About This Guide

The ProPricer™ Report Sample Guide introduces you to every built-in ProPricer report. For each one, it provides a brief description and one-page sample. Most samples are generated with default report options.

Please be aware that some reports shown in this guide are only available in specific editions of ProPricer.

To learn more about reports and report options, log in to ProPricer, go to the **Help** ribbon, then click **Contents & Index**. Or press **F1** on your keyboard when you have a report or its options open in ProPricer.

Ad Hoc Reports

Ad Hoc Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Ad Hoc Cost Breakdown Report combines a cost breakdown format with ad hoc flexibility, allowing you to reveal the cost information of your choice for a specific proposal.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resources on the report.
- Print the indirect rates and bases for the rates.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

ProPricer 9.6.101.0 Report Samples

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

The following options were used to generate the Ad Hoc Cost Breakdown Report:

Comparison Reports

Comparison Algorithm Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Comparison Algorithm Report compares the differences between the algorithms assigned to proposals. It shows the elements, COM definitions, total definitions, and formulas in each algorithm, and it highlights any differences in red.

Depending on the options you select for the report, you can:

- Compare two or more algorithms.
- Use the names of the indirect elements instead of their abbreviated codes in the algorithm formula.
- Indicate the indirect base in a formula expression for reference and clarification.

The following options were used to generate the Comparison Algorithm Report:

Content Options

- Base Proposal: S4-H5 Watchtower, Ver.0

Comparison Annual Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Annual Cost Breakdown Report compares proposal costs timephased by year for two or more proposals. It shows input hours and units, direct costs, and indirect expenses. You can generate the report for a single summary element, or for up to five different ones. Every new summary element starts a new page. If a resource is not used in a particular year, the report displays zeroes for the respective hours/units and expenses.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Suppress any zero values that may appear.

ProPricer 9.6.101.0 Report Samples

- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs are converted.

Comparison Annual Cost Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Annual Cost Summary Report compares summarized costs for a single summary element or a combination of two summary elements, timephased by year for two or more proposals. Each year of the reporting period is displayed in a separate column on the report. The summary field entries are printed on a single page or more depending on the volume of the report. If a summary element is not used in some years, the report prints zeroes for the respective expenses for those years. The report displays a total in the far right column for each combination of summary elements and a total at the bottom for each year.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the descriptions of the summary elements.
- Print the resources and descriptions.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

The report also offers a Disclosure Format option that allows you to define how the indirect expenses are shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Comparison CER Data Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Comparison CER Data Report compares base and derivative resource data of the Cost Estimating Relationships used in two or more proposals.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print CER descriptions.
- Print CER factors.
- Sort the data by CER factor.
- Print the name of the rate band entered for the derivative resources in the Direct Rate Table.
- Print the name of the indirect pool entered for the derivative resources.
- Print the currency entered for the derivative resources whose rate type is *Cost*.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

Comparison Detail Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Detail Cost Breakdown Report compares proposal input and cost data on a yearly, quarterly, or monthly basis for two or more proposals. It shows hours/units, rates, and direct costs per resource, as well as indirect expenses. Each period is presented in a separate column, and all months/quarters/years are summed in a **Total** column. You can generate the report for a single summary element or for up to five different ones. Every new summary element starts a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Print the period of performance of each comparison proposal.
- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

- Suppress any zero values that may appear.
- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Comparison Detail Phase Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Detail Phase Cost Breakdown Report compares proposal input and cost data by phase and year, quarter, month, or only by phase for two or more proposals. It shows hours/units, rates, direct costs, and indirect expenses per resource. Each period is presented in a separate column, and all months/quarters/years are summed in a Total column. You can generate the report for a single summary element, or for up to five different ones. Every new summary element starts a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

Comparison Direct Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Direct Rate Report shows the resource rates from two or more Direct Rate Tables, Composite Rate Tables, or T&M Rate Tables.

Here are a few things you can do with the options in this report:

- Print monthly, quarterly, or annual rates.
- Print rates within a specific fiscal year period.
- Prints rates for a single resource.
- Print the deltas in a separate column.
- Indicate rate differences with a red highlight.

Comparison Element Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Element Matrix Report prints a comparison crosscut of task input and cost information for two or more proposals. The report is based on two summary elements. The information is presented in a rectangular array in which rows display the entries from the first summary element, and columns display entries from the second summary element. The array is divided into two parts. The upper part shows input and direct cost plus some indirect expenses, depending on the disclosure format selected. The lower part shows only indirect expenses.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Print the period of performance of each comparison proposal.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs are converted.

Comparison Indirect Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Indirect Rate Report shows the rates entered in the indirect pools of two or more Indirect Rate Tables.

To run this report, the tables being compared must use the same timescale and algorithm, which are set in the table properties.

Here are a few things you can do with the options in this report:

- Print the deltas in a separate column.
- Indicate the rate differences with a red highlight.
- Print the rates from a single indirect pool.

Comparison Monthly Cost Breakdown Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

The Comparison Monthly Cost Breakdown Report compares proposal cost information timephased by month for two or more proposals. It shows input hours and units, direct costs, and indirect expenses. Because the month is the smallest calendar unit in ProPricer, this report provides the most detailed view of proposal costs. Every month is displayed in a separate column, and all months are summed up in a **Yr Total** column.

You can generate the report for a single summary element, or for up to five different ones. Every new summary element starts a new page, and each page shows a single fiscal year. A year may need more than one page, but the report never displays two years on the same page.

If a resource is not used in a certain month, the report will display zeroes for the respective hours/units and expenses for that month.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.

ProPricer 9.6.101.0 Report Samples

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Print a Summary Page.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

The following options were used to generate the Comparison Monthly Cost Breakdown Report:

Comparison Proposal Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Proposal Rate Report compares the average direct rates and the average input indirect rates of resources in two or more proposals. Unless a proposal has rate overrides or cost actuals, the average rates of its resources will match the rates in the proposal's Direct and Indirect Rate Tables.

Note: *To run this report, you must have Access Rights to the Show Direct Cost and Show Indirect Cost permissions. If the proposal is locked, access must be granted to those permissions in the Locked Proposal Rights.*

Here are a few things you can do with the options in this report:

- Run the report at the proposal level or the task level, WBS level, CLIN level, etc.
- Indicate rate differences between proposals with a red highlight.
- Print average rate totals for each period and for the whole proposal.

Comparison Quarterly Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Quarterly Cost Breakdown Report compares proposal cost information timephased by quarter for two or more proposals. It shows input hours and units, direct costs, and indirect expenses. Every quarter is displayed in a separate column, and all quarters are summed up in a **Yr Totals** column.

You can generate the report for a single summary element, or up to five different ones. Every new summary element starts a new page, and each page shows a single fiscal year.

If a resource is not used in a certain quarter, the report displays zeroes for the respective hours/units and expenses for that quarter.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.

ProPricer 9.6.101.0 Report Samples

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Print a Summary Page.
- Suppress any zero values that may appear.
- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Comparison Resource Element Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Resource Element Matrix Report compares resource input and cost information for every resource for two or more proposals. You can summarize the costs for a single summary element or a combination of two summary elements.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Print the period of performance of each comparison proposal.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Print the descriptions of the summary elements.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses are shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Comparison Summary Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Comparison Summary Cost Breakdown Report compares summarized cost information by summary element and resource for two or more proposals. The report shows input hours and units, direct costs, and indirect expenses. Unlike the other Cost Breakdown Reports, this report does not break the cost information into time units; only costs for the duration of the reported tasks are displayed. The Summary Element column is subdivided into two sub-columns showing hours/units (for resources with rate types *Hours* and *Units*) and cost (for resources of all rate types), respectively. You can generate the report for one or more summary elements and one summary element that crosses the other(s).

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a system Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the differences in a Delta column.
- Print the period of performance of each comparison proposal.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the rates of the resources and descriptions.
- Print the indirect rates and the bases.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Multi-Proposal Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Multi-Proposal Summary Report compares summarized cost data for two or more proposals. The comparisons are categorized by resource class, so each class starts a new page of the report. For every resource in a specific class, a separate direct cost column is printed. The first page of the report includes an additional column for proposal-level direct cost totals. The extended cost of proposals and resources is displayed if the proposals contain task quantities, or if you enter a quantity in the report options.

Information from the Proposal Properties is used to group proposals together in this report. Proposals with the same Manager, RFQ, Quantity, Grouping, etc. can comprise a single group, and a subtotal of costs is printed for each group.

Depending on the options you select for the report, you can:

- Sort the data by grouping proposals.
- Adjust how extended cost is calculated with the Quantity and Quantity Operation options.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Enter start/end dates to limit the report to a specific period of performance.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs are converted.

Comparison Project Reports

Comparison Project Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Government Edition

The Comparison Project Cost Breakdown Report shows the direct cost of the normalized resources in a project's proposals. The report options allow you to:

- Print the hours/units and direct rate of each resource.
- Highlight the differences between hours, direct rates, and direct costs.
- Print annual, quarterly, or monthly data, or run the report with no timescale.
- Print data for any fiscal year period, regardless of the fiscal year period in each proposal.
- Categorize report data by a normalized summary field, or select no summary field to get a broader breakdown of the proposals' direct costs.

Comparison Project Detail Report

This report is only available in the following editions of ProPricer™

Government Edition

The Comparison Project Detail Report prints the normalized resources and cost elements of the proposals that make up the project. The report allows you to select the normalized summary field you want to use to report the data, as well as the proposals you want to include. Other options include printing a currency symbol, and entering the number of places you want to print after the decimal point for the cost fields.

Cost Breakdown Reports

Annual Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Annual Cost Breakdown Report prints proposal costs timephased by year. It shows input hours and units, direct costs, and indirect expenses. You can generate the report for a single summary element or up to five different ones. Every new summary element will start a new page. If a resource is not used in a year, the report will display zeroes for the respective hours/units and expenses.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

- Suppress any zero values that may appear.
- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

The following options were used to generate the Annual Cost Breakdown Report:

Currency Breakdown Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

The Currency Breakdown Report prints proposal input and cost data on a yearly, quarterly, or monthly basis. It shows hours/units, rates, and direct costs per resource, as well as indirect expenses. Each period is presented in a separate column, and all months/quarters/years are summed in a **Total** column. The periods are further broken down by each currency used in the proposal. You can generate the report for a single summary element, or up to five different ones. Every new summary element will start a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Suppress any zero values that may appear.

ProPricer 9.6.101.0 Report Samples

- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

The following options were used to generate the Currency Breakdown Report:

Content Options

- Summary Field: Summary

Detail Cost Breakdown Report

The Detail Cost Breakdown Report prints proposal input and cost data on a yearly, quarterly, or monthly basis. It shows hours/units, rates, and direct costs per resource, as well as indirect expenses. Each period is presented in a separate column, and all months/quarters/years are summed in a **Total** column. You can generate the report for a single summary element, or up to five different ones. Every new summary element will start a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Suppress any zero values that may appear.
- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

ProPricer 9.6.101.0 Report Samples

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Detail Phase Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Detail Phase Cost Breakdown Report prints proposal input and cost data by phase and year, quarter, month, or only by phase. It shows hours/units, rates, and direct costs per resource, as well as indirect expenses. Each period is presented in a separate column, and all months/quarters/years/Phases are summed in a **Total** column. You can generate the report for a single summary element, or up to five different ones. Every new summary element will start a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Monthly Cost Breakdown Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

[Government Edition](#)

The Monthly Cost Breakdown Report prints proposal cost information timephased by month. It shows input hours and units, direct costs, and indirect expenses. Because the month is the smallest calendar unit in ProPricer, this report provides the most detailed view of proposal costs. Every month is displayed in a separate column, and all months are summed up in a **Yr Total** column.

You can generate the report for a single summary element, or up to five different ones. Every new summary element will start a new page, and each page shows a single fiscal year. A year may need more than one page, but the report will never display two years on the same page.

If a resource is not used in a certain month, the report will display zeroes for the respective hours/units and expenses for that month.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.

ProPricer 9.6.101.0 Report Samples

- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Print a Summary Page.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Quarterly Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Quarterly Cost Breakdown Report prints proposal cost information timephased by quarter. It shows input hours and units, direct costs, and indirect expenses. Every quarter is displayed in a separate column, and all quarters are summed up in a **Yr Totals** column.

You can generate the report for a single summary element, or up to five different ones. Every new summary element will start a new page, and each page shows a single fiscal year.

If a resource is not used in a certain quarter, the report will display zeroes for the respective hours/units and expenses for that quarter.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Print a Summary Page.
- Suppress any zero values that may appear.
- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Resource Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Resource Cost Breakdown Report prints the number of hours every resource is used in the proposal, as well as the associated expenses. The report incorporates an Ad Hoc Layout, which allows you to select the items you want to include in it.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Resource Currency Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Resource Currency Matrix Report prints summarized cost information by currency for the summary element selected. ProPricer will use the Exchange Rate Table assigned to the proposal to convert the costs to the proposal currency. Every currency used in the proposal is presented in a separate column. Every new summary element will start a new page.

The report uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

ProPricer 9.6.101.0 Report Samples

You can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Summary Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Summary Cost Breakdown Report prints summarized cost information by summary element and resource. The report shows input hours and units, direct costs, and indirect expenses. Unlike the other Cost Breakdown reports, this report does not break the cost information into time units; only costs for the duration of the reported tasks are displayed. The Summary Element column is subdivided into two sub-columns showing hours/units (for resources with rate types *Hours* and *Units*) and cost (for resources of all rate types), respectively. You can generate the report for one or more summary elements and one summary element that will cross the other(s).

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the rates of the resources and descriptions.
- Print the indirect rates and the bases.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Three-Point Detail Cost Breakdown Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Three-Point Detail Cost Breakdown Report prints the three-point estimates and expected values in a proposal on a yearly, quarterly, or monthly basis. It shows hours/units, rates, and direct cost per resource, as well as indirect expenses. Each period is presented as a separate collection of columns, and all months/quarters/years are summed in a **Total** section. You can generate the report for up to five summary elements. Every new summary element will start a new page.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the resource hours/units, rates, and descriptions.
- Print the indirect rates and bases for the rates.
- Enter start and/or end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Suppress any zero values that may appear.

- Print inactive years within the proposal's period of performance as blank columns when a summary element has no data for a particular year

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Unit Cost Breakdown Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

The Unit Cost Breakdown report prints resource rates and costs per resource unit. The report shows direct rates, indirect rates and bases for these rates, the duration of resource employment expressed in accounting months, input labor hours, direct and indirect expenses, and hours and cost per resource unit. Every summary element is displayed on a separate page. When Annual Breakout is included, each fiscal year is presented on a separate page as well.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print the rates of the resources and descriptions.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the indirect rates and bases for the rates.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers Disclosure Format and Cost Level options that provide various possibilities for disclosing the direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

15-2 Line Item Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The 15-2 Line Item Summary Report prints summarized cost information in accordance with FAR 15.408 by summary element for new contracts and change orders, modifications, and claims. Change order pricing may include adding new work or deleting work that may have already started. The 15-2 Line Item Summary Report allows you to print the estimated unit and total costs, or isolate the costs of deleted work already performed and the total cost of the work deleted. The report assumes you are adding new work by default. You must select the **Change Order** checkbox to activate the Deleted Work options.

Depending on the options you select for the report, you can:

- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Specify how many units will be made.
- Use resource actuals for cost calculations.
- Include labor hours in the report along with any selected cost elements.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

The following options were used to generate the 15-2 Line Item Summary Report for a new contract:

DD Form 1547 Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The DD Form 1547 Report shows the record of Weighted Guidelines Application. The Weighted Guidelines method calculates the Profit/Fee Objective of a proposal or of a selection of tasks and/or resources from a proposal, based on the facilities employed, the type of the contract, the length of the contract, and the risk factors associated with the contract performance.

Depending on the options you select for the report, you can:

- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

DD Form 1861 Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The DD Form 1861 Report shows the contract Facilities Capital Cost of Money. Based on the distribution of the Facilities Capital Cost of Money and the COM indirect rates, the report calculates the Facilities Capital Employed. It distributes the expenses for Land, Buildings, and Equipment based on the factors entered in the proposal's Asset Table.

Depending on the options you select for the report, you can:

- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Show a breakdown of the indirect pools by indirect element.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

The following options were used to generate the DD Form 1861 Report:

DD Form 1921 Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

This report only prints DD Form 1921-1, known as the Functional Cost-Hour Report, which shows a proposal's recurring and nonrecurring costs and hours. It is typically run by WBS, but you can also run it by Task ID or another summary field.

To run this report, the proposal must have summary fields for tracking the number of units to date and the number of units at completion.

Depending on the options you select for the report, you can:

- Fill in the text or select the checkboxes in the form's various numbered boxes.
- Choose which resource field value identifies the proposal's recurring resource costs.
- Associate a resource field value with each line item in the form.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

DOE Form 4620 Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

Organizations applying for a research award from the U.S. Department of Energy (DOE) use this report to show the budget being requested. The first page summarizes the budget for the whole proposal, and the subsequent pages show the budget for each fiscal year.

Before running the DOE Form 4620 Report, verify the form mapping settings on the DOE Form 4620 page of the Proposal Properties. If those settings are blank, the report will not run.

Here are a few things you can do with the options in this report:

- Print only the summary Budget Page and exclude all annual Budget Pages.
- Show information in a fiscal year period that is different than the proposal's fiscal year period.
- Limit the report information to specific tasks and resources.

ProPricer 9.6.101.0 Report Samples

FWP Form Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

This is a report for organizations that submit field work proposals to the U.S. Department of Energy (DOE). It provides a two-page proposal overview, including general project information, operational budget requests, anticipated milestones, and required reports.

The FWP Form page of the Report Defaults has settings for the work proposal number, title, reviewer, and other information that needs to appear on the form.

In individual proposals, go to the Proposal Properties to set up additional information for Page 1 and Page 2 of the FWP Form, such as the proposal description and your milestones. Before running the FWP Form Report, verify the form mapping setting in the Proposal Properties. If that setting is blank, the report will not run.

Here are a few things you can do with the options in this report:

- Print the operating expense and equipment total on a separate line.
- Show information in a fiscal year period that is different than the proposal's fiscal year period.
- Indicate which detail attachments you will be including with the form.
- Limit the report information to specific tasks and resources.

Proposal Cover Sheet Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Proposal Cover Sheet Report is used to present the proposal to the government. It prints information about the offeror, contact and contract administration office, as well as details of the contract. ProPricer uses the data entered on the **Cover Sheet** page in the **Government Data** subfolder in the **Reports** folder of **Proposal Properties**.

Depending on the options you select for the report, you can:

- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

ProPricer 9.6.101.0 Report Samples

Proposal Cover Sheet - Advanced Tank, Ver. 0

Cost or pricing data are not included as part of this proposal.

1. Solicitation/Contract/Modification No.: AA-2015

2. Offeror

Executive Business Services, Inc.

3. Point of Contact**4. Contract Administration Office****5. Type of Contract Action:****6. Proposed Cost and Fee**

Cost	\$94,452,415
FCCOM	\$267,576
Profit/Fee	\$10,490,822
Total	\$109,712,480

7. Government Property

Executive Business Services, Inc. will not require the use of Government property in the performance of this work.

8. Cost Accounting Standard (CAS) and Estimating & Accounting Compliance

- a) Executive Business Services, Inc. is subject to the CASB Regulations (Public Law (PL) 61-379) as amended and FAR Part 30.
- b) Executive Business Services, Inc. has submitted a CASB Disclosure Statement.
- c) Executive Business Services, Inc. CASB Disclosure Statement has been found adequate.
- d) Executive Business Services, Inc. has not been notified that we are or may be in noncompliance with CAS or CASB requirements.
- e) This proposal is consistent with our established estimating and accounting principles and procedures and FAR Part 31, Cost Principles.

9. This proposal reflects our estimates and/or actual costs as of this date and conforms with the instructions in FAR 15.403-5(b)(1) and Table 15-2. By submitting this proposal, we grant the Contracting Officer and authorized representative(s) the right to examine, at any time before award, those records, which include books, documents, accounting procedures and practices, and other data, regardless of type and form or whether such supporting information is specifically referenced or included in the proposal as the basis for pricing, that will permit an adequate evaluation of the proposed prices.

Section B Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

This report prints the cost information needed in Section B of the contract schedule. It shows the prices of supplies that will be delivered and services that will be performed, along with the specified quantity of each line item. It also includes an item's description, additional text, and unit type, if this information exists.

Before running the report, the **Section B** page of **Proposal Properties** must be set up. Although the report is designed to summarize data by *CLIN*, any valid summary field can be chosen on the **Section B** page.

The following options were used to generate the Section B Report for a new contract:

Material Reports

Assembly Library Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Assembly Library Report uses an Ad Hoc Layout to print material information for all assemblies contained in the Common and Product libraries. The report prints two levels of the assembly's structure. If the assembly has a sub-assembly, the report will print the name of the sub-assembly, but not the parts that make up the sub-assembly. The structure of the sub-assembly will be printed separately. Every Assembly Library will start a new page.

Depending on the options you select for the report, you can:

- Report the associated costs.
- Report the assemblies from a specific library.
- Limit the report to a specific selection of assemblies.
- Determine how the resources will be identified on the report.

ProPricer 9.6.101.0 Report Samples

Bill of Materials Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Bill of Materials Report uses an Ad Hoc Layout to print assembly data for a specific material library. It lists the assembly elements, and it provides detailed descriptive and cost-related data (material quantities, associated costs, etc.). The report only displays assemblies and their components. Single parts are not shown on the report.

Depending on the options you select for the report, you can:

- Report the assemblies from the Common Library.
- Report the assemblies from a specific Product Library.
- Report a specific assembly from a library.
- Report the assemblies from a specific library assigned to the proposal.
- Report the main assembly and the assembly components that occupy the second level in its hierarchy.
- Report the associated costs.
- Print the indirect elements for associated costs.
- Print a list of the consolidated parts.
- Print a list of the consolidated assemblies.
- Print just the assemblies that will be bought.

ProPricer 9.6.101.0 Report Samples

- Enter a material selection to limit the report to the materials specified in the selection.
- Determine how the resources will be identified on the report.
- Sort the report by multiple fields in ascending or descending order.

The report also offers a **Disclosure Format** option that allows you to define how the direct and indirect expenses will be shown.

If your proposal uses more than one currency, you can use the **Bid Currency** option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Notes:

The cost and associated costs of an assembly will be reported as N/A when:

- *Neither the assembly nor its constituent elements are assigned to a task.*
- *The **Total Mfg Start Qty** values of both the assembly and its components are zero.*
- *The associated costs and the cost of all the elements that constitute the structure of the assembly are reported as N/A.*

When reporting proposal-specific information, the costs and associated costs of an assembly's elements will be reported as N/A when:

- *The assembly element is not assigned to a task.*
- *The **Total Mfg Start Qty** of the material is zero.*
- *The **Ovrd** checkbox for the parent structure is selected.*

When printing a list of consolidated parts, the cost of a part will be reported as N/A if its cost is N/A in all materials in which the part is a component.

Proprietary Information

Comparison Bill of Materials Structure Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Comparison Bill of Materials Structure Report lets you select an assembly and see how its structure differs between a proposal and a library. This can help pinpoint the parts and quantities that were changed in the bill of materials after it was added to a proposal.

The report shows material names and quantities, and it indents lower-level assembly components to reflect their hierarchical positions.

Depending on the options you select for the report, you can:

- Print the deltas in a separate column.
- Indicate differences with a red highlight.
- Print material descriptions in a separate column.
- Shows if materials are categorized as Make or Buy in a separate column.

The following options were used to generate the Comparison Bill of Materials Structure Report:

Proprietary Information							

Comparison Proposal Bill of Materials Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

This report shows how an assembly's costs differ between multiple proposals. Since the report compares material costs and does not focus on the bill of materials hierarchy, the assembly's structure can be different in any proposal.

To correctly compare the bill of materials, all proposals in the report need a task with the same name and assembly. In the task, make sure every proposal has the same data in the Material ID, Library, and Assembly/Part columns.

Depending on the options you select for the report, you can:

- Print the deltas in a separate column.
- Indicate differences with a red highlight.
- Print a list of the consolidated parts or assemblies.
- Print the associated costs of parts or assemblies.
- Print the descriptions of parts and assemblies.
- Print a list of the assemblies that will be bought.
- Print only the first level of assemblies.
- Enter a task and/or material selection to limit the report to specific tasks and/or materials.

Material Ad Hoc Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Material Ad Hoc Report provides ad hoc flexibility to print details about the material assignments in a specific proposal. You can base the report on a single summary element, or use two to create a crosscut of the materials. You also can run the report without a summary element.

If you choose:

- None - the report will print all task assignments in the proposal on a single page.
- Summary Field or Task ID - the report will print a separate page for every task or summary field entry.
- Material Summary Element - the report will print a separate page for every Summary element.
- Both - the report will print a separate page for every cross-section of the two summary elements.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Enter a task and/or material selection to limit the report to specific tasks and/or materials.
- Print a list of the consolidated parts or assemblies.
- Print a list of the assemblies that will be bought.
- Print the associated costs of parts or assemblies.

ProPricer 9.6.101.0 Report Samples

- Print the indirect elements for associated costs.
- Print only the first level of assemblies.
- Sort the report by multiple fields in ascending or descending order.

The report also offers a Disclosure Format option that allows you to define how the direct and indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

The following options were used to generate the Material Ad Hoc Report:

Material Cost Ad Hoc Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Material Cost Ad Hoc Report provides ad hoc flexibility to print all quotations, purchase orders, and miscellaneous sources of cost. The report displays part/assembly information, order information, vendor information, and purchase details by part/assembly.

Depending on the options you select for the report, you can:

- Print only the cost sources of the parts/assemblies used in the proposal.
- Indicate which cost source was used with the proposal.
- Print the cost sources of the parts/assemblies from a specific library.
- Enter a material selection to limit the report to the materials specified in the selection.

Material Detail Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Material Detail Report prints a structured list of the assemblies in a proposal, similar to the Bill of Materials Report. However, the Material Detail Report also prints cost data for the resources used throughout the assemblies, including associated costs. It shows the details of assembly elements crossed with the unit and extended costs of the resources.

Depending on the options you select for the report, you can:

- Print the unit and extended costs of materials that do not have resources assigned to them.
- Enter a material selection to limit the report to the materials specified in the selection.

The following options were used to generate the Material Detail Report:

Content Options

- Print Extended Costs: No
- Print Empty Resources: No

Material Distribution Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Material Estimator Edition

The Material Distribution Summary Report shows a proposal's material assignments in the timescale you select. The report uses an ad hoc layout, so you can choose what to include in it.

Depending on the options you select for the report, you can:

- Print monthly, quarterly, or annual data, or print the report with no timescale.
- Report a fiscal year that is different than the proposal's fiscal year.
- Enter a material selection to limit the report to specific materials.

The report also offers a Disclosure Format option that allows you to define how the direct and indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Audit Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Audit Report checks your proposal for missing or overridden data that may lead to inaccurate pricing results. The report shows:

- Resources that are missing direct, T&M, composite, or scheduled rates.
- Indirect elements that are missing indirect rates.
- Overridden indirect rates and overriding profit/fee rates.
- Trips that are missing distribution data.
- Tasks to which a trip has been assigned that do not have a resource with resource type *Labor* assigned to them.
- Overridden travel rates.
- Differences between the result and the spread amount on the **Formulas** tab.
- Current rate tables that are not assigned to the proposal.
- Proposal CERs that are defined but disabled in **Proposal Properties**.
- Data from a BOE Pro proposal that has been modified in ProPricer Contractor Edition Enterprise.

Depending on the options you select for the report, you can also:

- Include discontinued indirect rates in the audit for missing indirect rates.
- Enter start and end dates to limit the report to a specific period of performance.

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

ProPricer 9.6.101.0 Report Samples

CER Factor Library Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The CER Factor Library Report prints a list of the CER factors in the CER Factor Library. The report is not proposal-specific, because the same CER factor can be used in various proposals. However, the report has a **Reconcile with Proposal** option that prints just the CER factors used in the current proposal.

The report incorporates an Ad Hoc Layout, so you can select which items to print. It also uses Group Sorting to organize how the information is displayed.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the CER Factor Library Report:

Proposal Log Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Proposal Log Report prints general information for all proposals in the system or any combination of proposals that you select. The information includes the name of the proposal, proposal number, manager, customer number, contract type, start/end dates, rate tables, and notes. Depending on the report options you select, you can also print the names of any Title Tables assigned to the summary elements of the proposals, and you can print cost information for the proposals.

Note: ProPricer keeps track of proposal changes at the system level in the Change Log.

If you attached files to the **Notes** page in the **Proposal** folder of **Proposal Properties**, you can include the name of the attachment in the report, as well as print the contents of the attachment. To print the contents, select the **Print to Word** option, and then select the **Print Attachments** checkbox. Any text entered on the **Notes** page will print before the contents of the attachments. The attachments will print in the order in which they appear on the page.

- ProPricer will print an icon for any attachment that is not recognized as containing text or pictures.
- Valid file name extensions include: .txt, .doc, docx, .rtf, xls, .xlsx, .xlw, and .html. If using an HTML file, be sure to include any pictures referenced in the file.
- Valid images formats include: JPG, BMP, WMF, PNG, and GIF.

The following options were used to generate the Proposal Log Report:

Content Options

- Print Title Tables: Yes
- Print Proposal Notes Text: No
- Print Proposal Notes Attachment File Names: No

Termination Liability Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Termination Liability Report prints a monthly, quarterly, or an annual schedule of payments that will be due in the event of early contract cancellation. It displays a proposal's labor and non-labor costs separately, and non-labor costs can be further broken down by resource type.

The report also uses an Ad Hoc Layout, so you can choose which items to include in it.

Depending on the options you select for the report, you can:

- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print cumulative values.
- Print the descriptions of the summary elements.
- Offset the costs by any number of months within the proposal's period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Enter start/end dates to limit the report to a specific period of performance.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

The following options were used to generate the Termination Liability Report:

Content Options

- Summary Field: WBS
- Report Level Mask: 0
- Roll-Up Step Size: 0
- Hierarchical Mask/Roll-Up: No
- Perform Roll-Up: No
- Use Bid Currency: No

Title Table Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Title Table Report prints a list of the elements in a Title Table. Child elements are indented to show the hierarchical structure of the table.

Depending on the options you select for the report, you can:

- Print the names of parent elements.
- Print the element descriptions.
- Run the report on a summary field that uses a Title Table in the currently selected proposal.
- Print only the elements from specific hierarchical levels.

The following options were used to generate the Title Table Report:

Content Options

- Include Parent: No
- Print Descriptions: Yes
- Print SOW/BOE Text: N/A

User Profile Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The User Profile Report prints a list of the users registered in the system. The information includes the name they use to log in, the type of login they use, the number of times they've logged in, the date of the last log in, and the role assigned to the user. The profiles are listed in alphanumeric order.

Depending on the options you select for the report, you can:

- Print the Access Rights granted to the users.
- Run the report for a specific user.

Direct Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Direct Rate Report prints resource rates from a specific Direct Rate Table. Since Composite and T&M Rate Tables contain direct resource rates, ProPricer recognizes them as Direct Rate Tables and allows you to run the Direct Rate Report for them. However, you will see only the resulting rates. You will not see the rate structure, nor the constituent resources that comprise the rates. The report does not show resources with zero flat rates.

Here are a few things you can do with the options in this report:

- Run the report for the current proposal.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print rate information by month, quarter, or year.
- Print rate information for a specific year, or range of years.
- Print rate information for a specific resource.
- Print only the overriding direct rates.

Exchange Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Exchange Rate Report prints the exchange rates from a specific Exchange Rate Table. The exchange rates are listed in tabular format by currency and period (month, quarter, or year) if a timescale was entered for the table.

Depending on the options you select for the report, you can:

- Run the report for the current proposal.
- Print rate information for a specific year, or range of years.
- Print the inverse exchange rates.
- Print only the overriding exchange rates.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the Exchange Rate Report:

Filter Options

- Reconcile with Proposal: No
- Print Overrides Only: N/A because we did not reconcile with the proposal.
- Exchange Rate Table: Tank Exchange Rates
- Print Inverse Rates: Yes
- Start Year: N/A since our table does not have a timescale.
- End Year: N/A since our table does not have a timescale.

Format Options

Exchange Rate Report

Date: 12/20/2013

Time: 8:59:42 AM

Page: 1

Exchange Rate Table: Tank Exchange Rates

Base Currency: USD

Exchange Rates (Based on USD)								
Currency	USD	AUD	CAD	CNY	EUR	GBP	JPY	MXN
USD - US Dollar	1.000000	1.097635	1.061402	6.092360	0.735694	0.610836	102.459016	13.109596
AUD - Australian Dollar	0.911050	1.000000	0.966990	5.550445	0.670254	0.556502	93.345287	11.943498
CAD - Canadian Dollar	0.942150	1.034136	1.000000	5.739917	0.693134	0.575499	96.531762	12.351206
CNY - Chinese Yuan	0.164140	0.180166	0.174219	1.000000	0.120757	0.100263	16.817623	2.151809
EUR - Euro	1.359260	1.491971	1.442721	8.281101	1.000000	0.830285	139.268443	17.819350
GBP - Pound Sterling	1.637100	1.796938	1.737621	9.973803	1.204405	1.000000	167.735656	21.461720
JPY - Yen	0.009760	0.010713	0.010359	0.059461	0.007180	0.005962	1.000000	0.127950
MXN - Mexican Peso	0.076280	0.083728	0.080964	0.464725	0.056119	0.046595	7.815574	1.000000

The number of units of the base currency one unit of the foreign currency will buy.

The inverse rates show the number of units of the foreign currency one unit of the base currency will buy.

The report also shows the rates of exchange for all the currencies. For example: One JPY equals:

0.010713 AUD
 0.010359 CAD
 0.059461 CNY
 0.007180 EUR
 0.005962 GBP
 0.127950 MXN

Indirect Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Indirect Rate Report prints the rates of the indirect pools in a specific Indirect Rate Table. The report lists the indirect pools in alphanumeric order. The indirect rates are listed in tabular format, by pool and period (month, quarter, or year depending on the timescale of the table selected).

Depending on the options you select for the report, you can:

- Run the report for the current proposal.
- Print rate information for a specific year or range of years.
- Print rate information for a specific indirect pool.
- Print only the overriding indirect rates.

The following options were used to generate the Indirect Rate Report:

Content Options

- Print Effective Date: No

Proposal Rate Buildup Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Proposal Rate Buildup Report prints the buildup of the rates of the resources in the proposal. The buildup of the rate of each resource is shown on a single line.

Note: *To run this report, you must have Access Rights to the Show Direct Cost and Show Indirect Cost permissions. If the proposal is locked, access must be granted to those permissions in the Locked Proposal Rights.*

The report incorporates an Ad Hoc Layout, which allows you to select the items you want to include in it.

Depending on the options you select for the report, you can:

- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Report a fiscal year that is different than the proposal's fiscal year.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the Proposal Rate Buildup Report:

Content Options

Rate Buildup Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Rate Buildup Report prints the buildup of the rates of the resources in a Direct, Composite, or T&M Rate Table. It displays this data on an annual, quarterly, or monthly basis. The resources' rate buildup within each period is shown on a single line.

The report incorporates an Ad Hoc Layout, which allows you to select the items you want to include in it. It also uses Group Sorting, so you can control how the data in the report is organized.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print a rate buildup using only the resources and rates from the proposal selected in the Navigation Pane.
- Print a rate buildup for a single resource.
- Enter start/end years to limit the report to a specific period of performance.

ProPricer 9.6.101.0 Report Samples

Rate Card Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

The Rate Card Report prints all the resource and labor category information from the proposal's Rate Card. The rates and cost details are broken down by period, and labor categories are further broken down by their bases.

Depending on the options you select for the report, you can:

- Select which indirect elements to print.
- Print Rate Card information for a specific range of dates.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the Rate Card report:

Content Options

- Indirect Elements to Print:
 - Health and Welfare
 - FICA
 - FUTA
 - Total Cost
 - Total Price

Scheduled Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Scheduled Rate Report prints monthly scheduled rate details for a Scheduled Rate Table. The scheduled rates are shown in alphanumeric order. The rate details are shown by month and calendar year.

Depending on the options you select for the report, you can:

- Run the report for the current proposal.
- Print rate information for a specific year, or range of years.
- Print rate information for a specific scheduled rate.
- Print only the overriding scheduled rates.

The following options were used to generate the Scheduled Rate Report:

Travel Rate Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Travel Rate Report prints the travel expenses from a Travel Rate Table. The report incorporates an Ad Hoc Layout, which allows you to select the items you want to include in it.

Depending on the options you select for the report, you can:

- Run the report for the current proposal.
- Print rate information for a single destination.
- Print only the overriding rates.

The destinations are presented in a list arranged in alphanumeric order. The rates are shown in columns by Travel Expense.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the Travel Rate Report:

Content Options

- Resource Display: Default
- Fields included in the Ad Hoc Layout:
 - Destination
 - Resource
 - Airfare Rate
 - Per Diem Rate
 - Rental Car Rate
 - Mileage Rate
 - Hotel Rate
 - Miscellaneous Rate

Work Schedule Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

The Work Schedule Report prints the details of each accounting calendar used in a specific Work Schedule Table. This includes data entered for rate modifiers and working hours. The report is not proposal-specific because the same Work Schedule Table can be used in various proposals. However, the report has a **Reconcile with Proposal** option that allows you to print the details of just the calendars used in the current proposal.

Depending on the options you select for the report, you can:

- Run the report for the current proposal selected in the Navigation Pane.
- Run the report for all accounting calendars in a Work Schedule Table.
- Print information for a specific accounting calendar.
- Print information for a specific year or range of years.

Summary Reports

Annual Cost Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Annual Cost Summary Report prints summarized costs for a single summary element or a combination of two summary elements, timephased by year. Each year of the reporting period is displayed in a separate column on the report. The summary field entries are printed on a single page or more depending on the volume of the report. If a summary element is not used in some years, the report prints zeroes for the respective expenses for those years. The report displays a total in the far right column for each combination of summary elements and a total at the bottom for each year.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the descriptions of the summary elements.
- Print the resources and descriptions.
- Enter start/end dates to limit the report to a specific period of performance.

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Detail Resource Rate Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Detail Resource Rate Summary Report prints resource cost data by hourly rate within a fiscal year. It shows hours, rates, direct costs, and indirect expenses per resource. The hours and cost details are summarized for each fiscal year and for the proposal's entire period of performance.

Note: *To run this report, you must have Access Rights to the Show Direct Cost and Show Indirect Cost permissions. If the proposal is locked, access must be granted to those permissions in the Locked Proposal Rights.*

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Summarize the data based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Element Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Element Matrix Report prints a crosscut of task input and cost information for the current proposal. The report is based on two summary elements. The information is presented in a rectangular array in which rows display the entries from the first summary element and columns, from the second. The array is divided into two parts. The upper part shows input and direct cost plus some indirect expenses, depending on the disclosure format selected. The lower part shows only indirect expenses.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Elements of Cost Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Elements of Cost Report summarizes the labor input data and direct cost details of a proposal, and it shows an analysis of the related indirect costs. The input and direct cost information is broken down into three types: Labor, Material, and Other. The Labor data is presented in the columns: Hours and Cost. Other includes Travel, Subcontractor, and Other. There is a separate column for every type, and the data from all columns is summed up in a Subtotal column. The percentages that appear on the right side of the report indicate the share of each entry in the overall price of the proposal.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Fiscal Year Summary Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

The Fiscal Year Summary Report prints summarized input and cost details for every fiscal year in your proposal. These details are displayed in a separate column for each fiscal year, and all years are summed in a column named **Total FY**. The input and direct cost information are broken down by resource types, and the indirect cost information is presented in the lower portion of the report.

The report also prints percentages along the right side and at the bottom of the report that provide the mix of priced elements (for example, labor hours, labor expenses, material), as they relate to the overall price of the proposal, as well as the funding requirements.

Depending on the options you select, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Cost Level option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Resource Element Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Resource Element Matrix Report prints resource input and cost information for every resource used in the current proposal. You can summarize the costs for a single summary element or a combination of two summary elements.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Print the descriptions of the summary elements.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Resource Summary Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Government Edition](#)

The Resource Summary Report prints the monthly input for every resource used in the current proposal. The information is presented by fiscal year with subtotals for each month and a yearly total.

The report is generated for a specific summary element, which allows you to view the resource input from different angles. Every new summary element will start a new page.

If there is no resource input for a specific month, the report will display zeros.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Report a fiscal year that is different than the proposal's fiscal year.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

Scheduled Rate Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Scheduled Rate Summary Report prints the proposal's scheduled rate and discounted rate information by fiscal year and summary element. It combines a summary format with ad hoc flexibility.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary field selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Report a fiscal year that is different than the proposal's fiscal year.
- Report a separate rate period if it differs from the fiscal year period.
- Show the discount at the bottom line.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Proprietary Information

Summary Element Detail Report

The Summary Element Detail Report prints resource input and cost information for a specific summary element from a proposal.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print SOW and BOE text.
- Print formulas and justification text and files entered on the **Formulas** tab.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Determine how the resources will be identified on the report.
- Select the summary fields you want to print.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print resource hours as equivalent heads.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If you attached files to the **SOW** and/or **BOE** tabs, you can include the name of the attachment in the report, as well as print the contents of the attachment. To print the contents, select the **Print to Word** option, and then select the **Print Attachments** checkbox. Any text entered on the

SOW or **BOE** tabs will print before the contents of the attachments. The attachments will print in the order in which they appear on the respective tab.

Notes:

- *ProPricer will print an icon for any attachment that is not recognized as containing text or pictures.*
- *Valid file name extensions include: .txt, .doc, docx, .rtf, xls, .xlsx, .xlw and .html. If using an HTML file, be sure to include any pictures referenced in the file.*
- *Valid images formats include: JPG, BMP, WMF, PNG and GIF.*

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Bid Cost Worksheet Report

The Bid Cost Worksheet Report is a proposal-specific report that prints cost information for the tasks, based on a summary element. The report is useful for contract negotiations, and for the transition of an awarded contract from the proposal stage to the project management stage.

Summary element entries are reported in alphanumeric order, and every task or summary field entry is displayed on a separate page. The report is generally based on one of the following:

- Task ID. The report lists the task's name, description, duration, and summary fields; SOW and BOE texts; and input and cost information for each resource. Each task is reported on a separate page.
- Summary Field. The report lists the summary field's entry, description, duration, resource input information, and cost information. One page of the report may show data from a single task, but it may also include data from various tasks sharing the specified summary field entry.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print the descriptions of the resources.
- Print a Work Authorization space.
- Print the text entered on the SOW and/or BOE tabs.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Select the summary fields you want to print.

- Enter start and/or end dates to limit the report to a specific time period.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

If you attached files to the SOW and/or BOE tabs, you can include the name of the attachment in the report, as well as print the contents of the attachment. To print the contents, select the **Print to Word** option, and then select the **Print Attachments** checkbox. Any text entered on the **SOW** or **BOE** tabs will print before the contents of the attachments. The attachments will print in the order in which they appear on the respective tab.

Notes:

- *ProPricer will print an icon for any attachment that is not recognized as containing text or pictures.*
- *Valid file name extensions include: .txt, .doc, docx, .rtf, xls, .xlsx, .xlw and .html. If using an HTML file, be sure to include any pictures referenced in the file.*
- *Valid images formats include: JPG, BMP, WMF, PNG, and GIF.*

Statement of Work:			
Your Statement of Work (SOW) should specify in clear, understandable terms the work to be done in developing or producing the goods or services to be delivered or performed in the task. The SOW is written to contain "what is to be done" in definitive and precise language and terminology. The purpose of a SOW is to detail the work requirements for a task that has deliverables and/or services performed.

CER Data Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

[Government Edition](#)

The CER Data Report prints base and derivative resource data of the Cost Estimating Relationships used in a proposal. The data is summarized by summary field and timephased by year, quarter, or month.

The report incorporates an Ad Hoc Layout for the base resources, which allows you to select the items you want to include in it.

Depending on the options you select for the report, you can:

- Report a fiscal year that is different than the proposal's fiscal year.
- Print the description of the summary field.
- Print the description of the CER.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the name of the rate band entered for the derivative resources in the Direct Rate Table.
- Print the name of the indirect pool entered for the derivative resources.
- Print the currency entered for the derivative resources whose rate type is *Cost*.
- Sort the data by CER factor.
- Enter start/end dates to limit the report to a specific period of performance.

ProPricer 9.6.101.0 Report Samples

- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The following options were used to generate the CER Data Report:

Proposal CER Factors Report

This report is only available in the following editions of ProPricer™

[Contractor Edition Enterprise](#)

[Contractor Edition Essentials](#)

[Government Edition](#)

The Proposal CER Factors Report prints the CER factors used in the proposal. Factors can be categorized by multiple summary fields and by timescale in a column matrix format.

This report is designed to help you perform a comprehensive CER factor analysis of your proposal.

Depending on the options you select for the report, you can:

- Print monthly, quarterly, or annual data.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print the descriptions of the summary fields.
- Enter a task selection to limit the report to specific tasks.
- Enter start/end dates to limit the report to a specific period of performance.

The following options were used to generate the Proposal CER Factors Report:

Resource Allocation Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Resource Allocation Report is a proposal-specific report that prints information about the allocated resources.

Depending on the options you select for the report, you can:

- Print details of the distribution.
- Report a fiscal year that is different than the proposal's fiscal year.
- Print the description of the summary field.
- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

The following options were used to generate the Resource Allocation Report:

Summary Equivalent Head Distribution Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Summary Equivalent Head Distribution Report prints the distribution of the resources used in the current proposal with Rate Type *Hours* in equivalent heads. The report is generated for a specific summary field, which allows you to review the proposal from many different angles.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select, you can:

- Summarize the report, based on the hierarchy defined in the Title Table associated with the summary field selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

Task Cost Summary Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Task Cost Summary Report prints cost information for the resources assigned to the tasks of the current proposal. Since it shows the task cost formation, it provides detailed proposal visibility at the resource level, which is useful for auditing and fact finding. The report is generated for a specific summary element, which allows you to review the proposal from many different angles.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select, you can:

- Print the average rates of the resources and descriptions.
- Summarize the report, based on the hierarchy defined in the Title Table associated with the summary element selected.
- Summarize the data with the Report Level Mask and Roll Up options.
- Select the summary fields you want to print.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Print a Summary Page.

The report offers Disclosure Format and Cost Level options that provide various possibilities for disclosing direct and indirect expenses.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Task Detail Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Task Detail Report summarizes the direct cost and total price of each task in a proposal, and it shows an analysis of the related indirect costs. Labor costs and material costs are printed separately, and both are further broken down by resource class. Resource input data from the Resources tab and the Activities tab is also shown in this report.

The material information displayed in the Task Detail Report includes the full hierarchical structure of assemblies. The components are printed by level with descriptive and cost-related data, such as vendor name, quantity, unit cost, etc.

Note: *This is a resource-driven report, so it only prints materials that generate cost.*

Depending on the options you select for the report, you can:

- Print summary field information related to the task.
- Print Task Notes information.
- Print materials and their associated costs.
- Print cost details of resources in specific classes with the Labor Indicator and Material Indicator options.
- Report a fiscal year that is different than the proposal's fiscal year.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.
- Enter start/end dates to limit the report to a specific period of performance.

ProPricer 9.6.101.0 Report Samples

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Statement of Work: Your Statement of Work (SOW) should specify in clear, understandable terms the work to be done in developing or producing the goods or services to be delivered or performed in the task. The SOW is written to contain "what is to be done" in definitive and precise language and terminology. The purpose of a SOW is to detail the work requirements for a task that has deliverables and/or services performed.

Timephased Task Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

The Timephased Task Report prints the monthly resource cost spread for all tasks in the current proposal. The report incorporates an Ad Hoc Layout, which allows you to select the items you want to include in it.

The report also uses a Resource Table. Resource Tables allow you to define the layout and format of the task resources. You can use a System Resource Table or create your own.

Depending on the options you select for the report, you can:

- Print just a Total Cost Summary page per task. No resource data will be shown.
- Print the descriptions of the resources.
- Enter start/end dates to limit the report to a specific period of performance.
- Enter a task and/or resource selection to limit the report to the tasks and/or resources specified in the selection.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal. The Bid Level option allows you to choose the level at which the costs will be converted.

Travel Reports

Detail Group Travel Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Estimator Edition

Material Estimator Edition

The Detail Group Travel Report prints rates and costs for all trips in the proposal, based on a specific summary element. Each trip is reported separately, and thin lines divide the trips that are in the same summarized group. New groups of trips begin on new pages.

Depending on the options you select, you can:

- Summarize the data, based on the hierarchy defined in the Title Table assigned to the summary element selected.
- Summarize the data with the Report Level Mask and Roll-Up options.
- Print the Travel Settings.
- Determine how the resources will be identified on the report.
- Enter a task selection to limit the report to the tasks specified in the selection.
- Enter start and/or end dates to limit the report to a specific time period.

The report also offers a Disclosure Format option that allows you to define how the indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Summary Travel Report

The Summary Travel Report prints trip details for all tasks in the current proposal, and you can specify how to group the trips. The report incorporates an Ad Hoc Layout which allows you to select the fields included in it.

Depending on the options you select, you can:

- Print the Travel Settings.
- Enter a task selection to limit the report to the tasks specified in the selection.
- Enter start and/or end dates to limit the report to a specific time period.
- Sort the report by multiple fields in ascending or descending order.
- Print descriptions and comments.
- Print trip resources.
- Print resource fields.
- Print travel expense data (quantities, rates, costs, and resources).

The report also offers a Disclosure Format option that allows you to define how the direct and indirect expenses will be shown.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Travel Distribution Matrix Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Government Edition

Estimator Edition

Material Estimator Edition

The Travel Distribution Matrix Report prints the distribution of all trips per task in the current proposal. The trip information is divided into three parts. The upper part displays trip cost data. This information will often be the same as the general cost information entered for the respective destination. Trip rates, however, can be entered independently of destination rates or modified, so often times the specific trip costs and the destination costs will differ. The second part shows the distribution of trips across the entire duration of the task in a calendar-like format. The last part shows the total cost for the particular trip in the particular task.

Depending on the options you select, you can:

- Print the Travel Settings.
- Select the summary fields you want to print.
- Enter a task selection to limit the report to the tasks specified in the selection.
- Enter start and/or end dates to limit the report to a specific time period.

If your proposal uses more than one currency, you can use the Bid Currency option to convert the calculated costs to any currency contained in the Exchange Rate Table assigned to the proposal.

Travel Library Report

This report is only available in the following editions of ProPricer™

Contractor Edition Enterprise

Contractor Edition Essentials

Government Edition

The Travel Library Report prints the destinations from the Travel Library. The report is not proposal specific. However, you can print just the destinations used in the proposal.

The report incorporates an Ad Hoc Layout, so you can select which items to print. It also uses Group Sorting to organize how the information is displayed.

ProPricer 9.6.101.0 Report Samples

The following options were used to generate the Travel Library Report:
