Deltek Maconomy® 2.6.4 CU 2

Cumulative Update Release Notes

February 28, 2025

Contents

Support Updates

The following updates are announced for Maconomy 2.6.4.

Update	Date	Description
BO 4.3 SP4 Patch 7	01/31/2025	From 2.6.4 CU 1, Business Object 4.3 SP4 Patch 7 is certified for Maconomy and BPM.

Overview

The Maconomy 2.6.4 Cumulative Update (CU) 2 release includes all the software issues resolved and enhancements that were made in this version.

Custom Programs Affected

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application areas affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

Download the Cumulative Update

1. From Internet Explorer, go to https://dsm.deltek.com.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Cumulative Updates folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

Check Whether or not the Cumulative Update Is Installed

To check that the update is installed, complete the following steps:

1. On the Maconomy toolbar, click **Help » About**.
2. On the About Deltek Maconomy dialog box, click the **Details** button.

Technical Considerations

Statutory Updates

For further information on Statutory installation and updates, see the **Deltek Maconomy BPM Statutory Guide**.

More Information

If you have any questions, please contact Deltek Customer Care at https://support.deltek.com.

Cumulative Update 02 – February 28, 2025

Key Impact

This section flags bugs considered high importance, including:

- Corrections include an Expand Script error (which requires configuration), and an error in the My Plan workspace. (2312507, 2320974)

Support Cases Resolved In This Release

- None.

Software Issues Resolved

Time & Expense

Abbreviations Are Not Translated in Monthly Overview Tab (Absence Approval)

Deltek Tracking: 2313710

Abbreviations were not translated in the Monthly Overview tab (Absence Approval). They are now translated.

General Application

Bitstream Datatype from ODL Resolves to Image in CreSchema.sql but INTEGER in Expand.sql

Deltek Tracking: 2312507

In previous versions of Maconomy 2.6.4, the IMAGE table was created in the expand scripts as follows:

CREATE TABLE IMAGE(

    HASH VARCHAR(255) NOT NULL,

    REFCOUNT INTEGER ,

    WIDTH INTEGER ,

    HEIGHT INTEGER ,

    MEDIATYPE VARCHAR(255) ,

    IMAGEDATA INTEGER ,

    TRANSACTIONTIMESTAMP TIMESTAMP);

This resulted in a bug because of the use of INTEGER. It should have been BLOB for Oracle and IMAGE for SQL Server. This error is corrected.

IMPORTANT: When upgrading from Maconomy 2.6.4 CU 0 and CU 1, the bug fix is not automatically applied. You must run the following attached scripts:

- **For Oracle:** FixImageTable.sql

- **For SQL Server:** ISQLFixImageTable.sql

Internal Error Encountered in My Plan Workspace

Deltek Tracking: 2320974

If you tried to search for a field value (for example: Job, Task Name) in the My Plan workspace , Maconomy displayed an internal error. This is now corrected.

Notifications Not Recalculated as Scheduled

Deltek Tracking: 2322445

Maconomy did not recalculate notifications at the scheduled time. This is now corrected.

No Configuration Option for Assistant Width

Deltek Tracking: 2325063

You can now configure the width of assistants in web client workspaces. Set the size attribute for the assistant to one of the following values:

- sm - approximately 20% of the workspace area width

- md - approximately 40% of the workspace area width

- lg - approximately 60% of the workspace area width

Internal Error Encountered When Filtering for Records with Empty Date Fields

Deltek Tracking: 2325142

In any workspace list view or search window, filtering for lines with empty date fields resulted in Maconomy displaying the following error: "Invalid expression in the 'restriction' parameter. Check the server log for details." This is now corrected.

Document Viewer in Web Client Not Displaying Certain Values in Chinese

Deltek Tracking: 2328965

To improve rendering in PDF documents, a a new **nativePdfViewer** option is now added to the configuration API. If you set this property to **true**, the browser will use native PDF rendering.

Note: PDF files containing non-standard fonts might not render correctly in some browsers (such as Microsoft Edge). If this happens, do either of the following:

- Use Chrome or Firefox.

- Download the file to view it using an external viewer such as Adobe Acrobat.

New or Edited MyPlan Booking Only Accepted Default Time

Deltek Tracking: 2315200

When you tried to create or edit a booking in MyPlan, it did not accept any time except for the default. This is now corrected.

Web Client Could Not Attach Documents to a Record if Newly Added Record Line Had Unsaved Changes

Deltek Tracking: 2319560

If you added a line to a table without saving the change, then proceeded to add or attach documents to the current record, the web client could become stuck displaying a "Please wait..." dialog box. This is now corrected.

Table Toggle Switches Not Hidden Even When Underlying Field Was Closed

Deltek Tracking: 2310038

Toggle switches in tables were displayed even when their underlying field was closed. This is now corrected.

Finance

Missing Setup Fields in Vendor Workspace

Deltek Tracking: 2304980

Previously, several fields were missing from the Vendor workspace in the Maconomy Web Client. This issue affected multiple tabs, including **Information**, **Setup**, **Dimensions**, and **Allowed Actions**.

Information Tab:

- Department
- Standard Allocation Code
- Status
- First Activation Status
- Access Level

Setup Tab:

- Giro
- BACS No.
- CPC No.
- Card Type Code
- Payer Identification
- EU Trade Type

Dimensions Tab:

- Derived Company

Allowed Actions Tab:

- Default to Self Invoices
- Reference Mandatory on:
- Time Sheet Lines
- Expense Sheet Lines

This issue has now been corrected, and the missing fields are available as expected.

Trade & Misc.

Vendor Number in Employee Revisions Tab

Deltek Tracking: 2319608

When you clicked the **Create Vendor...** action in **Human Resources » Employees » Employee Information** tab, the vendor number appeared in Employee Information tab but not in Employee Revisions tab. This issue has been corrected. The Employee Revisions tab is now updated when you create a vendor for an employee.

People Planner

Data Limitation Becomes Null After Period of Inactivity

Deltek Tracking: 2320697

An error occurred for users with an assigned data limitation. If the user left the Web Components open, after an hour of inactivity, the data limitation would no longer work. The user could view all information without restrictions in the Web Components. This error is corrected.

As a workaround, you can use the People Planner Admin Tool to disable the **Keep the Session alive** setting. However, this might cause users to be logged out after a shorter period than before.

New Booking Customizations in Saved Layout

Deltek Tracking: 2249555

In the Resource Summary view, if you customized the columns and resized the dialog box for events in the New Booking dialog box, this was not saved as part of the layout. This error is corrected.

Important TPU Notes for CU 02

The Workspace Client from CU 02 is required for this update.

Deltek recommends that you always install the latest version of the Workspace Client in order to ensure compatibility with the most recent CUs.

Important People Planner Notes for CU 02

To install this CU, you can apply it to an existing People Planner installation by running the 4.7-CU2 installation.

Cumulative Update 01 – January 31, 2025

Key Impact

This section flags bugs considered high importance, including:

- Corrections include an error in custom popup fields, General Journal Template, and missing data in the Germany GoBD Report. (2303733, 2280039, 2272521, 2278942)

Support Cases Resolved In This Release

- 2304833 – Yellow Color Missing in Calendar for Weeks Beyond Three Months After Submitting Absence Request
- 2310286 – Copy Job Action Copied Opportunity Number

Software Enhancements

BPM

Certification: BusinessObjects 4.3 SP4 Patch 7

Deltek Tracking: 2222467

Maconomy 2.6.4 is now certified to run BusinessObjects (BO) 4.3 SP4 Patch 7.

Trade & Misc.

Pagero OAuth URL Change

Deltek Tracking: 2221813

Pagero has introduced new OAuth2 token endpoints and will deprecate the old one by February 1, 2025. To ensure seamless integration between Pagero and Maconomy, you must update the url.pageroauthurl setting in the extension.ini file to https://sso.pageroonline.com/oauth/v2 when enabling e-Invoicing in Maconomy.

Software Issues Resolved

Time & Expense

Yellow Color Missing in Calendar for Weeks Beyond Three Months After Submitting Absence Request

Deltek Tracking: 2304833

For submitted absences longer than three months, not all days displayed the correct color (yellow) in the calendar. This issue has been resolved.

Incorrect Text in Table Cell Titles in Monthly Overview

Deltek Tracking: 2304853

In the absence monthly overview, the week name abbreviations were only in English. They are now translated.

Copy Job Action Copied Opportunity Number

Deltek Tracking: 2310286

When you copied a job, the opportunity number was also copied. An opportunity should only be converted to one job. This is now corrected.

System Error Displayed When Changing Invoice Layout Rule for Closed Job Entries

Deltek Tracking: 2310298

When you changed the invoice layout rule for a job, a system error (SignForTotalAmountRegistered) displayed for closed job entries that were not being reopened. This is now corrected.

General Application

Web Client Error in Workspaces Containing Custom Popup Fields

Deltek Tracking: 2303733

Previously, accessing Web Client workspaces that contained custom popup type fields resulted in an internal server error. This error is corrected.

Search Filter Always Displayed First Option

Deltek Tracking: 2304481

When you selected a filter option in a workspace, the search filter always displayed the first option even if you selected a different one. This is now corrected.

Title in Table Pane Not Shown

Deltek Tracking: 2277459

Titles you specified for the table panes did not display. This is now corrected.

Duplicated MyPlan Booking

Deltek Tracking: 2248923

If you created a MyPlan booking and then updated the finish date or extended the booking to longer than a day, MyPlan duplicated your booking. This is now corrected.

Web Client Tables Did Not Expand To Fill Available Vertical Space

Deltek Tracking: 2308938

When you scrolled through a workspace, the table headings moved out of view. This is corrected. Tables now have a limited height based on the height of the workspace in the browser.

Workspace Client Wizard Error

Deltek Tracking: 2306455

The Workspace Client would highlight any text containing the character "@" as a link or email address. This is now fixed.

Finance

Missing Delete Template Action in Web Client

Deltek Tracking: 2280039

Previously, the **Delete Template** action was missing in the General Journal workspace of the web client. This error is now corrected.

String Concatenation Warnings from Dimension Derivation

Deltek Tracking: 2311875

Previously, MaconomyServer.log could issue repeated string concatenation warnings caused by the dimension derivation of LM_SubstituteParameter. To address this, the error message displayed when validating the allocation combination is now shorter, showing only the derived dimensions. This shorter description should prevent these warning messages from appearing in the log.

BPM

Sweden - Payment Time: Report Displayed Non-Swedish Companies

Deltek Tracking: 2270707

Previously, the Payment Time report's Summary tab displayed non-Swedish companies even when the **Incl. Non-Swedish Companies** field was set to **No**. This error is corrected by removing the **Company Information** (country) report filter in the Summary tab and replacing it with **Vendor Company**.

Germany - GoBD: Missing Data on VendorEntry.csv File

Deltek Tracking: 2272521

Previously, the GoBD report's data export file, VendorEntry.csv, was missing some data due to a limitation related to the data extraction process that prevented the retrieval of date type fields from the database. This error is corrected.

Germany - GoBD: Missing Data on CompanyVendor.csv File

Deltek Tracking: 2278942

Previously, the GoBD report's data export file, CompanyVendor.csv, was missing some data due to a limitation related to the data extraction process that prevented the retrieval of date type fields from the database. This error is corrected.

People Planner

Restore Default Filters Error

Deltek Tracking: 2305575

Prior to this fix, you had to click the **Restore Default Filters** button twice to revert to the default layout. This error is corrected.

Unable to Save Booking Updates

Deltek Tracking: 2303693

By error, bookings were not saved automatically if you edited them in the Workspace Client (WSC), or when using the Edge browser in IE mode. This error is corrected.

New Booking Columns in Saved Layout

Deltek Tracking: 2313652

In the Resource Summary view, if you adjusted the column widths in the New Booking dialog box, this was not saved as part of the layout. This error is corrected.
