

# Deltak Costpoint HotFix Readme

*Released: May 21, 2015*

## Enhancements

### Allow Approvers to Apply to Lower Levels of the Organization

The Approve Position Requisition screen was updated to allow approvers to approve requisitions for an Organization and its lower levels. The following are the application updates:

- You can now specify an Approver that is either:
  - linked directly to the screen accounting Organization in the Manage Position Requisition Approvers table
  - linked to a higher level of the screen Organization that is flagged to **Apply to Lower Levels** on the Manage Position Requisition Approvers table
- The **Approver** field Lookup function will only list Approvers that are either:
  - linked directly to the screen accounting Organization in the Manage Position Requisition Approvers table
  - linked to a higher level of the screen Organization that is flagged to **Apply to Lower Levels** on the Manage Position Requisition Approvers table
- You will not be able to enter an **Approver** that is neither:
  - linked directly to the screen accounting Organization in the Manage Position Requisition Approvers table
  - linked to a higher level of the screen Organization that is flagged to **Apply to Lower Levels** on the Manage Position Requisition Approvers table
- A validation was added to **Status** options to prevent user from approving a requisition where the Detail Job Title is not flagged for **Export to SilkRoad** on the Manage Detail Job Titles screen (if you are using SilkRoad).
- Updated the application by removing organizational security. To allow you to apply approval abilities to lower levels of an organization in the Manage Position Requisition Approvers, organizational security can no longer be applied in this application.

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

## To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
