Deltek Time & Expense
with Employee Self-Service
Version 9.0
Costpoint Corrections

Costpoint 6.1 Service Pack 2

Title	Menu Selection	Date	Description
Aavaltess	.MSS/.ORA Stored Procedure	4/29/2010	Stored Procedure for TE 9.0 release only.
LDPDTC	Download to Time Collection	3/1/2012	If a charge was deleted, the Delete Entry command stayed in the DEL_PROJ_EMPL table after being sent to the Charge File. This caused the Delete Entry command to be resent during the next full export. 9/13/2011 If you exported Charge information to Deltek Time & Expense, the process included unnecessary data in the Charge file. The excess data included Projects and Manufacturing Orders (MOs) that are linked to Projects which have an **Export Project** method of **Not Applicable** on the Time Collection Projects screen. 1/06/2011 When this application was run using the process server, the labor rates exported from the history showed a zero rate. 6/30/2010 The Orgs were being exported when they were not selected to be exported. This has been corrected.
