Hot Fix: cp711_pjpcompr_010.zip

PJ/CR/PJPCOMPR/Compute Revenue

Deltek Defect Tracking Number:

710282

Issues Resolved:

Description: Compute Revenue did not update the "%ADT" tables with revenue calculation values from the project's "HS_%" tables when the "HS_%" table values exist and were used for revenue computation.

Customers Impacted: This defect affects customers who select the **Copy Project Setup Data to History Tables** check box when running Update Prior Year History for projects, or those who populate the data in the project's "HS_%" tables via the backend.

Workaround Before Fix: None.

Additional Notes: If customers have data in the "HS_%" tables that is used for computing revenue, and it differs from the current data in the regular project setup tables, the wrong data will be written to the "%_ADT" tables.

```
DELETE FROM PROJ_SUM WHERE EXISTS (SELECT P.PROJ_ID FROM PROJ P
WHERE P.PROJ_ID = PROJ_SUM.PROJ_ID AND P.COMPANY_ID != PROJ_SUM.COMPANY_ID)
```
