ACCOUNTING

[Deltek Defect Tracking Number:](#)

538916

[Issues Resolved:](#)

Description: The multicurrency (MU) Exchange Rate subtask should have been enabled through the Web Integration Console (WIC).

Customers Impacted: This defect affects you if you use the Web Integration Console.

Workaround Before Fix: Submit the currency information by using the transaction header. Override fields for exchange rate which are WIC_SPOT_EXCHG_RT and WIC_SPOT_EXCHG_RT2.

Additional Notes: When the MU Exchange Rate subtask is enabled, it would allow a consistent interface for exchange rates information between the Costpoint user interface and Web Integration Console. Testing is necessary for Accounts Payable Vouchers, Purchase Order Vouchers, Cash Receipts, Journal Entries, and Invoices.
