PJ/CR/PJPCOMPR/Compute Revenue

Deltek Defect Tracking Number:

817088

Issues Resolved:

Description: A new table, Project Modification ITD Summary (PROJ_MOD_ITD_SUM), has been added to Costpoint to store inception-to-date funded and contract values that exclude modifications from periods later than the calculated period. The new table is populated by the Compute Revenue process, whether or not the **Track Revenue Setup Information on Compute Revenue** check box is selected on the Configure Project Settings screen. The data written to the new table will be for unique project/fiscal year/period/subperiod combinations and will be overwritten when Compute Revenue is rerun for the same project/fiscal year/period/subperiod combination. Fields in this new table are used for the Project Status Report, Project Revenue Summary, and Project Revenue Worksheet.

Customers Impacted: This change affects Costpoint users.
