

Deployment Date: 12/27/2017

Hot Fix: cp711_sys_036.zip; cp711_patch3349_001.zip; cp711_patch7139_001.zip

Framework

[Deltek Defect Tracking Number:](#)

869285

[Issues Resolved:](#)

Description: A posting submitted from the parameter screen through the Batch Mode menu selection may not complete fully due to timing considerations. It is possible that the trigger that controls the cleanup process may fire prematurely causing the movement of the JE transactions to the history tables to appear missed. This happens because the cleanup process removes the posting sequence number from the JE transactions. Since the posting sequence is prematurely removed when the app reaches the code that moves the JE transactions to history, they are missed. This scenario is difficult to reproduce but can be avoided by using the Job Server to submit jobs for batch processing.

Customers Impacted: All Costpoint 7.0.1 users.

Workaround Before Fix: None

Additional Notes: Patch3349 and Patch7139 are required.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:

If you have any questions, please contact Deltek support at <https://deltek.custhelp.com>.
