PJ/PI/PJRREV/Print Revenue Summaries

Deltek Defect Tracking Number:

817128

Issues Resolved:

Description: This application has been updated to include contract values that exclude regular modifications with future effective dates. Award fee modifications are excluded based on the fiscal year, start and end periods, and subperiod of the award fee rather than the effective date of the modification. On the screen, the following options are now available on the lookup of the **As Column 2 - As Column 8** drop-down lists:

- Contract to Date Award Fee (w/o Future Mods)
- Contract to Date Funded Award Fee (w/o Fut. Mods)
- Contract to Date Funding (w/o Future Mods)
- Contract to Date Value (w/o Future Mods)

These new column options are populated by the new table, PROJ_MOD_ITD_SUM, with amounts that are unique for the project/fiscal year/period/subperiod combination.The following column options, on the other hand, have been renamed to reflect that the amounts under these columns are for all modifications.

- Total Contract Award Fee has been renamed to Total Contract Award Fee (All Mods).
- Total Funded Award Fee has been renamed to Total Contract Funded Award Fee (All Mods).
- Total Contract Funding has been renamed to Total Contract Funding (All Mods).
- Total Contract Value has been renamed to Total Contract Value (All Mods).

When the new and updated column options are selected, the new columns and column names are displayed on the Project Revenue Summary accordingly.

Customers Impacted: This change affects Costpoint users.
