

Deltek Costpoint Hot Fix Readme

Release Date: June 28, 2019

Support for New Costpoint to Cobra Integration API

The Costpoint to Cobra integration released with Costpoint 7.1.1 System JAR 054 (June 2019) provides support for the Standard Cobra Web Service (Cobra.WebService.Host.exe) which you can now use to post valid transactions from Costpoint to Cobra. This new version of the web service can be used by multiple Deltek products for data integration with Cobra. The Standard Cobra Web Service added the support for the Costpoint to Cobra integration in the **Cobra 8.2 Cumulative Update #14** release.

Prior to the Costpoint 7.1.1 System JAR 054 release, integration using web services was possible only through the Cobra Costpoint Web Service (Cobra.Costpoint.WebService.Host.exe). This is the initial version of the Cobra web service which only allows data transfer from Costpoint and does not support other Deltek products.

Warning: Costpoint 7.1.1 System JAR 054 or higher only supports integration with Cobra through the Standard Cobra Web Service. If you upgrade to Costpoint 7.1.1 System JAR 054, you must upgrade to Cobra 8.2 Cumulative Update #14 or higher.

This Costpoint release applies changes to the following screens to enable support for the Standard Cobra Web Service:

- Compute Cobra Burden Costs (AOPCBLAB)
- Manage Cobra Resource Templates (AOMCBBET)
- Manage Cobra Charge Templates (AOMCBCHG)
- Manage Cobra Cost Templates (AOMCBCST)
- Manage Cobra Extraction Parameters (AOMCBEXT)
- Manage Cobra Project Mapping (AOMCBPRJ)

Additional Updates

The Sample Cobra Project Field Will No Longer Allow Resource Files

When you apply Costpoint 7.1.1 System JAR 054 or later, you can no longer select resource files in the **Sample Cobra Project** field on the Manage Cobra Resource Templates (AOMCBBET) screen. You will only be allowed to select Cobra projects in the field.

If you previously mapped Cobra resources by selecting a resource file in the **Sample Cobra Project** field, you do not need to update the existing records unless the Cobra Resource Detail table requires changes.

Costpoint Configuration Utility

To support the Standard Cobra Web Service, Costpoint 7.1.1 System JAR 054 also updates the Costpoint Configuration Utility. This release removes the **Database Cobra Integration** group box from the Cobra integration tab of the utility. The group box contained the settings for using the Cobra Costpoint Web Service (Cobra.Costpoint.WebService.Host.exe) which is no longer supported in Costpoint 7.1.1 System JAR 054 or higher.

Note: For more information on the compatibility, proper setup, and troubleshooting of the Costpoint to Cobra integration, please refer to the [Deltek Costpoint to Cobra Integration 2.0 Integration Technical Guide](#).

System Requirements

This enhancement requires Costpoint 7.1.1 System JAR 054.

Application JAR Requirements

The following table lists the Costpoint 7.1.1 screens affected by this update. It includes the required JAR version for each application, if applicable.

Domain	Module	Application ID	Application Name	Application File
Admin	System Administration	AOMCBBET	Manage Cobra Resource Templates	cp711_aomcbbet_004.zip
Admin	System Administration	AOMCBCHG	Manage Cobra Charge Templates	cp711_aomcbchg_002.zip
Admin	System Administration	AOMCBCST	Manage Cobra Cost Templates	cp711_aomcbcst_004.zip
Admin	System Administration	AOMCBEXT	Manage Cobra Extraction Parameters	cp711_aomcbext_003.zip
Admin	System Administration	AOMCBPRJ	Manage Cobra Project Mapping	cp711_aomcbprj_003.zip
Admin	System Administration	AOPCBLAB	Compute Cobra Burden Costs	cp711_aopcblab_011.zip

Custom Programs Affected

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Support Center at <https://deltek.custhelp.com> before you install the update.

To Download the Hot Fix/Feature Update

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Support Center credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the Hot Fix/Feature Update

Refer to the installation instructions posted on Deltek's Support Center site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the Hot Fix is Installed

1. Open the application that was updated.
2. Click **Help » About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

To Check to See if the Feature is Installed

1. Click **Help » About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).

Note: Most of the features installed have their corresponding patches, but not all.

Appendix: For Additional Information

Deltek Support Center

The Deltek Support Center is a support Web site for Deltek customers who purchase an Ongoing Support Plan (OSP).

The following are some of the many options that the Deltek Support Center provides:

- Search for product documentation, such as release notes, install guides, technical information, online help topics, and white papers
- Ask questions, exchange ideas, and share knowledge with other Deltek customers through the Deltek Support Center Community
- Access Cloud-specific documents and forums
- Download the latest versions of your Deltek products
- Search Deltek's knowledge base
- Submit a support case and check on its progress
- Transfer requested files to a Customer Care analyst
- Subscribe to Deltek communications about your products and services
- Receive alerts of new Deltek releases and hot fixes
- Initiate a Chat to submit a question to a Customer Care analyst online

Attention: For more information regarding Deltek Support Center, refer to the online help available from the Web site.

Access Deltek Support Center

To access the Deltek Support Center:

1. Go to <https://deltek.custhelp.com>.
2. Enter your Deltek Support Center **Username** and **Password**.
3. Click **Login**.

Note: If you forget your username or password, you can click the **Need Help?** button on the login screen for help.

About Deltek

Better software means better projects. Deltek is the leading global provider of enterprise software and information solutions for project-based businesses.
