Issues Resolved:

Description: The labels in the header of the table windows were not the same as the application name. This happened when you set the screen to table view and the Auto Position feature was turned on. For example, in the Manage Cash Forecast Templates application, the header label for the first table window was Maintain Cash Forecast Templates and the other table window displays the header as Maintain Cash Forecast Templates Child.

Customers Impacted: This defect affects you if you manage cash forecast templates in Costpoint.

Workaround Before Fix: To avoid confusion, turn off the Auto Position feature and use the Manage Cash Forecast Templates screen in Form view.
