Description: Costpoint saved the value of **0** instead of the quantity that you entered in the **Order to Quantity** field. This occurred if you entered a value in the **Order to Quantity** field and then saved the record without tabbing out of the field.

Customers Impacted: This affects Costpoint users who enter Reorder Type parts.

Workaround Before Fix: Enter the value in the **Order to Quantity** field again, hit the **Tab** button, and then **Save**.

Additional Notes: None.
