INTRODUCTION

This document is updated regularly and is based on information provided by BNA. Responsibility for correct withholding of federal, state, and local income taxes remains with the employer. Deltek, Inc. assumes no liability for the accuracy of the information in this document.

State Abbreviations

The state abbreviations used throughout the system are maintained in the Maintain States and Provinces screen in Costpoint System Administration and cannot be changed.

Special Programming Instructions

This section lists special setup requirements for those states that require a little extra attention and/or have more steps involved in calculating their income tax than the tax table or percentage methods.

Special Setup Instructions

The states in this section do not have special programming; however, an explanation is needed to understand the correlation between the filing statuses as related to state requirements.

If you use the Print/Reprint Payment Advices and/or Print/Reprint Paychecks applications and you have employees working in a state or states that require the pay rate be included on the check stub, you must select the **Include Pay Rate on Paychecks and Advices** check box in the State Taxes screen for those state(s). If an employee's FLSA status is **Non-exempt** and the *Include* **Pay Rate on Paychecks and Advices** check box is selected for the employee's SUTA state, the employee's pay rate(s) will be included on the check stub.

FEDERAL TAX COMPUTATION

Percentage Method — Based on Gross Pay

If taxes are based on gross pay, the program follows the steps below to calculate the tax liability:

Regular checks:

1. Gross Pay - (Federal Exempt Deductions)[a] x Number of Pay Periods per Year = Gross Annual Wages
2. Gross Annual Wages - (Number of Exemptions x Exemption Amount[b]) = Annual Taxable Wages
3. ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Tax Percentage) + **Base Tax**)[c] = Annual Tax Liability
4. (Annual Tax Liability / Number of Pay Periods per Year) = Tax Liability for Current Period
5. Any **Additional Amount** entered in the Employee Taxes screen is added to the Tax Liability for Current Period.

Regular checks: (For Nonresident Aliens)

1. Gross Pay - (Federal Exempt Deductions)[a] x Number of Pay Periods per Year = Gross Annual Wages
2. Gross Annual Wages + Nonresident Alien Addition Amount (from Federal Taxes) = Adjusted Gross Annual Wages
3. Adjusted Gross Annual Wages - (Number of Exemptions x Exemption Amount[b]) = Annual Taxable Wages
4. ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Tax Percentage) + **Base Tax**)[c] = Annual Tax Liability
5. (Annual Tax Liability / Number of Pay Periods per Year) = Tax Liability for Current Period
6. Any **Additional Amount** entered in the Employee Taxes screen is added to the Tax Liability for Current Period.

   PLUS Adjustment (calculation for adjustment is below)

1. Gross Pay - (Federal Exempt Deductions) x Number of Pay Periods per Year = Gross Annual Wages
2. Gross Annual Wages + Nonresident Alien Addition amount (from Federal Taxes) = Adjusted Gross Annual Wages
3. Adjusted Gross Annual Wages - (Number of Exemptions x Exemption Amount) = Annual Taxable Wages
4. (**Base Tax** + ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Plus %)[g] - ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Less %)[h])[f] = Annual Tax Liability
5. (Annual Tax Liability / Number of Pay Periods per Year) = Tax Liability for Current Period

   (Note: In step 4, the amount calculated for "g" and "h", one would be zero or both would be zero.)

Bonus checks:

Amount of Bonus x **Supplemental Earnings Tax Percent** in the Federal Taxes screen = Amount to be withheld or, if **00** is entered as **Supplemental Earnings Tax Percent** in the Federal Taxes screen, then the amount of the bonus is added to the employee's annual salary[d] from the Salary Info and History screen. The top tax rate[e] for this amount is multiplied by the bonus to arrive at the tax withheld. In addition, for all bonuses, the **Additional Amount** field in the Employee Taxes screen is ignored.

a. Deductions that have been set up as **Federal Exempt** in the Federal Taxability subtask of the Deductions screen.

b. **Exemption Amount** from the Federal Taxes screen.

c. From the appropriate Federal Tax Table.

d. Annual Rate from the Salary Info and History screen.

e. The highest percentage for the annual tax liability from the appropriate Federal Tax Table is used.

f. Withholding Table for Nonresident Alien adjustment from Advance EIC and Nonresident Aliens Tables (PRMEIC)

FEDERAL TAXES

STATE TAX COMPUTATIONS

Deltek Costpoint uses three methods to compute state income taxes. These methods are determined in the **Tax Based On** field in the State Taxes screen. If the **Tax Based On** field is left blank, no tax is calculated; if you enter **F**, the tax table method for federal withholding is performed; and if you enter **G**, the tax table method for gross pay is used.

If **Tax Based On** is left blank in the State Taxes screen, no tax will be calculated unless an override amount is specified in the **Override Amount** field in the Employee Taxes screen.

Tax Table Method — Based on Federal Withholding

If taxes are based on federal withholding, the program will annualize the federal withholding amount and perform a tax table lookup using the annualized federal withholding amount. The program does not use state deductions or exemptions for this method. After arriving at an annual tax liability, the program divides the annual tax liability by the number of pay periods in a year to arrive at the current calculated tax deduction. Any additional state tax is added as specified in the Employee Taxes screen.

Tax Table Method — Based on Gross Pay

If taxes are based on gross pay, the program follows the steps below to calculate the tax liability:

Regular checks:

	Calculation	Related Screens
	Gross Pay for Pay Period	Manage Payroll Records - Pay Types subtask

*** Experienced Rhode Island employers that pay the maximum unemployment tax rate make payments based on a higher wage base.*

State legislatures meet at various times during the first quarter of the year to rule on the unemployment wage base. Therefore, if you receive information at a later date, go to the State Taxes screen and enter the new limit in the **Unemp Limit** field.

2016 STATE DISABILITY INSURANCE - EMPLOYEE CONTRIBUTION

State Disability Insurance is deducted by setting up a **Locality Code** in the Local Taxes screen with **Tax Based On** as a **Y** Method. Using the same **Locality Code**, enter a record in the Local Standard Deductions screen with a filing status of **Both** and with **Percent Over Excess, Minimum**, and **Maximum** equal to **0.00**.

Using the same locality code and filing status, enter a record in the Local Tax Tables screen with the first line in **For Taxable Income Over** equal to **0.00**, **Base Tax Plus** equal to **0.00**, and **Percent of Excess** equal to the **Employee Tax Rate** listed below. The second line of this table should be entered with **For Taxable Income Over** equal to the **Annual Taxable Wage Base** listed below, **Base Tax Plus** equal to the **Maximum Amount** listed below, and **Percent of Excess** equal to **0.00**.

State	Annual Taxable Wage Base	Employee Tax Rate (%)	Maximum Amount
California	$106,742	0.9%	$939.40
Hawaii	Based on Employee's Weekly Rate	0.5%[(1)]	$234.52
New Jersey	$32,000	0.2%	$80.00

Puerto Rico	$9,000	0.3%	$27.00
Rhode Island	$66,300	1.2%	$770.00

(1) Not to exceed $4.76 per week: Maximum weekly wage base is $982.36

(2) Not to exceed $.60 per week.

2016 STATE UNEMPLOYMENT INSURANCE-EMPLOYEE CONTRIBUTION

State Unemployment Insurance is deducted by setting up a **Locality Code** in the Local Taxes screen with **Tax Based On** as a **Y** Method. Using the same locality code, enter a record in the Local Standard Deductions screen with a filing status of **Both** and with **Standard Deduction %**, **Minimum**, and **Maximum** equal to **0.00**.

Using the same locality code and filing status, enter a record in the Local Tax Tables screen with the first line in **For Taxable Income Over** equal to **0.00**, **Base Tax Plus** equal to **0.00**, and **Percent of Excess** equal to the **Employee Tax Rate** listed below. The second line of this table should be entered with **For Taxable Income Over** equal to the **Annual Taxable Wage Base** listed below, **Base Tax Plus** equal to the **Maximum Amount** listed below, and **Percent of Excess** equal to 0.00.

State	Annual Taxable Wage Base	Employee Tax Rate (%)	Maximum Amount	Fund Name
Alaska	38,700	0.50%	243.54	Unemployment
New Jersey	32,000	0.08%	30.90	Family Leave Insurance (FLI)
New Jersey	32,000	0.3825%	118.19	Unemployment & Health Care
New Jersey	32,000	.0425%	13.13	Work Force Development/ Supplemental Workforce Fund[(1)]
Pennsylvania	None	.07%	None	Unemployment

[(1)] Legislation for New Jersey requires that the amounts of these funds be reported separately in Box 14 of the W-2. Therefore, this must be set up as a deduction. You have the option of setting up each fund as its own deduction or combining the two into one deduction. We suggest that you combine the two into one deduction; then you need to use only one line in Box 14.

Data Setup for Iowa

Employee Taxes Screen/Employee Payroll Setup Menu

Withholding State Filing Status	▪ **Married:** Select this filing status if the employee is **claiming two or more personal allowances** on line 1 of the Iowa Withholding Allowance Certificate (IA-W4) form. ▪ **Single:** Select this filing status if the employee is **claiming zero or one personal allowance** on line 1 of the Iowa Withholding Allowance Certificate (IA-W4) form. If the employee's total number of allowances is 2 or more, but none or only 1 of those is a personal allowance, a Withholding State Filing Status of Single must be assigned to the employee. The Withholding State Filing Status dictates the standard deduction for the employee.
Withholding State Exemptions	Enter **0** (zero). This data field is not used for Iowa calculation; therefore, the number should always be zero.
Withholding State Dependents	Enter the number of personal allowances claimed by the employee on his/her IA W-4 form.
Withholding State Credits	If you are not using the number of Dependents to indicate the number of allowances claimed by the employee on his/her IA-W4, enter the employee's number of allowances in this field. The **Withholding State Credits** will be multiplied by the Iowa **Credit Amount** in the State Taxes screen and the tax withholding will be reduced by the resulting credit amount. If you are using the **No. of Dep** field for entry of the number of allowances claimed on the IA W-4, enter 0 in this field.

Local tax codes for Maryland must be set up so that the first letter of the code is an **M**. If the local code begins with an **M** and the withholding state is Maryland, the special programming is triggered. The Exemption Amount is the amount given for each exemption. Because Maryland does not use the **Married** and **Single** filing statuses, the **Exempt Amt Single** and **Exempt Amt Married** columns display zero. The **Exempt Amt Other** field displays the amount that is given for each exemption.

Effective 01/01/2000, the state of Maryland changed the computation method for tax withholding. Maryland has different withholding rates depending on the county in which an employee resides.

Local tables must be set up to allow for the different local income tax rates.

The system adds state and local liability amounts to equal one state withholding amount.

State Tax Calculation

1. Gross Pay - (401k + Cafeteria Plans) x Number of Pay Periods per Year = Gross Annual Wages
2. Gross Annual Wages - State Standard Deduction - (Number of Exemptions x Exemption Amount) = Annual Taxable Wages

3. ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Tax Percentage) + Base Tax = Annual State Tax Liability
4. Annual State Tax Liability / Number of Pay Periods per Year = State Tax Liability for Current Period

Local Tax Calculation

1. Gross Pay - (401k + Cafeteria Plans) x Number of Pay Periods per Year = Gross Annual Wages
2. Gross Annual Wages – Local Standard Deduction - (Number of Exemptions x Exemption Amount) = Annual Taxable Wages
3. ((Annual Taxable Wages - **For Taxable Income Over** Amount) x Tax Percentage) + Base Tax = Annual Local Tax Liability
4. Annual Local Tax Liability / Number of Pay Periods per Year = Local Tax Liability for Current Period

The system adds state liability and the local liability amounts to equal one state withholding amount.

Withholding State Filing Status	▪ **Both:** Select this filing status if the employee has claimed married or single and has **not** opted for the **Optional Two-Earner Percentage Method** on his/her West Virginia Withholding Exemption Certificate (WV/IT-104). The West Virginia tax table is the same for married and single employees; therefore the filing status of **Both** is used in Costpoint. ▪ **Misc. Status 1:** Select this filing status if the employee has claimed married or single and **has** opted for the **Optional Two-Earner Percentage Method** on his/her West Virginia Withholding Exemption Certificate (WV/IT-104). Note that the filing status assigned in Costpoint dictates the standard deduction amount for the employee.
