MATERIALS/INVENTORY/INQPINV

Deltek Defect Tracking Number:

975291

Issues Resolved:

Description: The View Part Inventory (INQPINV) code has been converted to a library, MMQPINVLIB, to allow creation of separate application IDs of the View Part Inventory in Production Control (PC), Material Requirements Planning (MR), and Master Production Scheduling (MS) modules.

Customers Impacted: This change affects Costpoint users who use the organization security feature.

Workaround Before Fix: Assign the same organization security profile code for each of the modules assigned to INQPINV where organization security is already enabled.

Additional Notes: This change allows users to assign a different organization security group/profile to each screen. This change requires PATCH7158.
