Overview

Welcome to the Deltek Maconomy iAccess 2.0.1 Release Notes.

These release notes contain a summary of the following:

- Pre-Installation Information
- Enhancements
- Software Issues Resolved
- Known Issues

iAccess 2.0.1 is a limited availability release.

Pre-Installation Information

Please review the contents of this section before you install Maconomy iAccess 2.0.1.

Prerequisites

See the *Deltek Maconomy iAccess 2.0.1 Installation Guide* for the list of prerequisites to installing iAccess.

Supported Products

Supported Maconomy Versions

This version of iAccess supports the following Maconomy version:

- Maconomy 2.3 GA
- Maconomy 2.4 LA1

Compatibility Matrix

Information about platform requirements (as well as supported Maconomy versions) is maintained in the *Deltek Product Support Compatibility Matrix*, located on the Deltek Customer Care Connect Site. In the Matrix, search on “Maconomy iAccess” to quickly navigate to the information you need.

Internal Link

<http://home.deltek.com/sites/products/Documents/DeltekProductSupportCompatibilityMatrix.pdf>

https://deltek.custhelp.com/app/answers/detail/a_id/38499

Documentation

In addition to these Release Notes, the Maconomy iAccess 2.0.1 release contains the following documentation:

- Online help (accessed through the application)
- Deltek Maconomy iAccess Installation Guide

Locating Documentation Online

Internal Link — Sharepoint

All documentation is available internally on SharePoint (drill down by product and version):

<https://home.deltek.com/sites/products/Maconomy/Documents/Forms/AllItems.aspx>

External Link — DSM

<https://dsm.deltek.com/documentationlists/DeltekMaconomy23GA.html>

iAccess 2.0.1 documentation can also be downloaded from DSM as part of Maconomy version 2.4 LA1.

Enhancements

The following features/enhancements are added for iAccess 2.0.1:

- Support for SSO with Microsoft Azure

Support for SSO with Microsoft Azure

Tracking Numbers: 603091

Azure Active Directory Single Sign-On (SSO) allows you to integrate Maconomy applications so users are synchronized between Azure and Maconomy. As a result, you are able to use one login to access multiple applications. iAccess 2.0.1 supports Azure Active Directory integration. To learn more about configuring Maconomy applications for Azure Active Directory SSO, see the *Microsoft Azure Single Sign-On (SSO) for Maconomy* guide in DSM.

This feature requires [Maconomy 2.4 LA1](#).

Software Issues Resolved

iAccess

Shell: Blank Fields on Initial Login

Defect: 775789

Browsers: IE11, Chrome, Safari, and Firefox

Description: Users logging in for the first time could see blank input fields, even though no error occurred. This issue happened intermittently.

Customers Impacted: Affects all clients.

Workaround Before Fix: Refresh the browser page.

Shell: Menu and Navigation Bar Reloading

Defect: 778666

Browsers: IE11, Chrome, Safari, and Firefox

Description: When clicking notifications or using filter navigation, the menu and navigation bar elements would reload and cause a slight delay.

This error is now corrected. When you click a notification or use filter navigation, iAccess loads the relevant record.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Error When Cancelling Allowance/Absence Requests

Defect: 778676

Browsers: IE11, Chrome, Safari, and Firefox

Description: When you cancelled allowance and absence requests, iAccess displayed warning messages in some of the request fields.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Menu Reloads During Arrow Navigation

Defect: 779244

Browsers: IE11, Chrome, Safari, and Firefox

Description: When you used arrow navigation for the calendar widget, the menu would reload when you clicked either the left or right arrow.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Table Actions Shown on All Lines

Defect: 777011

Browsers: IE11, Chrome, Safari, and Firefox

Description: Users could see actions displayed on all lines, not just on the currently selected line or on a line over which they hovered the pointer.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Description Field Shown for Read-Only Days in Split Weeks

Defect: 776990

Browsers: IE11, Chrome, Safari, and Firefox

Description: In split weeks, you could still view and edit the daily **Description** fields for read-only days. This occurred in both weekly and daily time sheets.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Continuous Scrolling Not Working

Defect: 763220

Browsers: IE11, Chrome, Safari, and Firefox

Description: The continuous scrolling feature did not work for search filters. You could only view the first 25 results.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: Narrow down your specified criteria in the filter.

Continuous Scrolling Not Working in Advanced Search

Defect: 780004

Browsers: IE11, Chrome, Safari, and Firefox

Description: The continuous scrolling feature did not work for Advanced Search. You could only view the first 25 results.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: Narrow down your specified criteria in the advanced search restriction fields.

Expense/Mileage/Daily Timesheet Table Fields

Defect: 779957

Browsers: IE11, Chrome, Safari, and Firefox

Description: In expense/mileage/daily timesheets, hovering the pointer over some column names in the table part displayed the wrong name.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Valid Till Date Not Displayed on Approved Allowance Requests

Defect: 778678

Browsers: IE11, Chrome, Safari, and Firefox

Description: On approved allowance requests, iAccess did not display the value for the **Valid Till Date** field.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Calendar Widget: Top Week Link Not Working

Defect: 778100

Browsers: IE11, Chrome, Safari, and Firefox

Description: Clicking week 52 in the calendar widget would bring you to November of the previous year, instead of December.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

Error When Resubmitting a Reopened Expense Sheet

Defect: 777810

Browsers: IE11, Chrome, Safari, and Firefox

Description: When you edited the Justification fields in a reopened expense sheet and resubmitted it, iAccess displayed the following error message: "Data was changed by another user."

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: Reload the page, then resubmit.

Page Reloads After URL Change

Defect: 777423

Browsers: IE11, Chrome, Safari, and Firefox

Description: When you select a record from the search filter, iAccess displayed that record and updated the page URL. If you then selected a different record from your notifications, iAccess reloaded the entire page instead of simply displaying the newly selected record. This occurred in all workspaces with search filters.

This is now fixed.

Customers Impacted: Affects all clients.

Workaround Before Fix: N/A

IE: Search-As-You-Type Fields Blank on Selected Time Sheet Line

Defect: 783402

Browsers: IE11

Description: In both weekly and daily time sheets, selecting a line caused the values of the **Favorite**, **Job No.**, and **Job Name** fields to disappear.

This error is now corrected.

Customers Impacted: All clients using Internet Explorer

Workaround Before Fix: Right-click a blank field to view its contents.

Known Issues

Tablet Support

Safari on iPad: Viewing BPM Reports is Not Supported

Defect: N/A

Browsers: Safari, Chrome

Description: You cannot view BPM Reports on any browser if you are using an iPad. This is a limitation of the BusinessObjects software used for reports.

Customers Impacted: Affects all clients using iPads.

Workaround Before Fix: Utilize other ways of viewing BO reports on a tablet: either through the Mobile BI app, or through emails with PDFs of reports attached to them.

iAccess

BPM Reports: No Session Expired Validation

Defect: 760872

Browsers: IE11, Chrome, Safari, and Firefox

Description: When the BPM server times out, iAccess cannot renew the session.

Customers Impacted: Affects all customers using BPM.

Workaround Before Fix: Log out of iAccess, refresh the page, and log in again.

Notifications: Links to Absence-Related Items Do Not Navigate to the Correct Data

Defect: 775728

Browsers: IE11, Chrome, Safari, and Firefox

Description: Clicking To-Dos related to the Absence Management Workspaces does not open the relevant records. The action only takes the users to the workspace.

Customers Impacted: Affects all clients.

Workaround Before Fix: Navigate manually to the record mentioned in the To-Do.

Notifications: Page Reloads When Opening an Item from Notifications

Defect: 775730

Browsers: IE11, Chrome, Safari, and Firefox

Description: When you open a Notification, the browser automatically reloads. This happens for all notifications, except those for time sheets.

Customers Impacted: Affects all clients.

Workaround Before Fix: None

iAccess Automatically Sends New Token

Defect: 751817

Browsers: IE11, Chrome, Safari, and Firefox

Description: When the user enters an incorrect token during the reset password process, iAccess automatically sends out a new token.

Customers Impacted: Affects all clients.

Workaround Before Fix: None

Popup Fields Are Not Searchable in Advanced Search

Defect: 763239

Browsers: IE11, Chrome, Safari, and Firefox

Description: When using the Advanced Search capability, you cannot make restrictions based on popup fields.

Customers Impacted: Affects all clients.

Workaround Before Fix: None.

Info Bubbles Are Missing

Defect: 766239

Browsers: IE11, Chrome, Safari, and Firefox

Description: The info bubbles from iAccess 1.0 are not yet available in iAccess 2.0.

Customers Impacted: Affects all clients.

Workaround Before Fix: If you need to view the information usually available in the info bubbles, you can add a pane with the fields you require to the normal layout.

User Roles: Last Visited Workspace Exclusive to a User Type Can Be Viewed by Other User Types

Defect: 770789

Browsers: IE11, Chrome, Safari, and Firefox

Description: Since iAccess remembers the last workspace visited by a user, it can sometimes display that workspace when the user logs in again with a different user type. However, the user will not be able to view the data exclusive to the previous user type.

Customers Impacted: Affects all clients.

Workaround Before Fix: None.

BPMReportView: Session Timeout When Opening a Report for Users Not Configured in BPM/BO

Defect: 772372

Browsers: IE11, Chrome, Safari, and Firefox

Description: When a user not set up in BPM tries to open a report, iAccess displays a Session Expired warning message. This is not the correct error message for the situation.

Customers Impacted: Affects all clients.

Workaround Before Fix: Use role-based access to hide the Reports workspace from users that are not set up in BPM.

Purchase Order: Include Vendor Name in Find Vendor

Defect: 779720

Browsers: IE11, Chrome, Safari, and Firefox

Description: The Vendor Name is not displayed in the drop-down list for the **Vendor No.** field. Only the vendor numbers are listed.

Customers Impacted: Affects all clients.

Workaround Before Fix: When creating or editing a PO, know the vendor number of the vendor you need to specify.
