a message to select an active product.

Product association is now required when adding users through the following screens:

- **Add/Edit User**
- **Edit User Information**Registration Link
- **Self-Registration**

For bulk upload of users (**Users » Import Users**), POCs can still upload a file where the **Product** field is empty, but the users will have to select a product on Edit User Information page upon login.

Product-Role Association

DU administrators can now create, edit, and remove product-role associations through the DLZ user interface (**Administration » Global Settings » System Administration » Drop-down and Multi-Select lists » DLZ Products / DLZ Roles**).

To add a product or role association:

1. From the **Select Listing** drop-down menu, select **DLZ Products** or **DLZ Roles**, as applicable.

Adding a new product-role definition value or editing an existing definition displays an additional field for product-role associations.
2. In the **Role Associations** or **Product Association** field, select the roles/products that you want to associate to the product/role from the left list box and click the arrow button to move it to the right list box.

Current product-role associations are reflected in the selection list; but if a product/role is deactivated or deleted, it will not display in the selection box.
3. Click **Save**.

The associations are now saved and applied to all pages that display the product or role field.

Software Issues Resolved

Missing Courses Using Mobile Phone Browsers

Deltek Defect Number: 1755944

Description: When using mobile phone browsers, the list of courses in the learning path was missing in **Main Dashboard » Recommended Learning Paths**.

Customers Impacted: This affected DLZ users.

In Progress Courses Fails To Load

Deltek Defect Number: 1760209

Description: When a user has a class with no course assigned, the courses with **In Progress** status did not display on the Courses Profile section of the Learning Profile.

Customers Impacted: This affected DLZ users.

Course Progress Resets

Deltek Defect Number: 1920418

Description: The student's progress was reset when taking a course with a new version uploaded and with the **Force New Course Version** check box selected.

Customers Impacted: This affected DLZ users.

Appendix A: For Additional Information

Deltek Support Center

The Deltek Support Center is a support Web site for Deltek customers who purchase an Ongoing Support Plan (OSP).

The following are some of the many options that the Deltek Support Center provides:

- Search for product documentation, such as release notes, install guides, technical information, online help topics, and white papers
- Ask questions, exchange ideas, and share knowledge with other Deltek customers through the Deltek Support Center Community
- Access Cloud-specific documents and forums
- Download the latest versions of your Deltek products
- Search Deltek's knowledge base
- Submit a support case and check on its progress
- Transfer requested files to a Customer Care analyst
- Subscribe to Deltek communications about your products and services
- Receive alerts of new Deltek releases and hot fixes
- Initiate a Chat to submit a question to a Customer Care analyst online

Attention: For more information regarding Deltek Support Center, refer to the online help available from the Web site.

Access Deltek Support Center

To access the Deltek Support Center:

1. Go to <https://deltek.custhelp.com>.
2. Enter your Deltek Support Center **Username** and **Password**.
3. Click **Login**.

Note: If you forget your username or password, you can click the **Need Help?** button on the login screen for help.
