# Overview

The Deltek Specpoint Release Notes for Building Product Manufacturers contain a summary of the following updates for each included release:

- New Features
- Enhancements
- Software Issues Resolved

The scope of these release notes covers release versions 1.0.2 through 1.9.6.

# Release 1.9.6

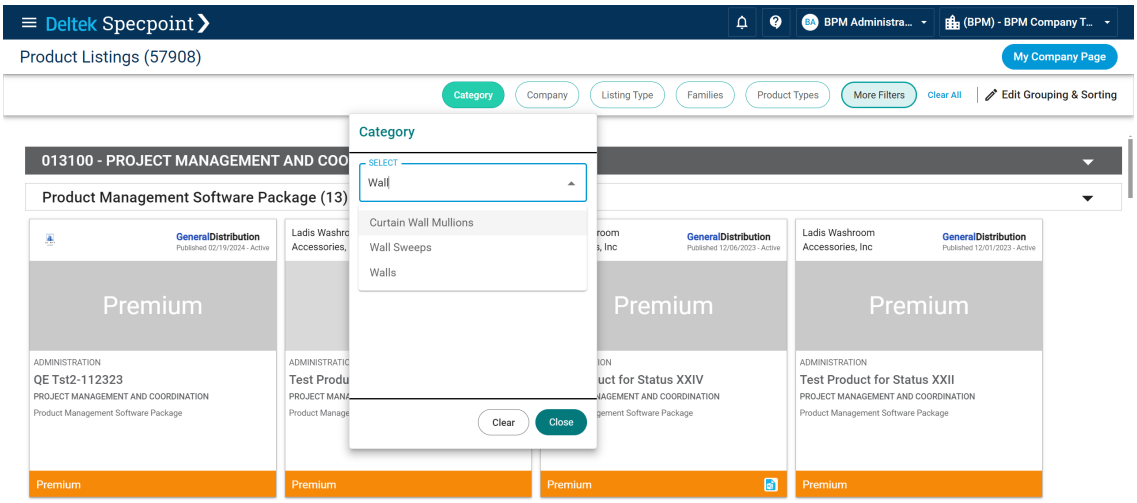
**Released:** March 13, 2024

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

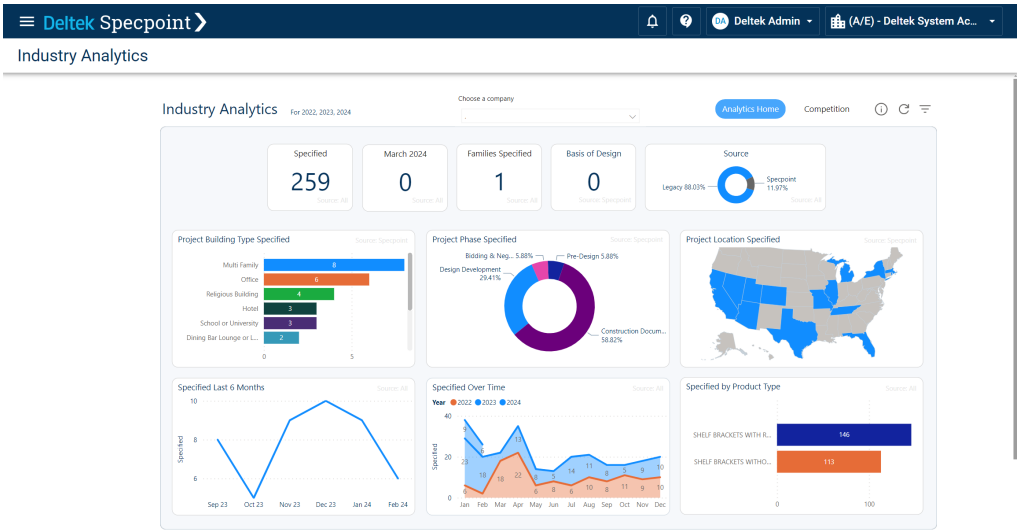
### Unexpected Reloading of the Product Listings Page

**Bug 2077853:** When you navigated to the Product Listings page, the page loaded for a second time. This interrupted actions that you immediately performed, such as searching for filter values.



### Default Date for Industry Analytics

**Bug 2095051:** The Industry Analytics feature did not include **2024** as a default value for **Year** selection. This issue also involved the Industry Analytics feature not including 2024 as a default selection after you clicked the **Reset** button.



# Release 1.9.5

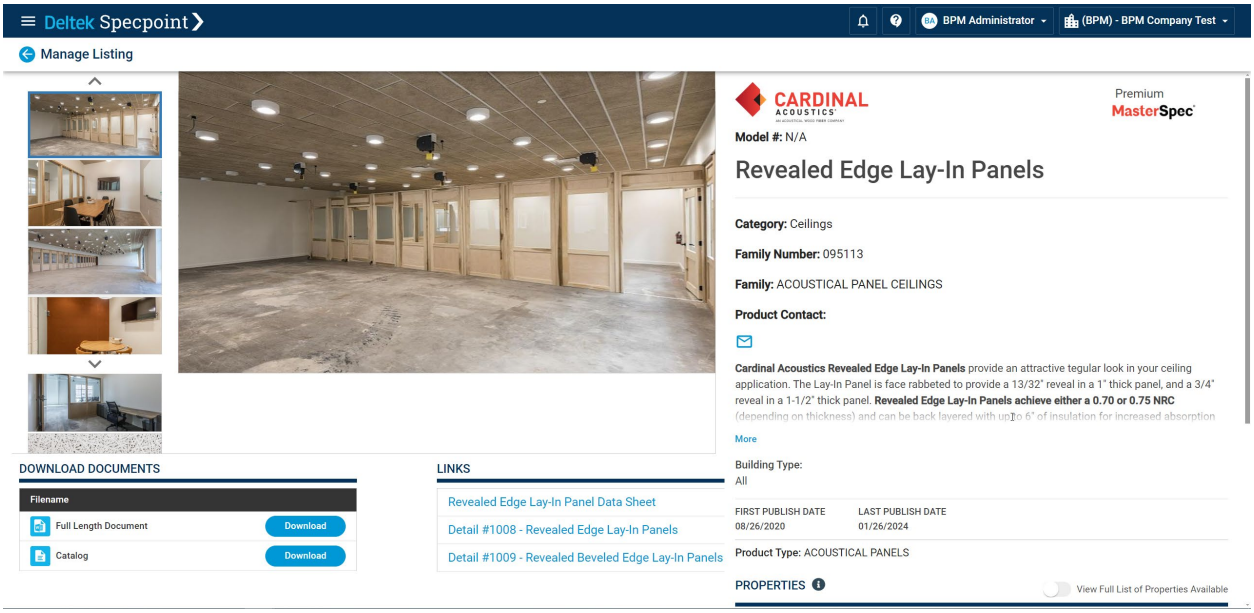
**Released:** February 21, 2024

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Loading the Manage Listing Page

**Bug 1964402:** When you opened the Manage Listing page from a product listing card on the Product Listings page, the Manage Listing page loaded twice.



# Release 1.9.4

**Released:** February 13, 2024

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.9.3

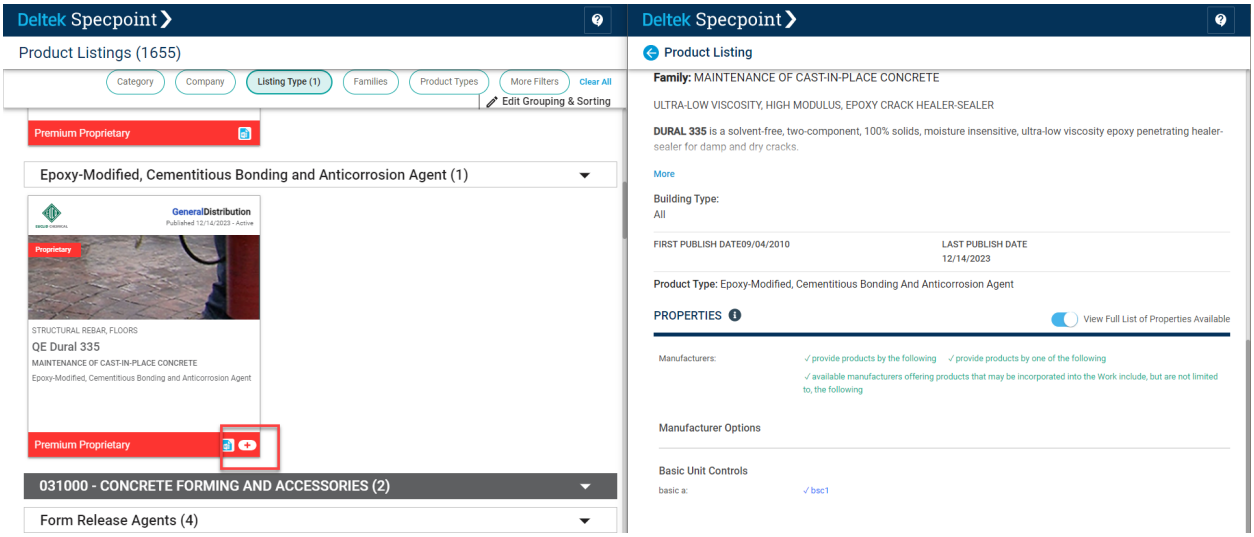
**Released:** February 1, 2024

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Manufacturer Options Indicator in Public Proprietary Listings

**Bug 2064849:** On the public Specpoint Product Listings page, product listing cards for select proprietary listings included the manufacturer options indicator ( ). The Product Listing page also displayed manufacturer option details that were in draft and were not intended for distribution. Manufacturer options are available only for Premium MasterSpec listings and Premium listings.



# Release 1.9.2

**Released:** January 12, 2024

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.9.1

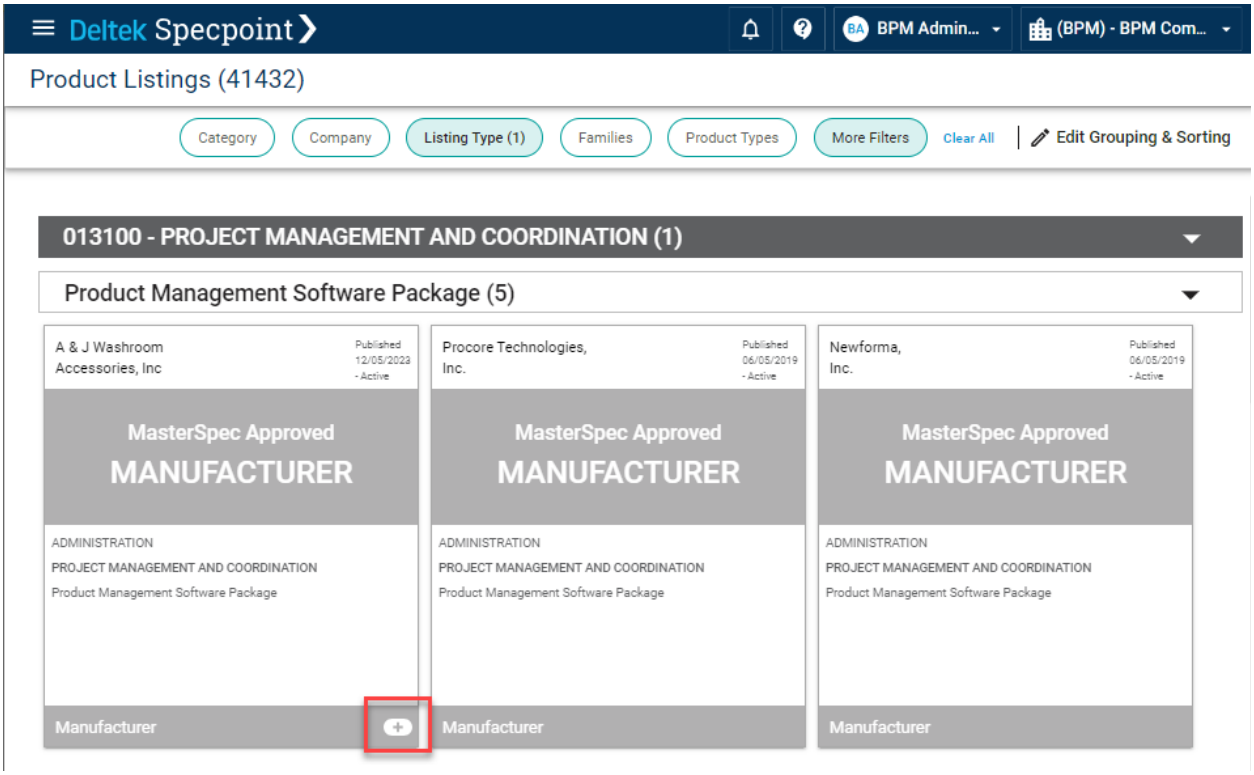
**Released:** January 10, 2024

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

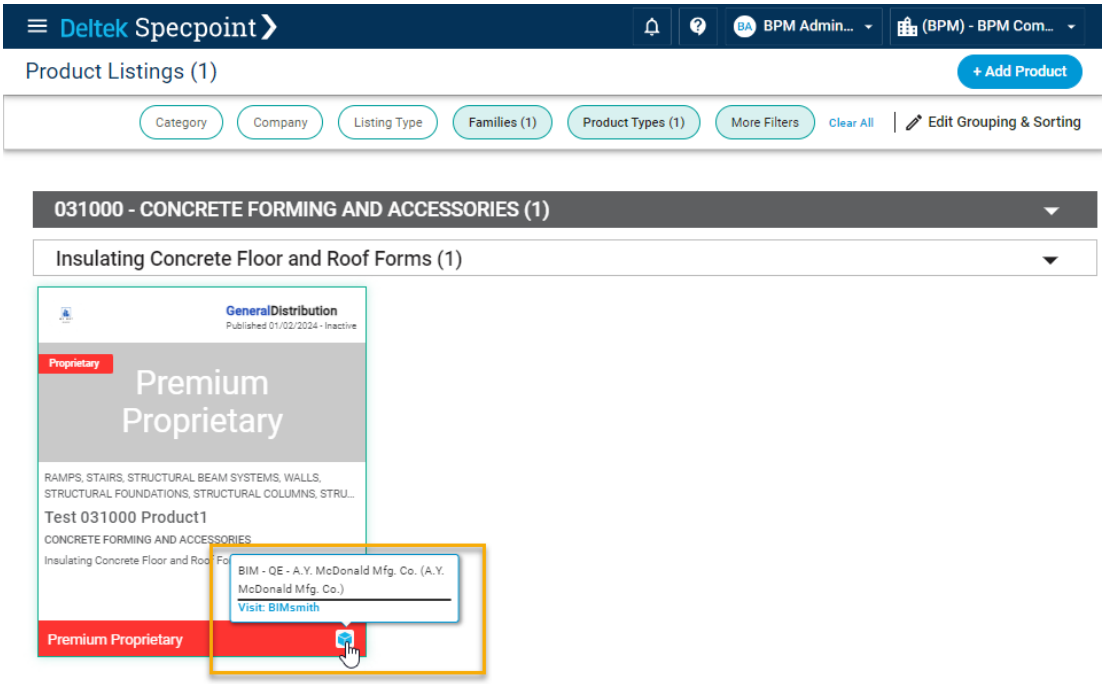
### Manufacturer Options Indicator in Manufacturer and Proprietary Listings

**Bug 2057831:** On the Product Listings page, product listing cards for select manufacturer listings and proprietary listings included the manufacturer options indicator ( ). Manufacturer options are available only for Premium MasterSpec listings and Premium listings.



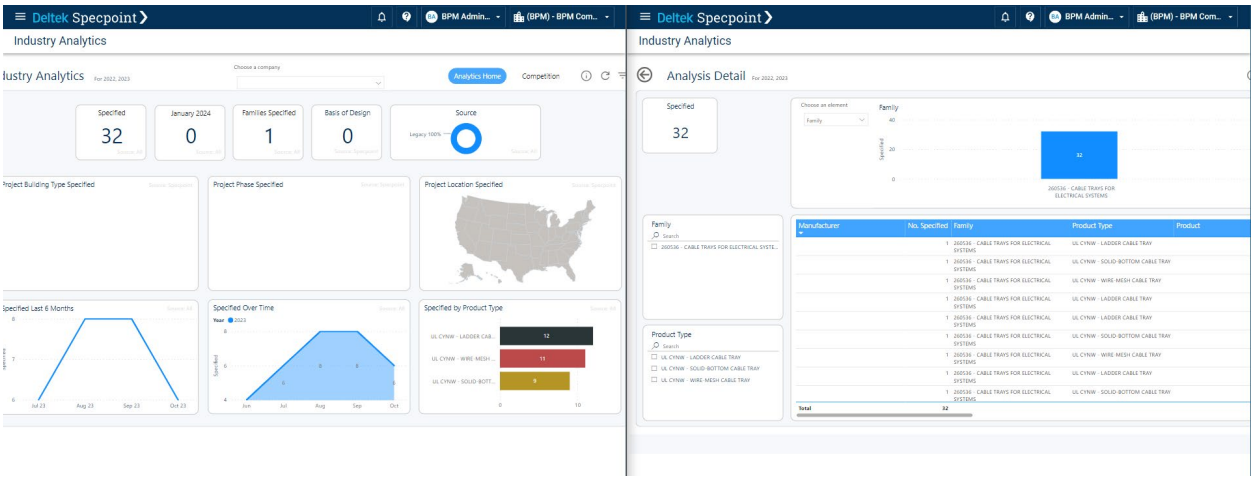
## Unresponsive BIMsmith Links

**Bug 1915402:** On the Product Listings page, product listing cards for select product listings with BIMsmith partnerships included unresponsive BIMsmith links.



## Missing Data in Industry Analytics

**Bug 2055712:** For select months, data in the Industry Analytics page did not match the data in the Legacy Analytics page. Data from legacy platforms were not synchronized with Specpoint.



# Release 1.9

**Released:** December 14, 2023

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Company Selection in Industry Analytics for Resellers

As user under a reseller BPM account, you can now select from any of your associated companies to view their data analytics. On the Industry Analytics page, use the **Choose a company** field to select a company, active or inactive, for which you are a reseller.

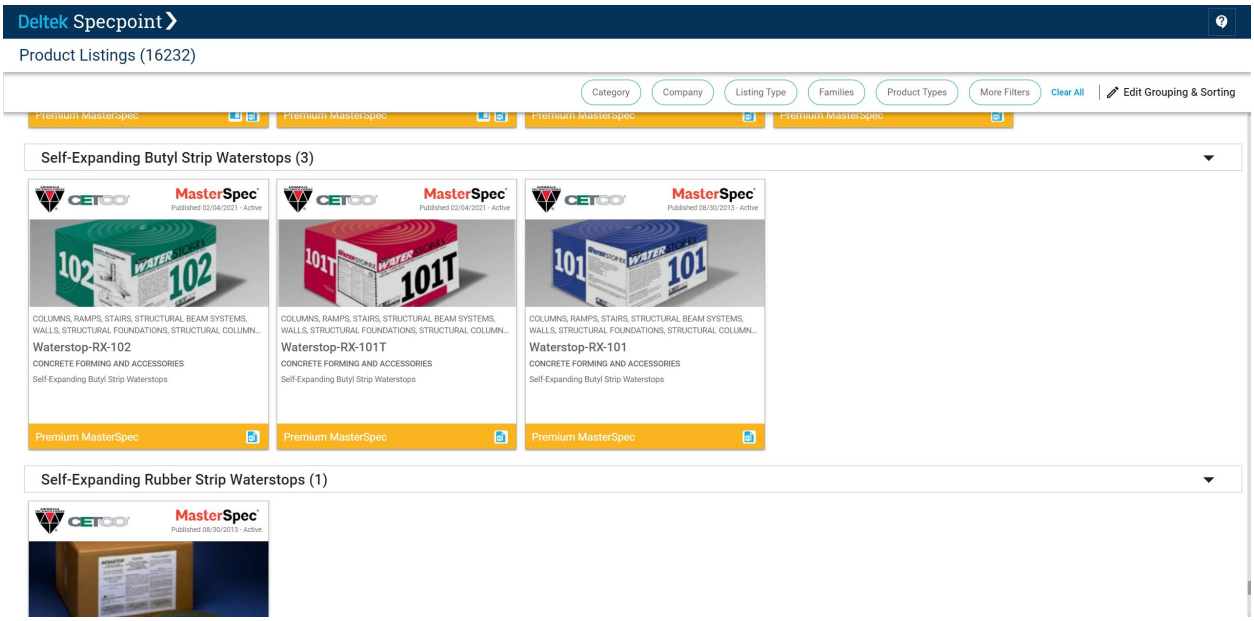
Use this feature to quickly learn more about the performance of the product listings that you resell.

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

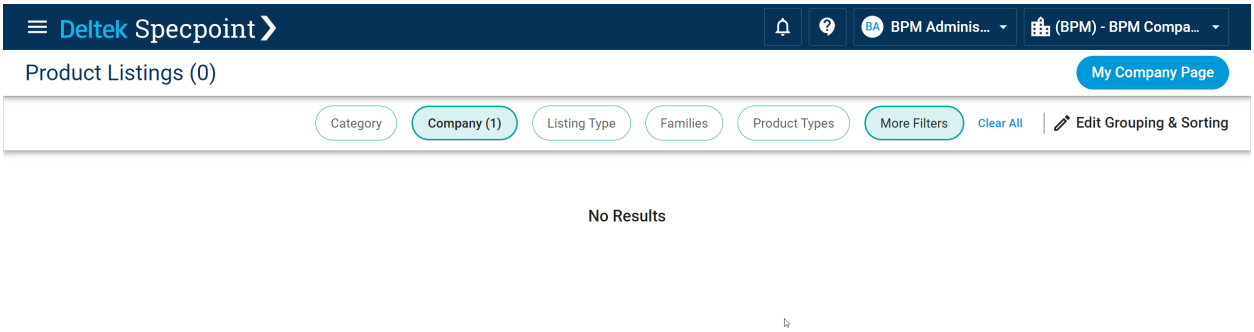
### Syncing on the Public Listings Page

**Bug 1913758:** When you added product listings or updated product listing information, the public Specpoint Product Listings page did not immediately reflect the change.



## Synching of Company Name Changes

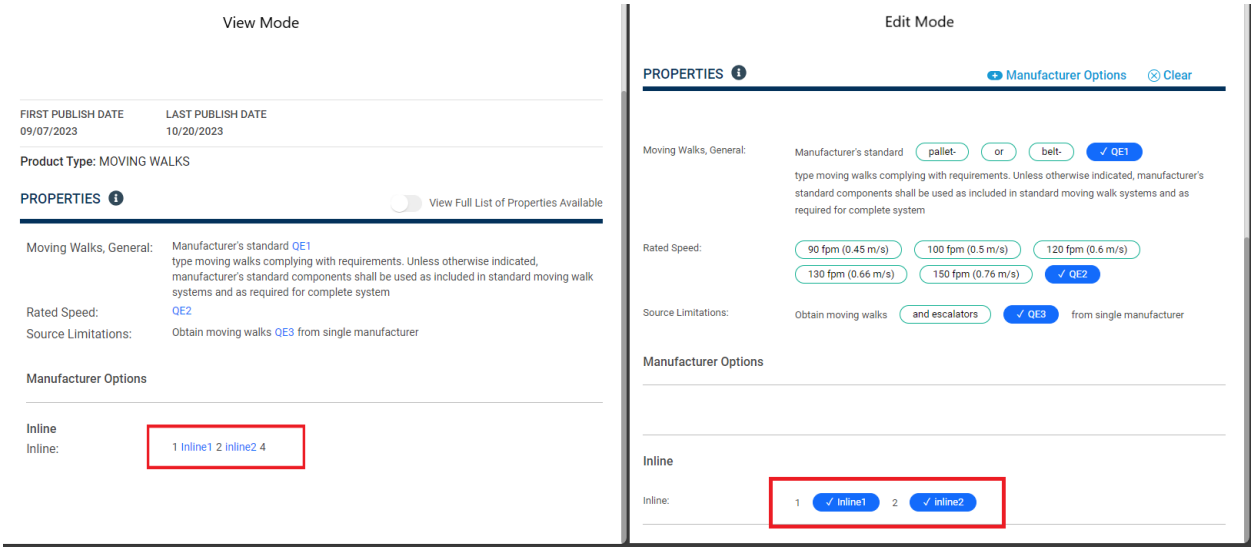
**Bug 1955418:** When you requested to replace your BPM's company display name, the change included a delay in reflecting in your company's product listings.



When you browsed for your company's product listings on the Product Listings page immediately after the display name change, you were unable to view your product listings and the page displayed a *"No Results"* message.

## In-Line Text for Manufacturer Properties

**Bug 2026966:** When you viewed manufacturer properties for your BPM's product listings in the Properties portion of the Manage Listing page, you encountered inconsistencies in the properties' in-line text. For a given manufacturer property, the edit mode of the Manage Listing page displayed incomplete in-line text. The view mode of the page displayed the complete text.



# Release 1.8.6

**Released:** November 16, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.8.5

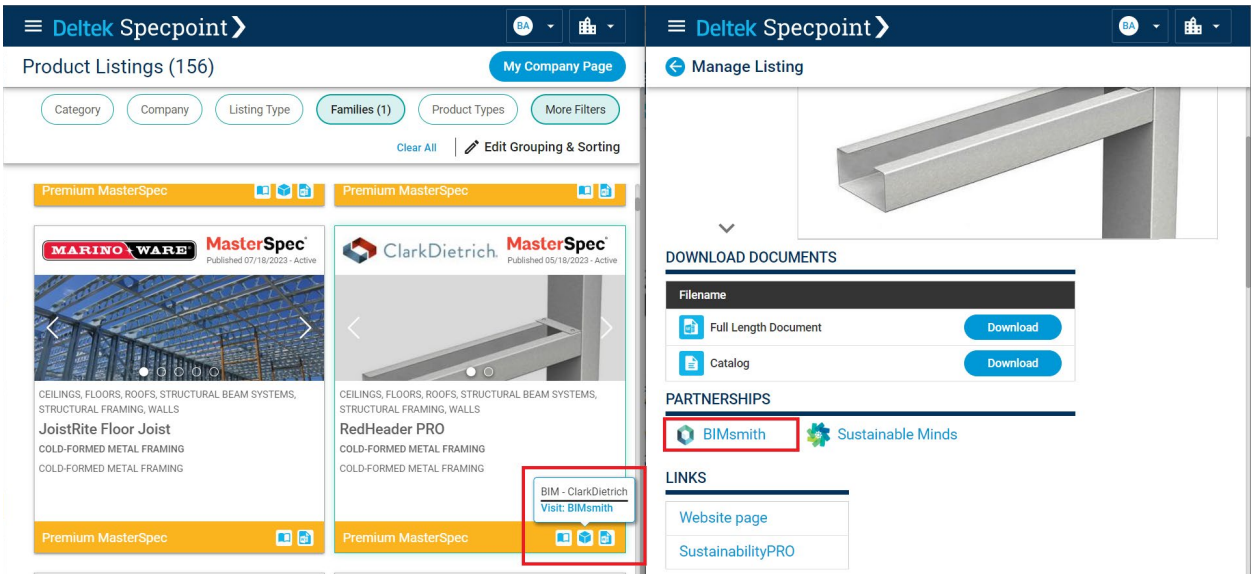
**Released:** November 6, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Multiple Partnership Links

**Bug 1965457:** When you added a BIMsmith link to your product listing on the Manage Listing page, the platform added another BIMsmith link to your listing.



# Release 1.8.4

**Released:** October 31, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.8.3

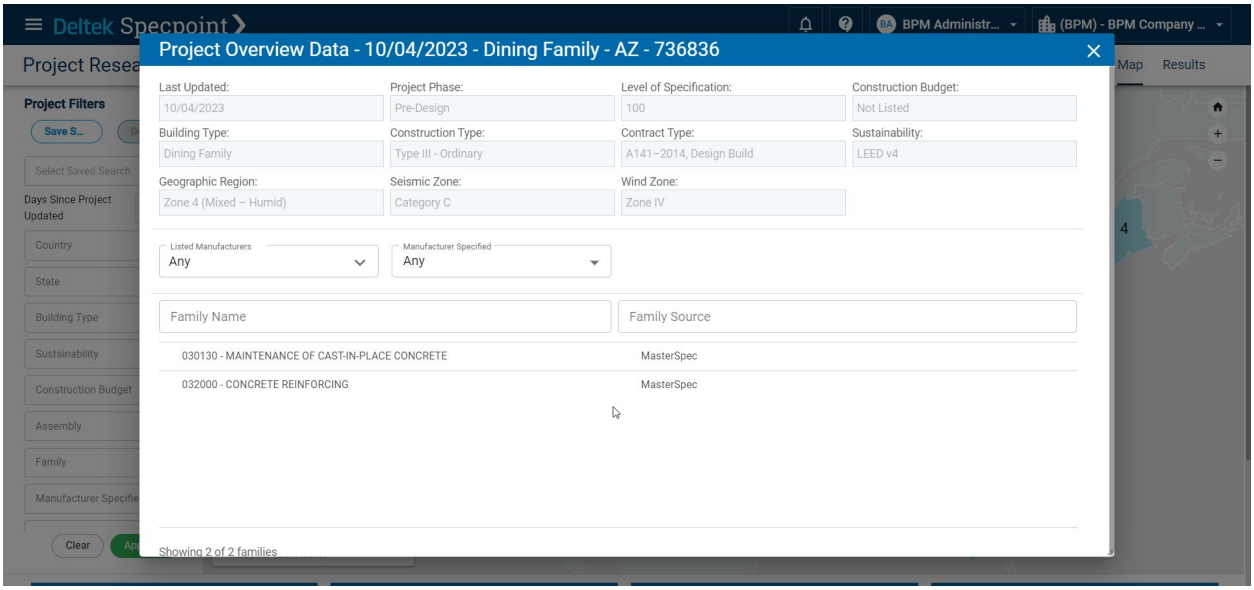
**Released:** October 11, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Missing Project Families on the Project Research Map

**Bug 1999773:** The Project Overview Data window of the Project Research Map did not display the complete list of added families in affected projects. For a given project, the window did not include families that the project team added after adding an imported family.



# Release 1.8.2

**Released:** September 28, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.8.1

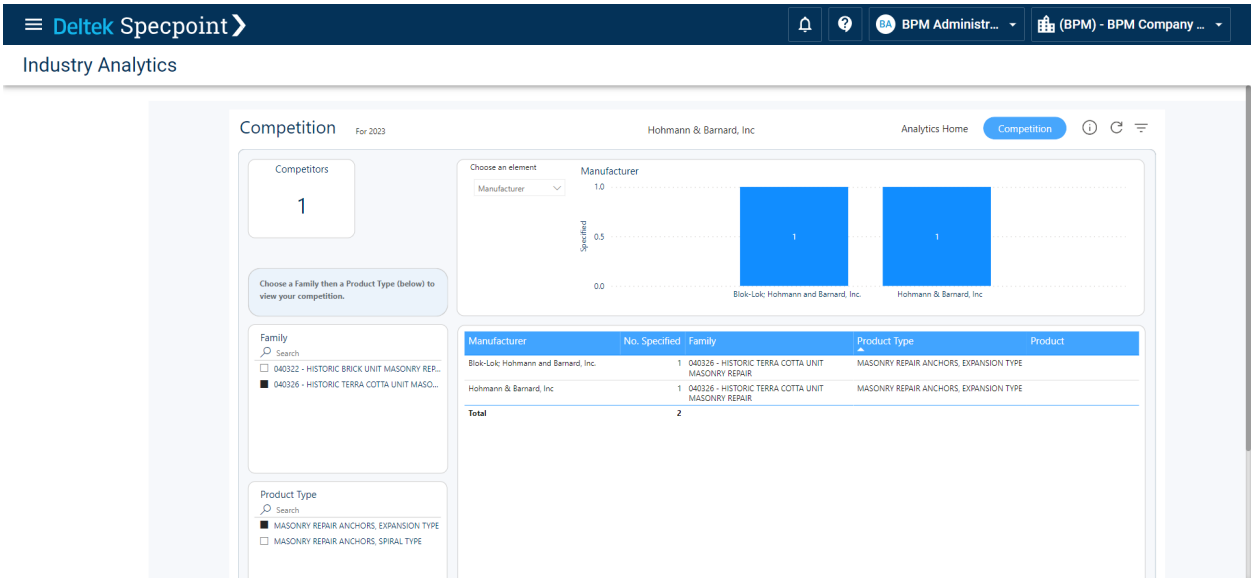
**Released:** September 26, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Incorrect Company Name on the Competition Page

**Bug 2010014:** The Competition page for Industry Analytics displayed an incorrect BPM company name. This page should display the name of your BPM company.



# Release 1.8

**Released:** September 21, 2023

## New Features

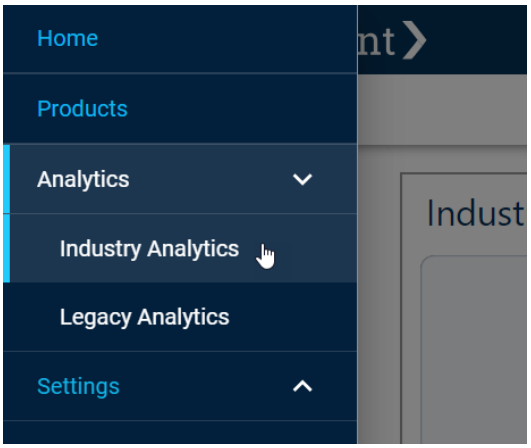
This section includes summaries of the new features in this release.

### Industry Analytics

You can use Specpoint's new industry analytics features to gain insight on how A/E firm's view and specify your product listings and product listings from other manufacturers/companies. These tools enable you to track the performance of your product listings in terms of selection or specification for an A/E project.

- Analytics Home Page
- Competition Page
- Analytics Detail Page

Industry analytics derives data from both Specpoint and legacy applications, such as SpecBuilder Cloud and MasterWorks. To access the new industry analytics features, click **Analytics » Industry Analytics** on the navigation menu.



## General Options

These options are available on the Analytics Home page and the Competition page.

The following general options are available:

| Widget | Description |
|---|---|
| **Analytics Home** | Open the Industry Analytics Home page and view the available data. |
| **Competition** | Open the Competition page and view the performance of your product listings against products from other manufacturers. |
| **Information** | Click this button to display tooltips and learn more about each industry analytics feature. |
| **Reset** | Click this button to reset all analytics widgets to their default state. |
| **Date** | Click this button and select a date to filter the available industry data. |

## Analytics Home Page

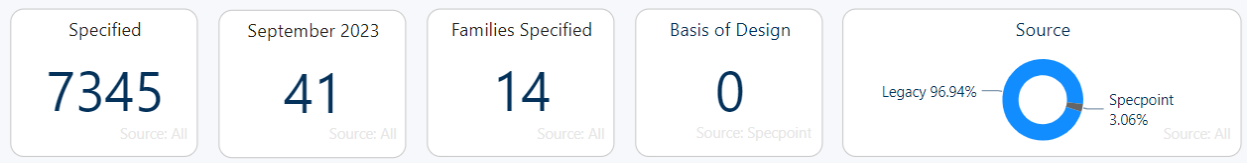
To focus on data based on specific criteria, such as location and unique Specpoint families (in which the product is specified), industry analytics organize data into widgets. On the Analytics Home page, the following types of widgets are available:

- KPI Widgets
- Specpoint Data Widgets
- Specpoint and Legacy Data Widgets

As industry analytics derives data from Specpoint and/or legacy applications, each available widget indicates the source of the data that it displays.

## Key Performance Indicator (KPI) Widgets

Use key performance indicator (KPI) widgets to see how design professionals from A/E firms view and specify your BPM's product listings in their projects. These widgets indicate the number of times that your product listings were specified, based on specific criteria.



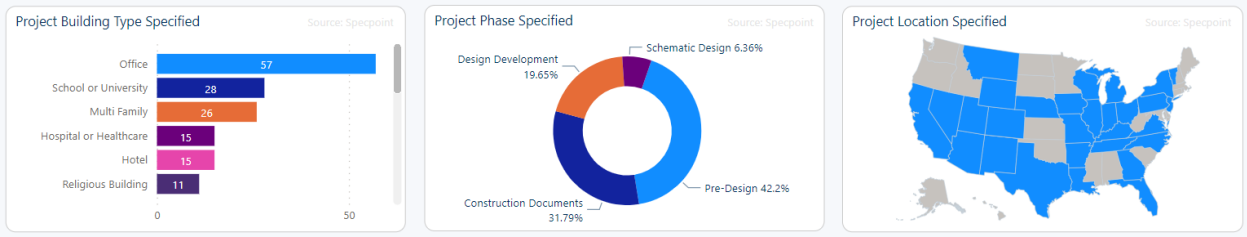
The following KPI widgets are available:

| Widget | Description |
|---|---|
| **Specified (by year)** | This indicates the number of times that a product or its manufacturer was specified in either Specpoint or in legacy applications in your selected years.<br>You can select one or multiple years from the date picker ( ). |
| **Specified (by month)** | This indicates the number of times that a product or its manufacturer was specified in either Specpoint or in legacy applications in the current month. |
| **Families Specified** | This indicates the number of families in which a product or its manufacturer was specified in either Specpoint or in legacy applications. |
| **Specified as BOD** | This indicates the number of times that a product from the manufacturer was specified in a Specpoint A/E project as a basis-of-design (BOD) product. |

| Widget | Description |
|---|---|
| **Source** | This displays the platforms where the specification activity occurred, either in Specpoint or in legacy applications, such as MasterWorks or SpecBuilder Cloud. |

## Specpoint Data Widgets

Use Specpoint data widgets to see how design professionals from A/E firms view and specify your BPM's product listings in their Specpoint projects. These widgets indicate the number of times your product listings are specified, based on specific criteria. The criteria used are intelligent project parameters within Specpoint for A/E firms.

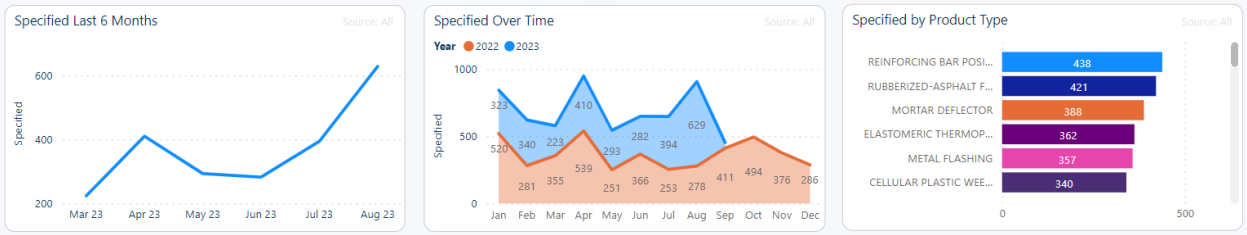


The following Specpoint data widgets are available:

| Widget | Description |
|---|---|
| **Project Building Type Specified** | This indicates the number of times that a product from a manufacturer was specified based on a Specpoint project building type. |
| **Project Location Specified** | This indicates the number of times that a product from a manufacturer was specified based on a Specpoint project's state. |
| **Project Phase Specified** | This indicates the number of times that a product from a manufacturer was specified based on a Specpoint project's phase. |

## Specpoint and Legacy Data Widgets

These widgets enable you to gain insight on a product listing's performance in Specpoint A/E projects and in legacy applications (such as MasterWorks), based on specific criteria.



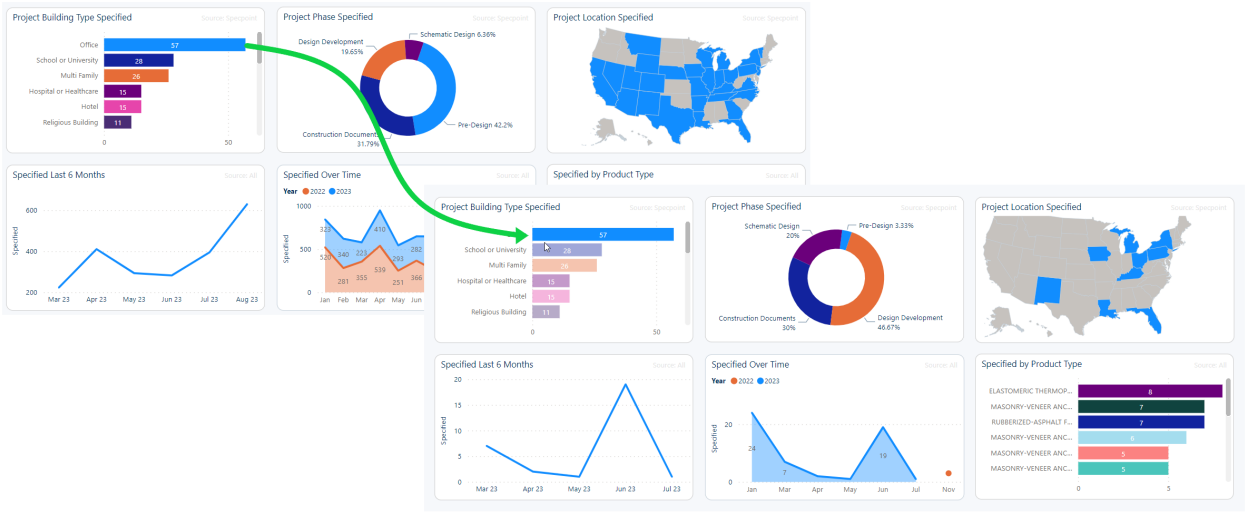
The following Specpoint and legacy data widgets are available:

| Widget | Description |
|---|---|
| **Specified Last 6 Months** | This indicates the number of times that a product from a manufacturer was specified per month, for the last six months. |

| Widget | Description |
|---|---|
| **Specified Over Time** | This indicates the number of times that a product from a manufacturer was specified per month, for the current year and the previous year. |
| **Specified by Product Type** | This indicates the number of times that a product from a manufacturer was specified per product type. |

## Dynamic Filtering

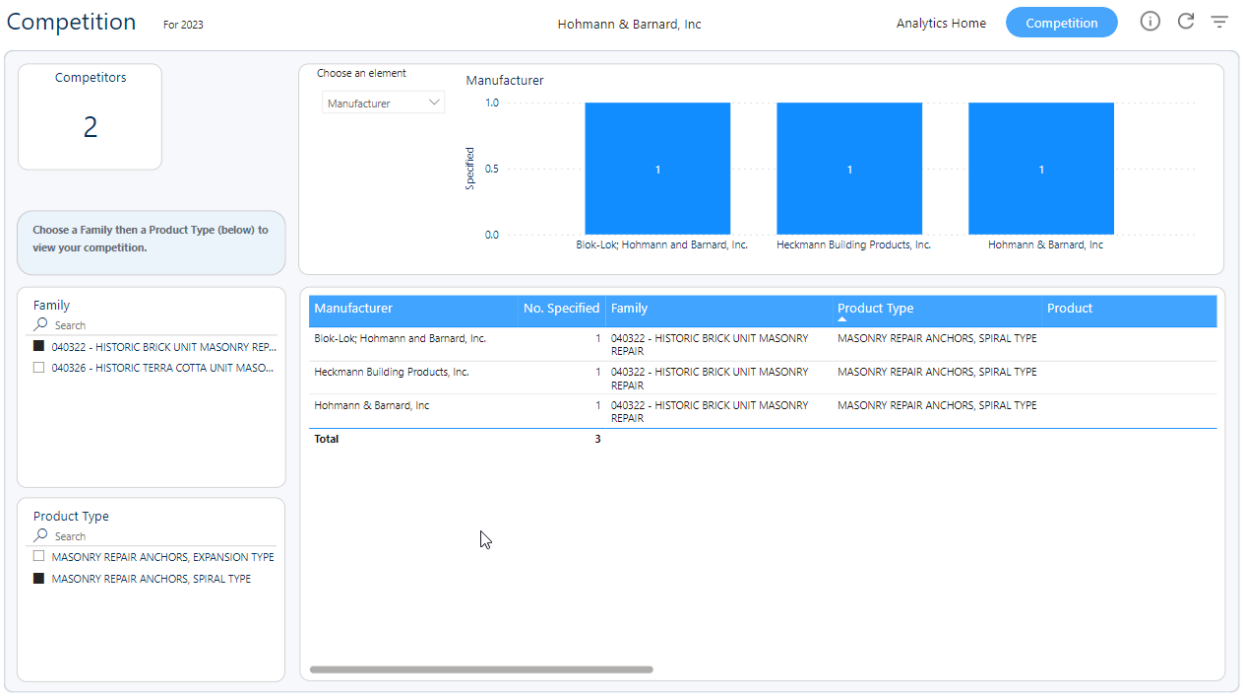
You can select data in a widget to filter data in the remaining other widgets. This allows you to sharpen your focus on desired data points and discover key connections in your product performances.



For example, you clicked a data point in the **Project Building Type Specified** widget, such as the specified count for **Office**. The platform filters the data in the **Project Phase Specified** and **Project Location Specified** widgets for only specified products for the **Office** building type.

## Competition Page

Use this page to view how product listings from other companies and manufacturers perform in the same family or product type. This enables you to research the product selection behavior of A/E design professionals.



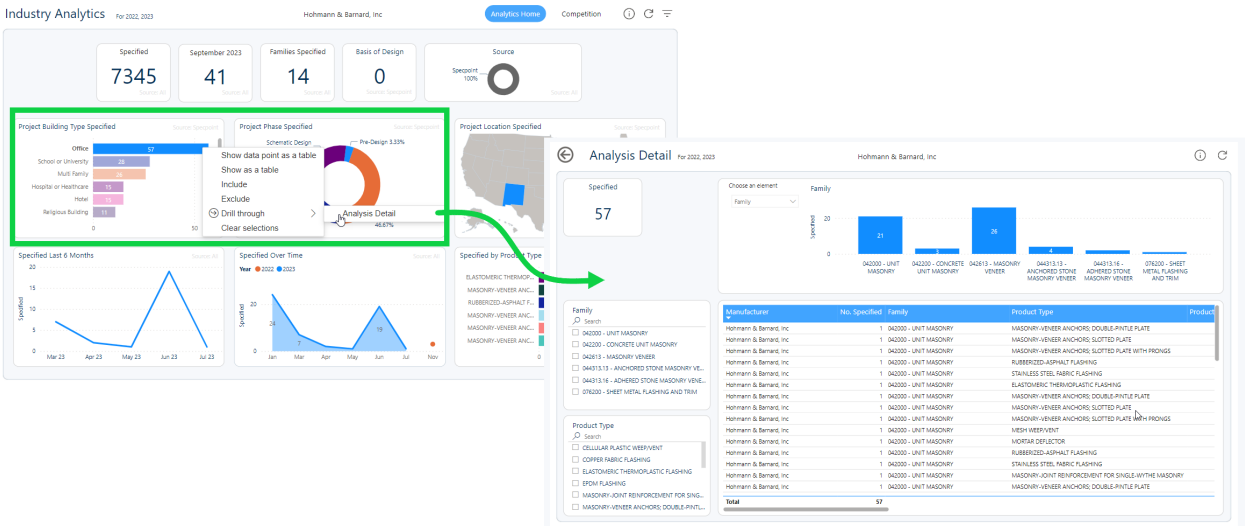
On this page, the following options are available:

| Option | Description |
|---|---|
| **Competitors (Count)** | Based on your selected Specpoint family and product type, this widget indicates the number of competitors for your BPM's product listing |
| **Element Chart** | Based on your selected Specpoint family, product type, and element, this widget displays the number of specified product listings on a chart. |
| **Manufacturer Specified List** | Based on your selected Specpoint family and product type, this widget lists all instances of the specified product listings in a project. |
| **Family Filter** | Select a Specpoint family to filter the **Competitors**, **Element Chart**, and **Manufacturer Specified List** on this page. |
| **Product Type Filter** | Select a product type to filter the **Competitors**, **Element Chart**, and **Manufacturer Specified List** on this page. |

## Drill Through and Analysis Detail Page

You can open data from a widget onto the Analysis Detail page. This allows you to drill through layers of data and analyze the available information based on a given widget's criterion.

The drill through feature is available for most widgets and charts on the Analysis Home page and the Competition page. To drill through data from a widget onto the Analysis Detail page, on the widget, right-click and click **Drill Through**.



| Option | Description |
|---|---|
| **Specified (Count)** | Based on the widget criterion and your selected Specpoint family and product type, this widget indicates the number of instances the product listings were specified in projects. |
| **Element Chart** | Based on your selected Specpoint family, product type, and element, this widget displays the number of specified product listings on a chart. |
| **Manufacturer Specified List** | Based on your selected Specpoint family and product type, this widget lists all instances of the specified product listings in a project. |
| **Family Filter** | Select a Specpoint family to filter the **Specified**, **Element Chart**, and **Manufacturer Specified List** on this page. |
| **Product Type Filter** | Select a product type to filter the **Specified**, **Element Chart**, and **Manufacturer Specified List** on this page. |

# Enhancements

This section includes summaries of the enhancements made to existing features in this release.

## Legacy Analytics

With the introduction of Specpoint's new industry analytics features, the platform now maintains the existing analytics features under Legacy Analytics. To access the legacy analytics features, click **Analytics » Legacy Analytics** on the navigation menu.

# Release 1.7.6

**Released:** September 13, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.7.5

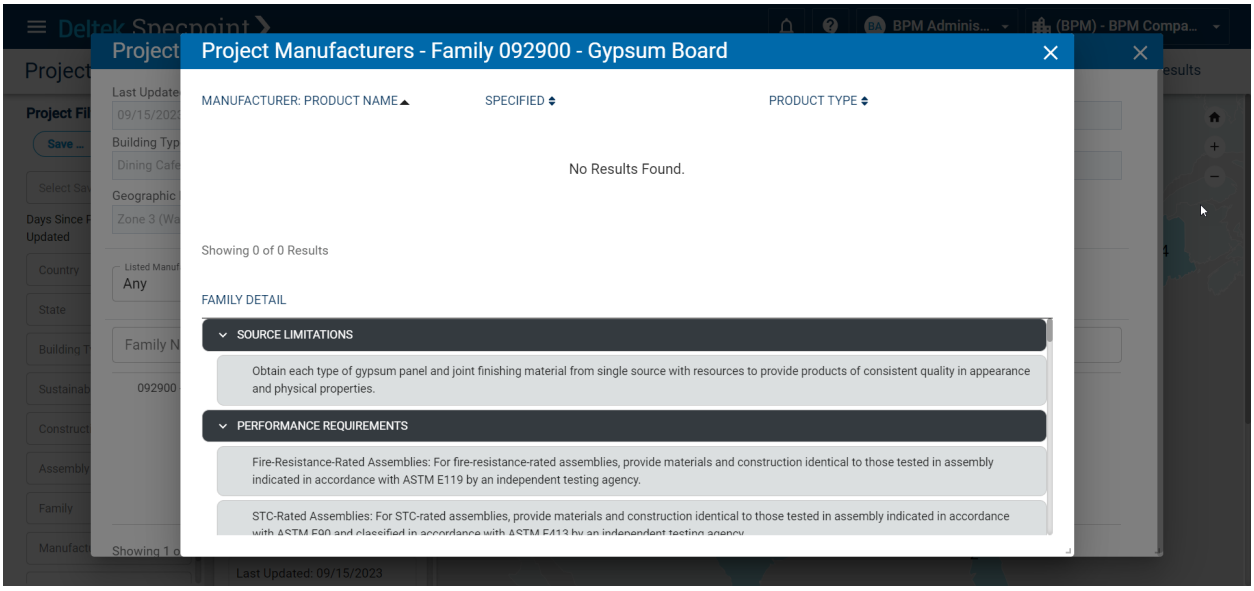
**Released:** September 7, 2023

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Project Research Map Performance

The Project Research Map on the home dashboard now includes improved performance. This enhancement includes the Project Overview Data window and the Project Manufacturers window.



You will realize improved loading times while viewing and researching project data on the map.

# Release 1.7.4

**Released:** August 31, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.7.3

**Released:** August 15, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.7.2

**Released:** August 9, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.7.1

**Released:** July 28, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.7

**Released:** July 24, 2023

## New Features

This section includes summaries of the new features in this release.

### Manufacturer Options

You can now use manufacturer options to include additional options to product properties for your BPM company's product listings. These options enable you to accurately describe products that specialize or innovate beyond MasterSpec's standard options. Manufacturer options are available in the following types:

| Type | Description |
|---|---|
| **Addition to MasterSpec Properties** | Add manufacturer options to existing MasterSpec properties. This allows you expand upon standard MasterSpec options for your product listings' standard properties. For example:<br>  |
| **New Manufacturer Property** | Add manufacturer options to create a new product property for your product listing. This enables you to specify a new dimension or aspect for a product listing and highlight its specialized application in construction projects. For example:<br> |

Manufacturer options are available only for Premium MasterSpec listings and Premium listings.

To add manufacturer options to your product listings, contact your customer support representative or reseller.

#### Properties on the Manage Listing Page

The Properties portion of the Manage Listing page includes new features for manufacturer options. For a given product listing, this portion now divides the listing's MasterSpec properties and manufacturer properties into the following lists:

| List | Description |
|---|---|
| **MasterSpec Properties** | These properties are standard or baseline properties based on the product listing's MasterSpec product type. For each property, Specpoint displays both |

| List | Description |
|---|---|
| | selected options and cleared/unselected options to provide users industry information about the property.<br>  <br>A MasterSpec property can have a combination of the following option types:<br>▪ MasterSpec options<br>▪ Manufacturer options |
| **Manufacturer Properties** | These properties are additional properties that are specific to a BPM company and its product listings.<br>A manufacturer property can have only manufacturer options. |

For each product property, the following property options are available:

| Property Option | Description |
|---|---|
| **MasterSpec Options** | These are standard or baseline options and are available by default for only MasterSpec properties under MasterSpec product types.<br>When selected, a MasterSpec option displays in green font in display mode or as a green pill in edit mode. |
| **Manufacturer Options** | These are additional options that are specific to a BPM company and its product listings. Manufacturer options are available for both MasterSpec properties and Premium General Distribution product properties.<br>When selected, a manufacturer option displays in blue font in display mode or as a blue pill in edit mode. |

In addition, the following general options are now available:

| Option | Description |
|---|---|
| **Manufacturer Options** | Click this button to open the Manufacturer Options window and learn about the MasterSpec options and manufacturer options for the product listing. |
| **Info Icon** | Click this icon to view the legend for the available property options.<br>**Display Mode:** |

| Option | Description |
| --- | --- |
| |  <br>**Edit Mode:**<br>  |

## Manufacturer Options Window

As a BPM administrator or author, you can now use this window to view the available product properties, both MasterSpec and manufacturer, for your BPM's product listing. In addition, this tab informs you about manufacturer options and how you can enable them for your product listings.

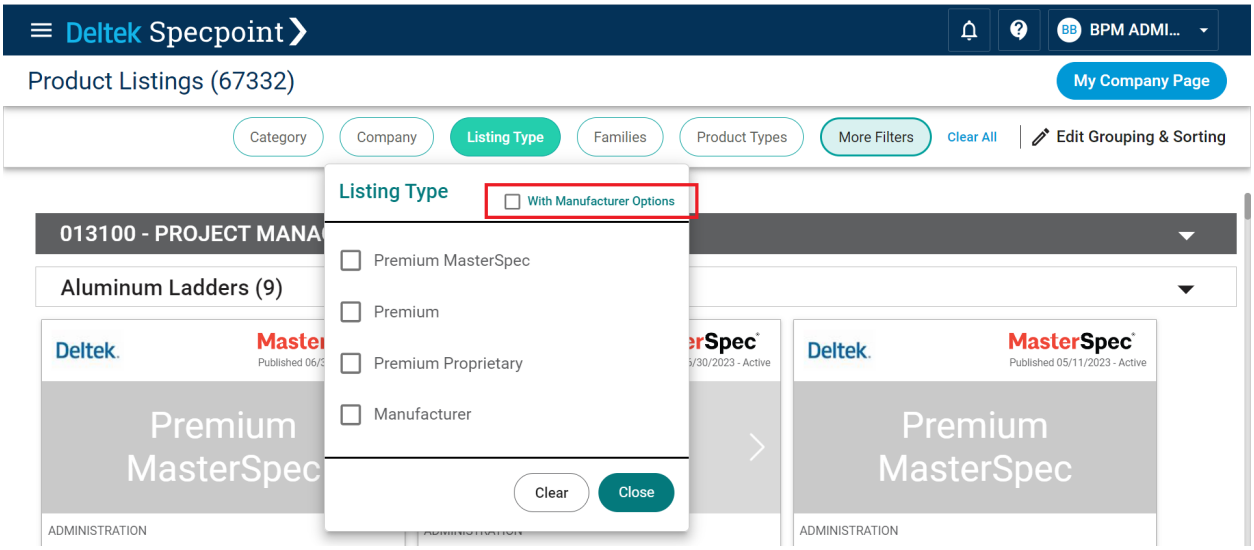
On this window, the following main features are available:

| Feature | Description |
| --- | --- |
| **Info Icon** | Click this icon to view the legend for the available property options. |

| Feature | Description |
|---|---|
| |  |
| **MasterSpec + Options Tab** | This tab displays the available MasterSpec properties for the product listing. This includes each property's options, which include both MasterSpec options and manufacturer options. |
| **Manufacturer Options Tab** | This tab displays the available manufacturer properties for the product listing. This includes each property's options, which include only manufacturer options. |

## Manufacturer Options Filter

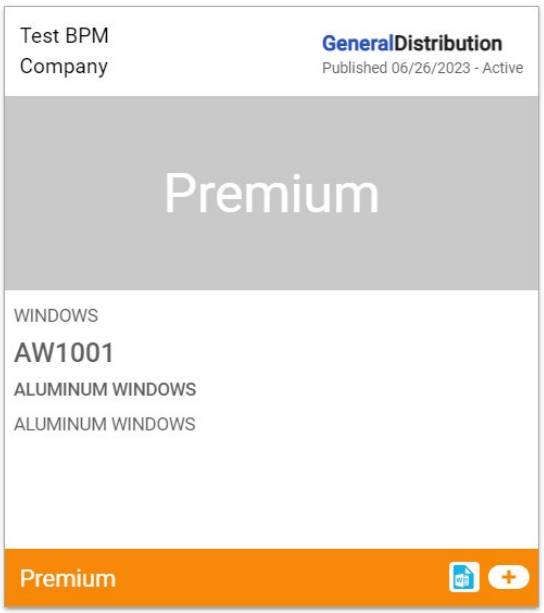
The Product Listings page includes a **With Manufacturer Options** option within the **Listing Type** filter. You can select this option to filter only product listings that include manufacturer options.



**Note:** Selecting this option limits the Listing Type filter to only the **Premium MasterSpec** and **Premium** options.

## Product Listing Card Indicator

On the Product Listings page, product listing cards for product listings that include manufacturer options include a plus icon . Use this icon to quickly identify product listings with additional product properties or additional property options.



# Release 1.6

**Released:** June 29, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.5.8

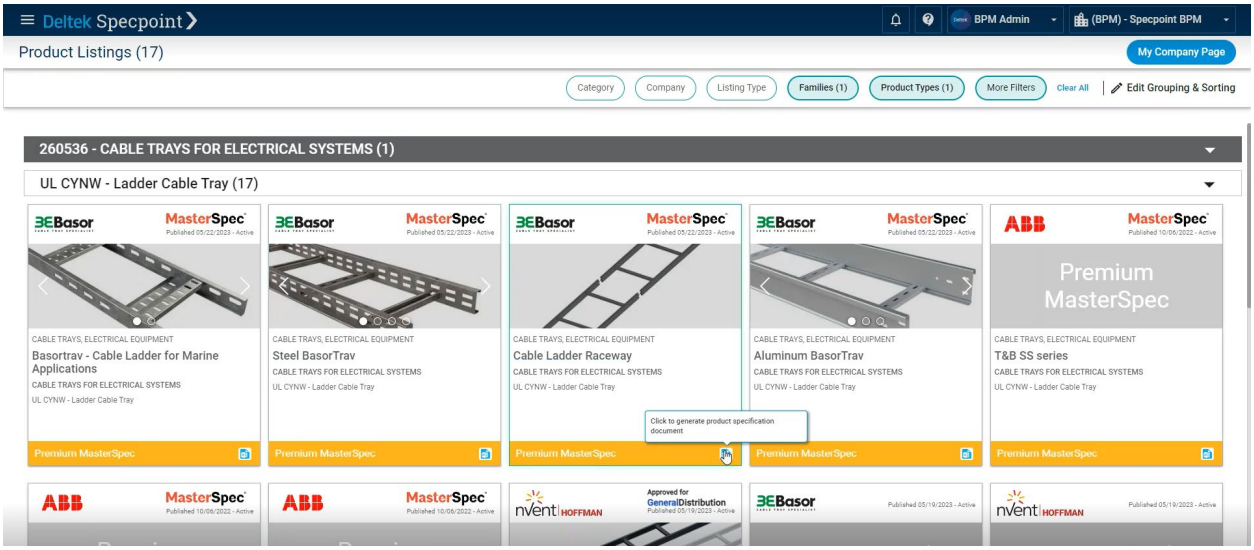
**Released:** June 14, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Missing Product Specification Documents

**Bug 1929737:** For product listings under the **260536 Cable Trays for Electrical Systems** family, the auto-generated product specification documents were not available. Specification writers were unable to download and use this resource in their project specifications.



# Release 1.5.7

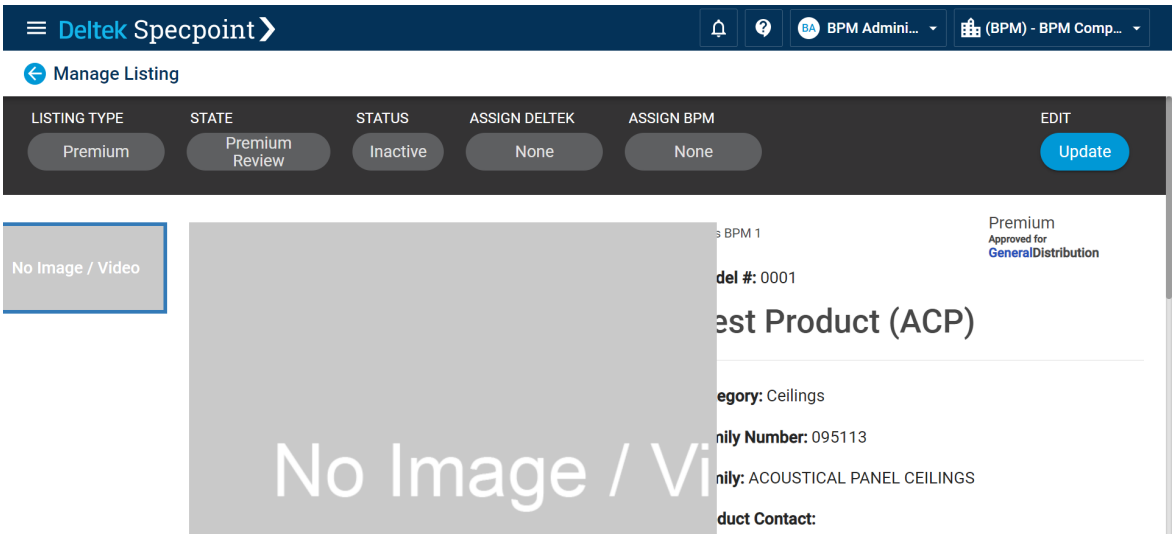
**Released:** May 17, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

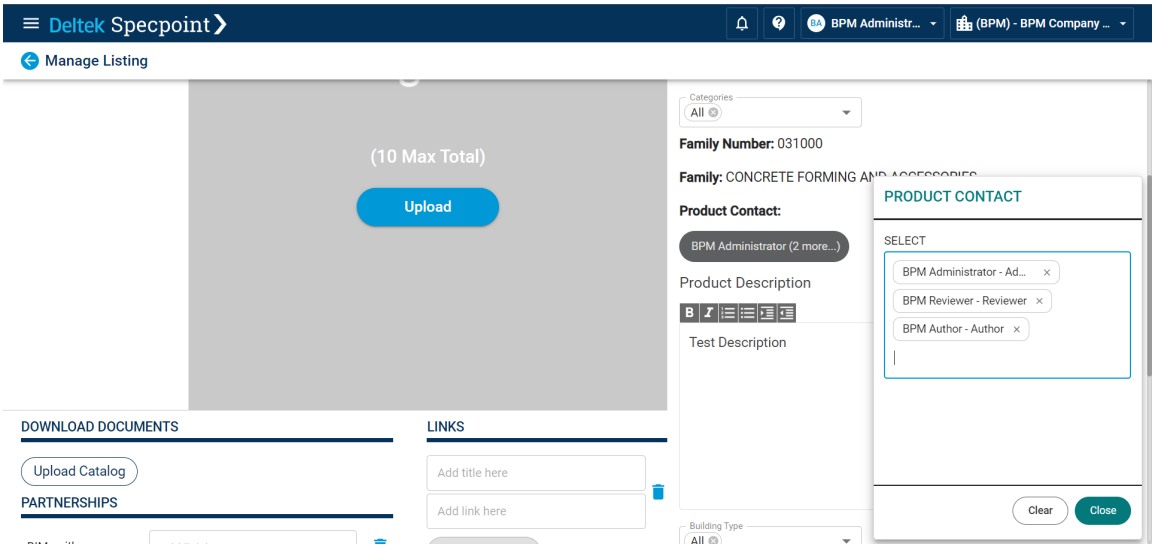
### Product Image Placeholder Overlap

**Bug 1921395:** On the Manage Listing page for a product listing that did not have an uploaded image or video, the image placeholder overlapped other page contents when you zoomed the browser to 150%.



### Product Contact Retention

**Bug 1932348:** The Manage Listing page for a product listing did not reflect your additions and removals in the **Product Contact** field. As a workaround, you needed to refresh the page.



# Release 1.5.6

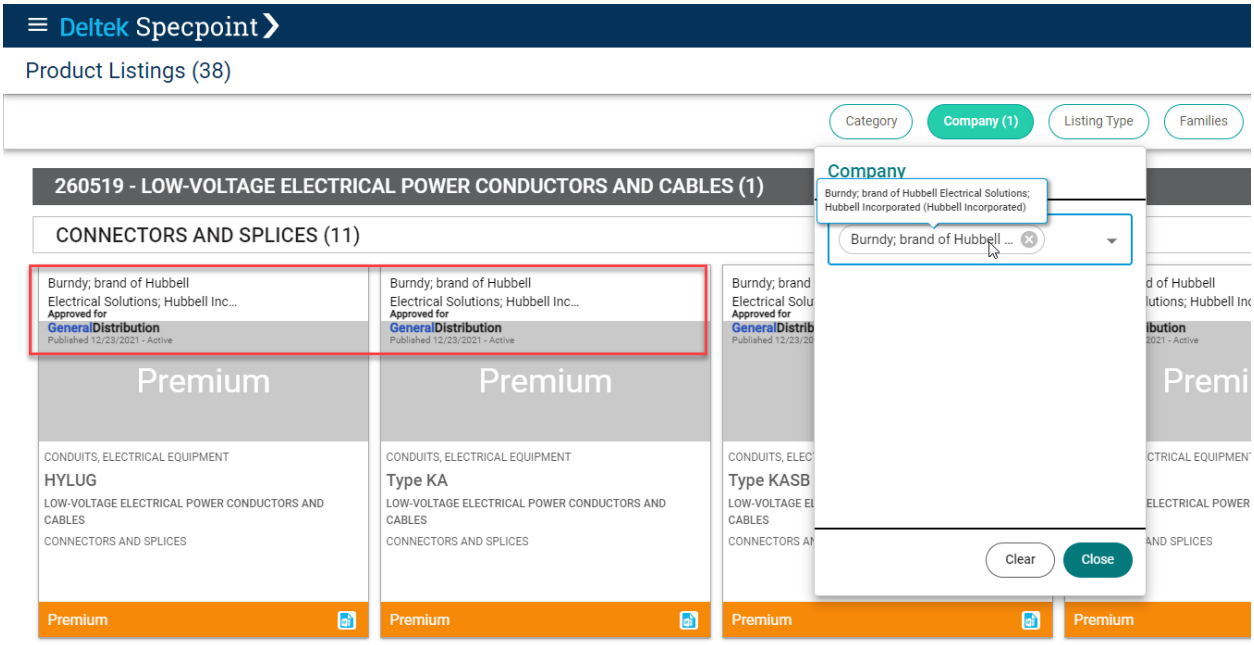
**Released:** April 26, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Product Listing Card Alignment

**Bug 1708209:** For product listings of BPM companies that have long company display names, their respective product listing cards displayed misaligned distribution labels, such as **MasterSpec** and **Approved for General Distribution**.



### Assign BPM Option Alignment

**Bug 1899027:** On the Manage Listing page for your BPM's product listing, the **Assign BPM** option displayed on the next line without any spacing from the edge of the header/secondary toolbar. This issue applied in cases of long values for options on the header/secondary toolbar.

Test Description

# Release 1.5.5

**Released:** April 12, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.5.4

**Released:** April 5, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

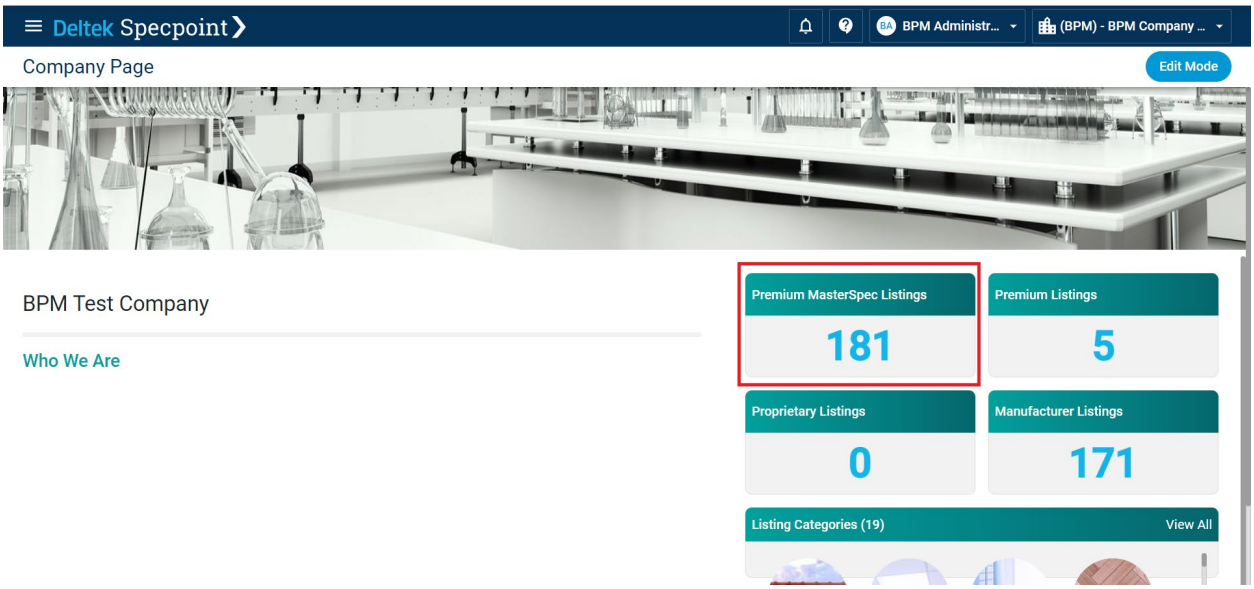
### Inconsistent BPM Company Name

**Bug 1883985:** For select BPM companies, their company names were inconsistent throughout the platform, such as on the Company page, a product listing card, and a Manage Listing page. Typically, this issue affected company names that included case changes. For example, a BPM company changed a few letters in its company name from lowercase to uppercase, such as Test-bpm and Test-BPM.

This issue affected search results on the Product Listings page when you used the **Company** filter as this filter is case sensitive.

### Incorrect Count for Premium MasterSpec Listings

**Bug 1911410:** On the Company page for select BPM accounts, the Premium MasterSpec Listings tile displayed an incorrect count of the BPM's premium MasterSpec product listings.

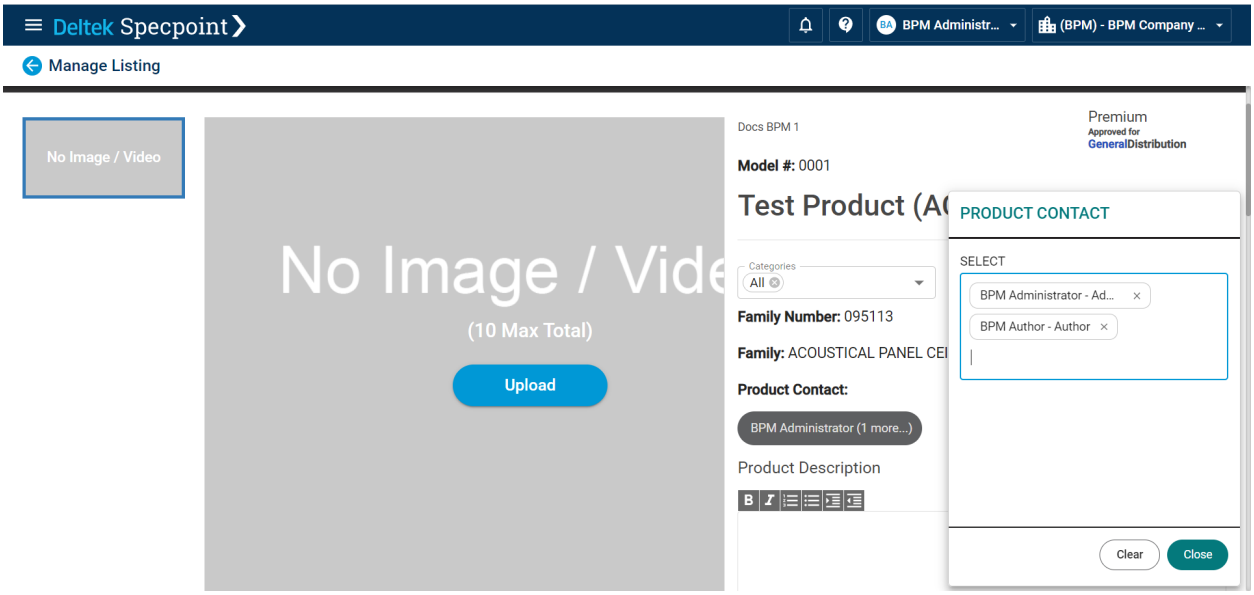


### Incorrect Categories for Product Listing Cards

**Bug 1894470:** Select newly created product listings had Generic Models as its default category.

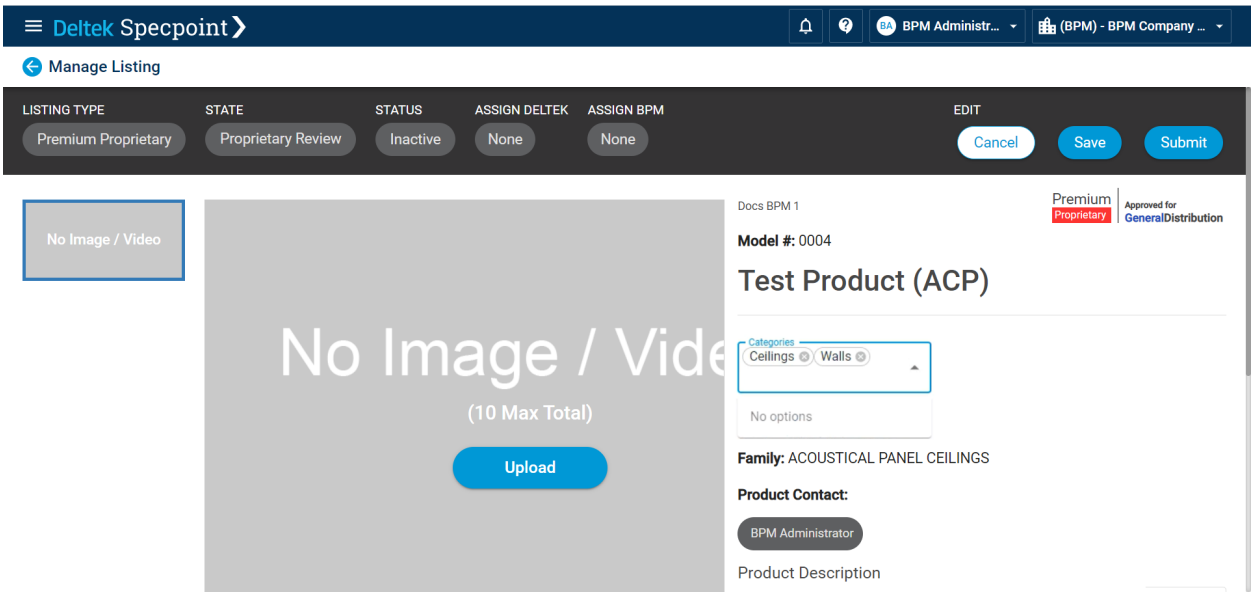
## Modifying Product Contacts

**Bug 1715141:** When you modified the product contacts of your BPM's product listing, the Manage Listing page did not retain your modifications.



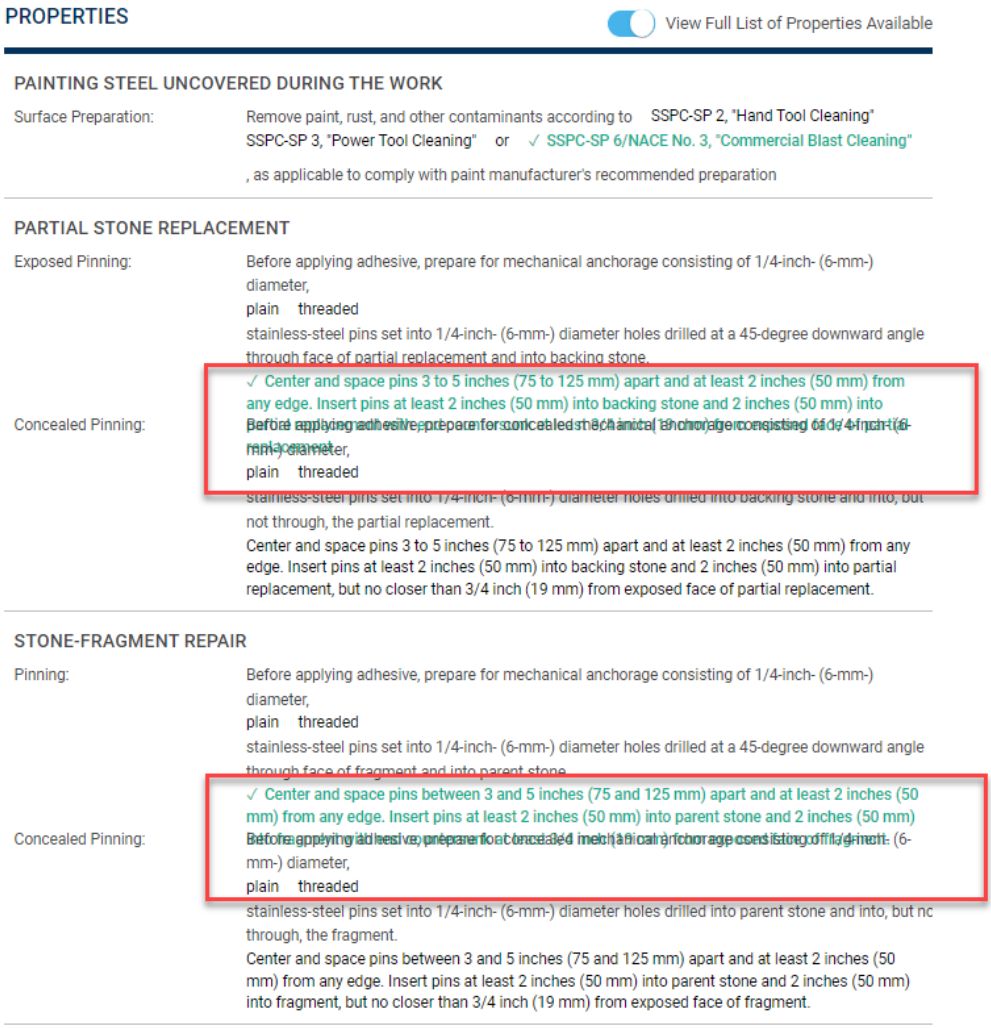
## Modifying Categories of Proprietary Listings

**Bug 1894258:** You were unable to modify the categories of your Premium Proprietary product listings based on existing families. On the Manage Listing page in edit mode, the **Category** option displayed a **No options** message instead of the available categories. This prevented you from selecting new categories.



# Overlapping Property Text

**Bug 1912047:** For select product listings, the Properties portion of the Manage Listing page displayed overlapping text for product type properties.



# Release 1.5.3

**Released:** March 23, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.5.2

**Released:** March 16, 2023

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Categories for Product Listings

You can now assign specific building categories to your product listings. This allows you to more accurately define the possible purposes and projects for which a product is useful.

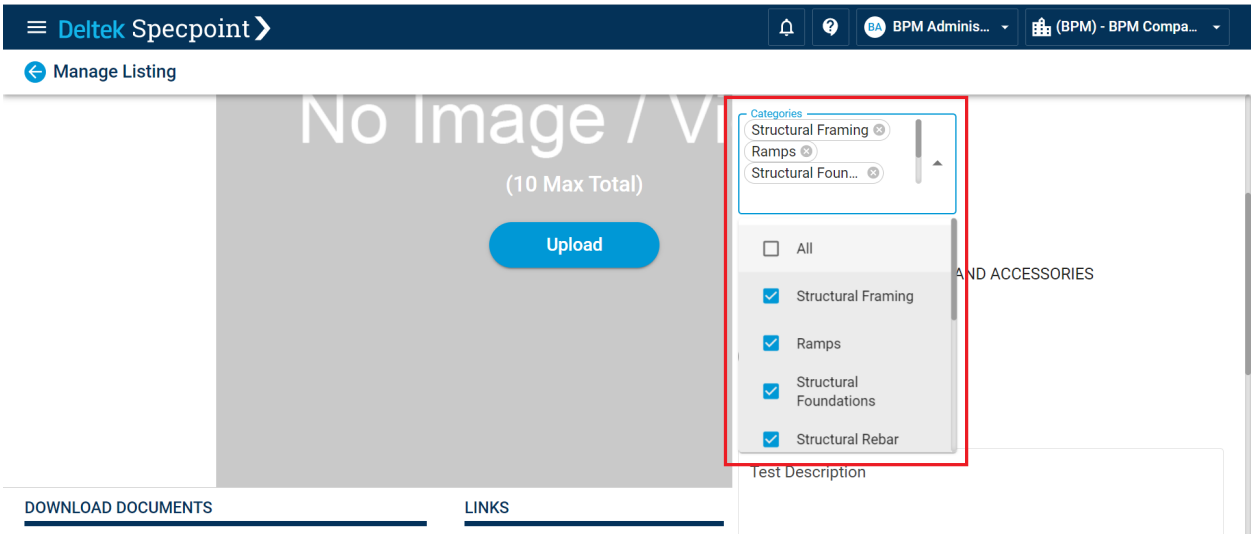
For a given product listing, the Manage Listing page and Product Detail page list the assigned categories for the listing. This provides customers with an enhanced experience in filtering product listings by category as well as a better understanding on manufacturer intent on the listing.

**Category:**

Structural Framing, Ramps, Structural Foundations, Structural Rebar, Walls, Structural Columns, Structural Beam Systems, Floors

**Family Number:** 031000

By default, all listings fall under all categories. On the Manage Listing page in edit mode, use the **Categories** field to select one or multiple building categories under which a given product listing is applicable.



The available categories that you can select from depend on the product listing's assigned family. In addition, you can perform the following actions in the **Categories** field:

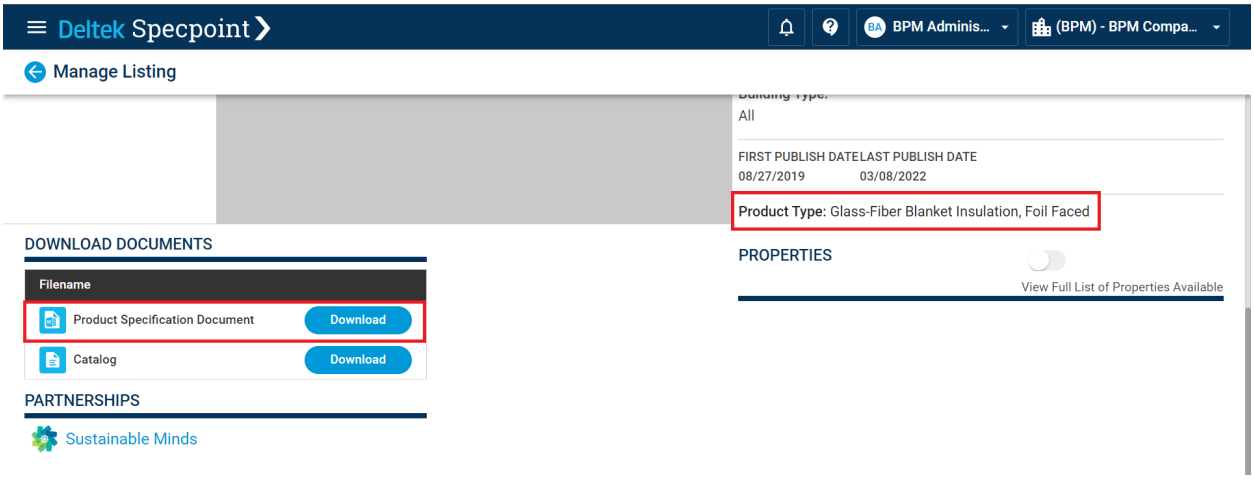
- To search for a category, enter a category in this field.
- To remove a selected category, click the **x** in the category pill.

# Software Issues Resolved

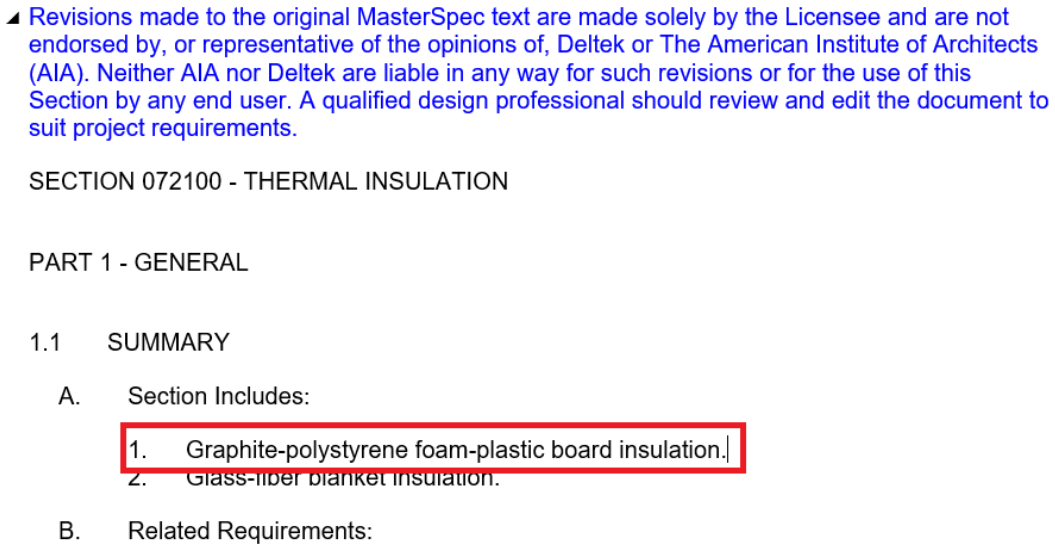
This section includes summaries of the resolved software issues in this release.

## Product Type Name in Product Specification Document

**Bug 1838982:** For select product listings, auto-generated product specification document included the incorrect product type name in its document contents.



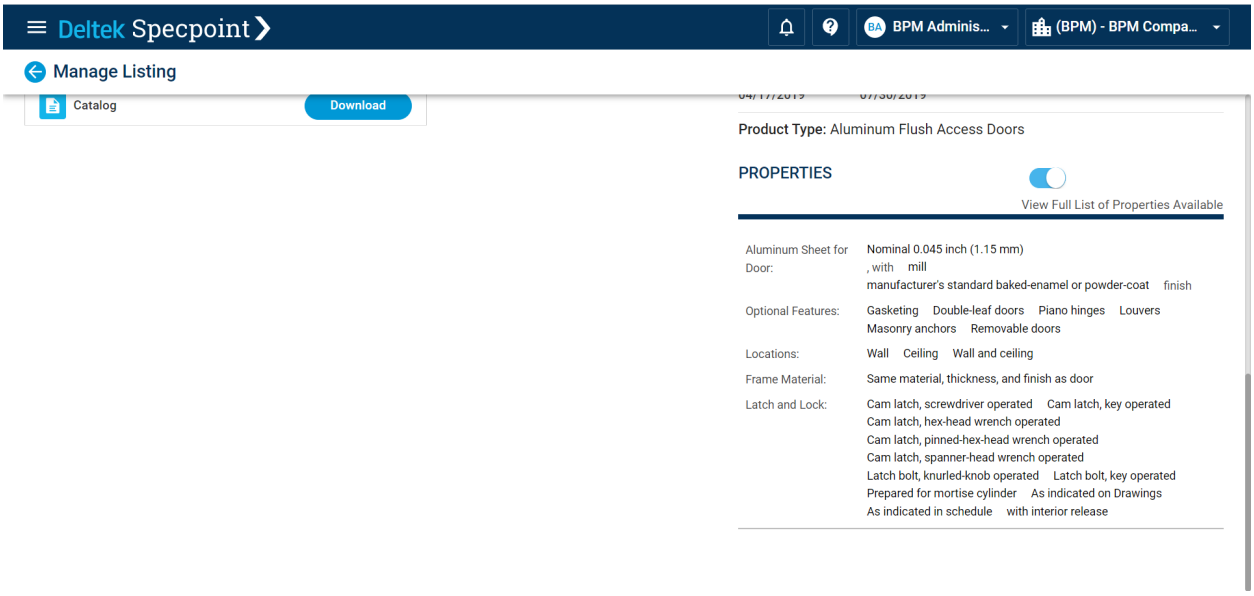
The indicated product type in the product listing card and the Manage Listing page is different from the indicated product type in various locations throughout the product specification document.



This issue applied to select product types under select families such as the **Glass-Fiber Blanket Insulation, Foil Faced** product type under the **072100 Thermal Insulation** family.

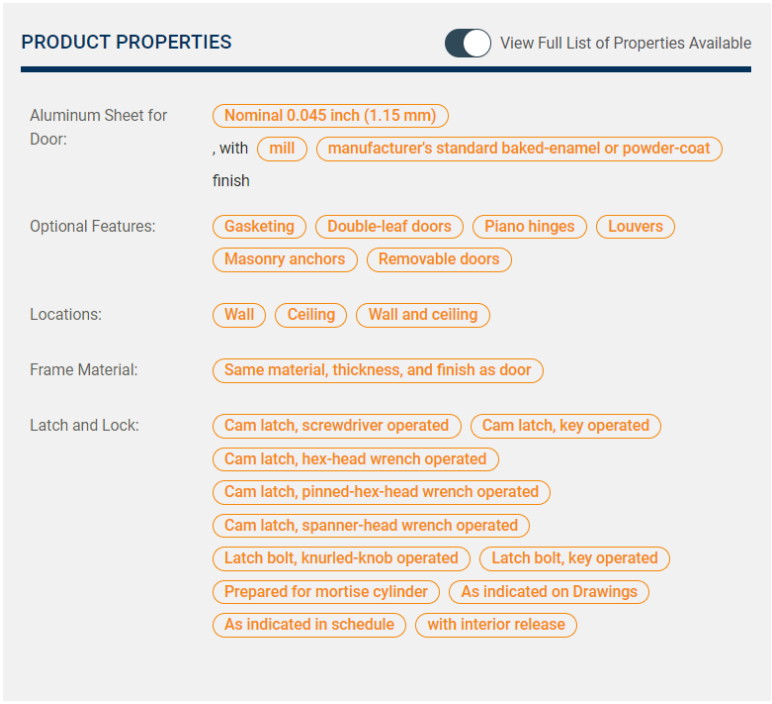
# Incomplete Product Type Properties

**Bug 1860094:** In Specpoint BPM, product listings of specific product types did not have complete product type property options on the Manage Listing page.



This is in comparison to the following data in Specpoint A/E:

- The same product listings in the Product Listings window
- Baseline product specification contents



# Release 1.5.1

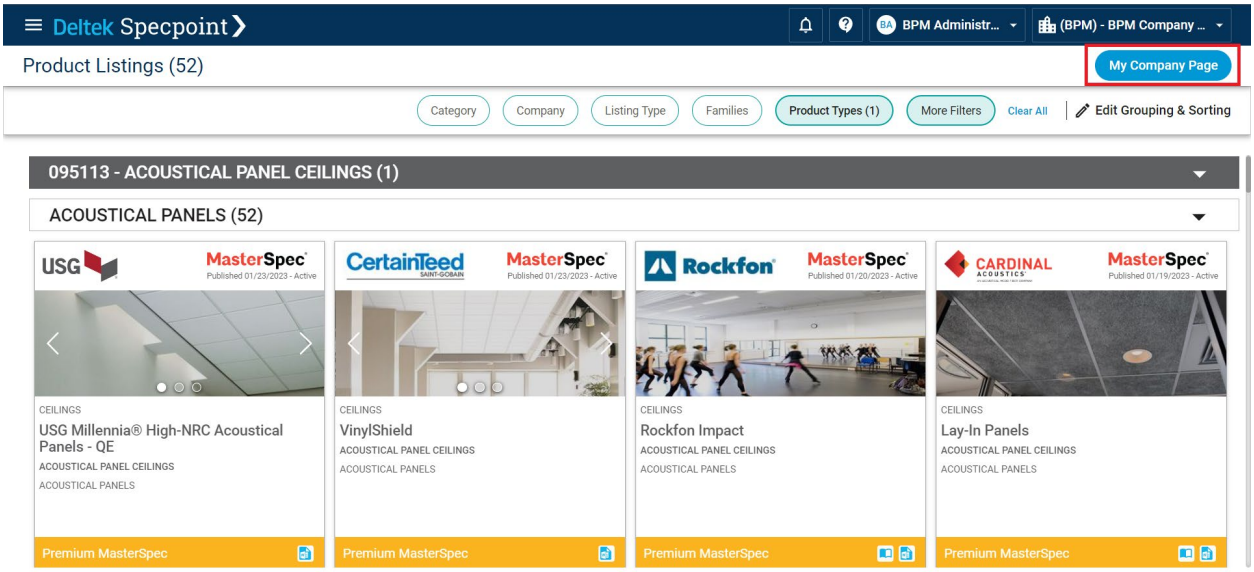
**Released:** March 6, 2023

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### My Company Page Access

**Bug 1884172:** On the Product Listings page, the **My Company Page** button was unresponsive. You were unable to access the Company page for your BPM.



# Release 1.5

**Released:** February 28, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.4.2

**Released:** February 7, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.4.1

**Released:** February 3, 2023

## Software Issues Resolved

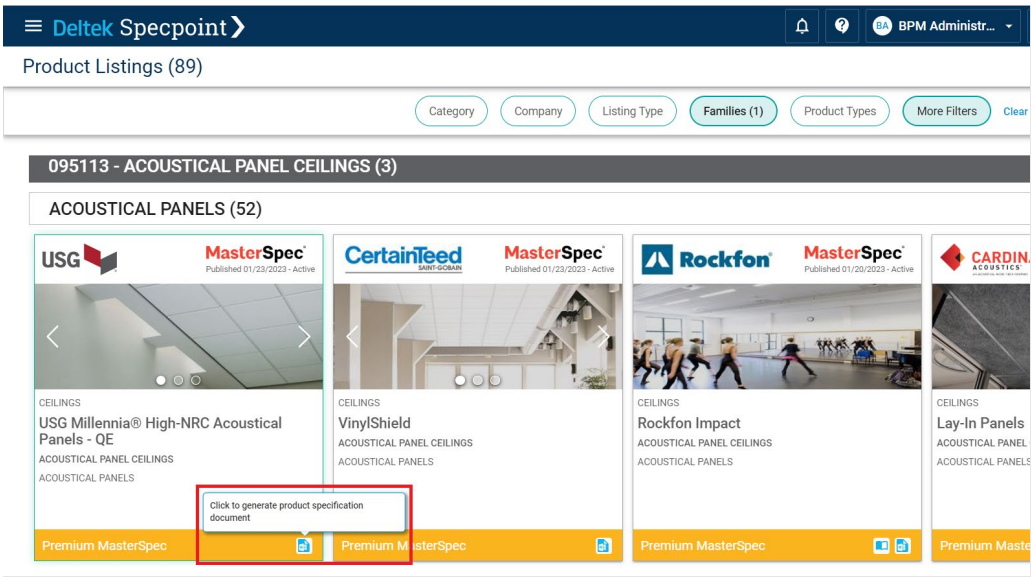
This section includes summaries of the resolved software issues in this release.

### Unavailable Product Specification Document

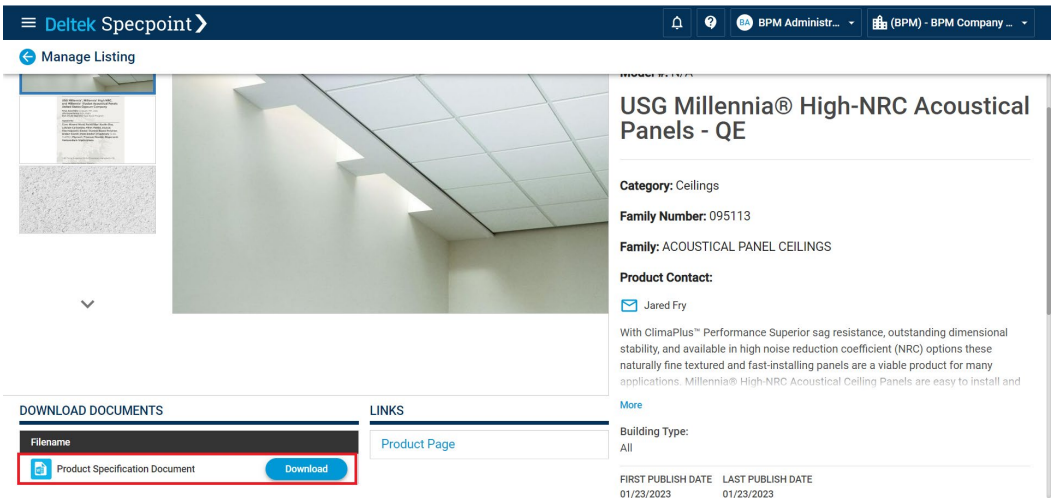
**Bug 1870246:** You were unable to download the product specification document, which Specpoint automatically generates, for all product listings. When you clicked the available options for download, the platform did not respond.

The product specification document is available for download in the following locations:

- On a product listing card on the Product Listings page



- Under Download Documents on the Manage Listings page



# Release 1.4

**Released:** February 1, 2023

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.18

**Released:** December 15, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.17

**Released:** December 15, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.16

**Released:** December 6, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.15

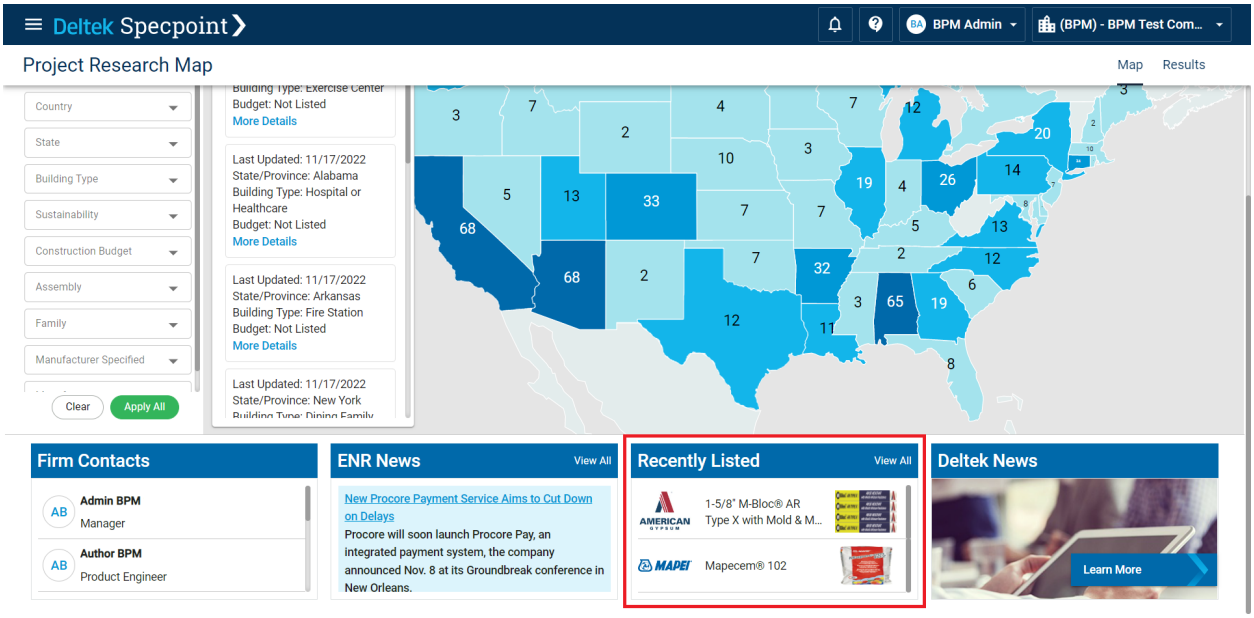
**Released:** December 1, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Recently Listed Product Listings

The Recently Listed widget on the home dashboard displays only product listings of type Premium MasterSpec, Premium, or Premium Proprietary.



The widget no longer displays Manufacturer listings.

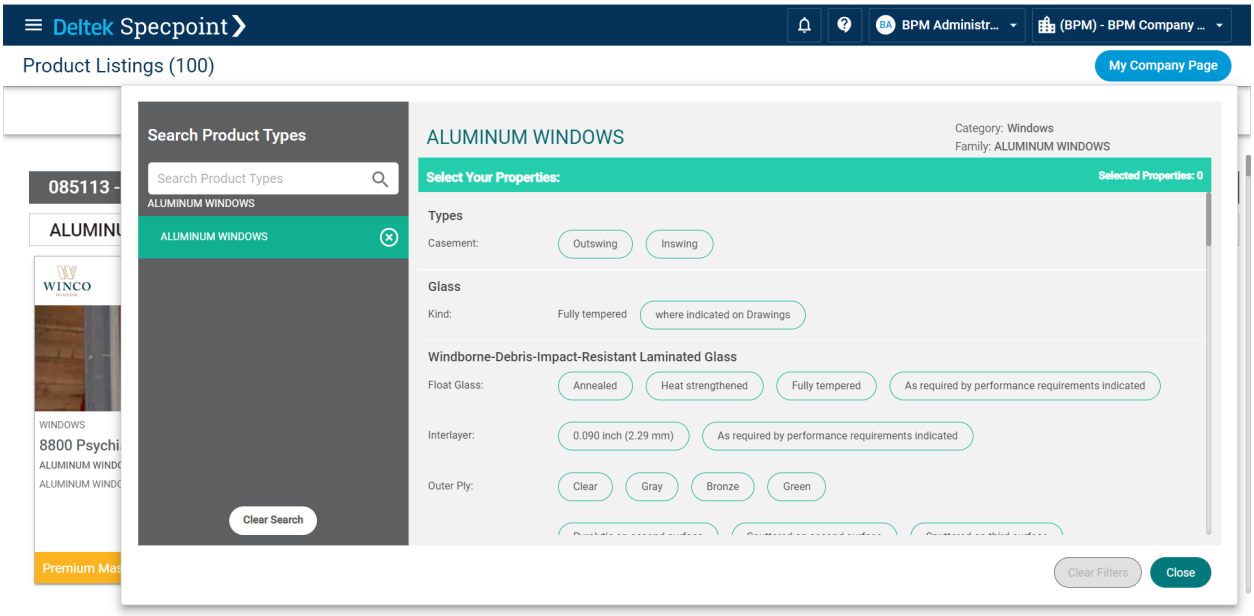
## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Product Type Filter

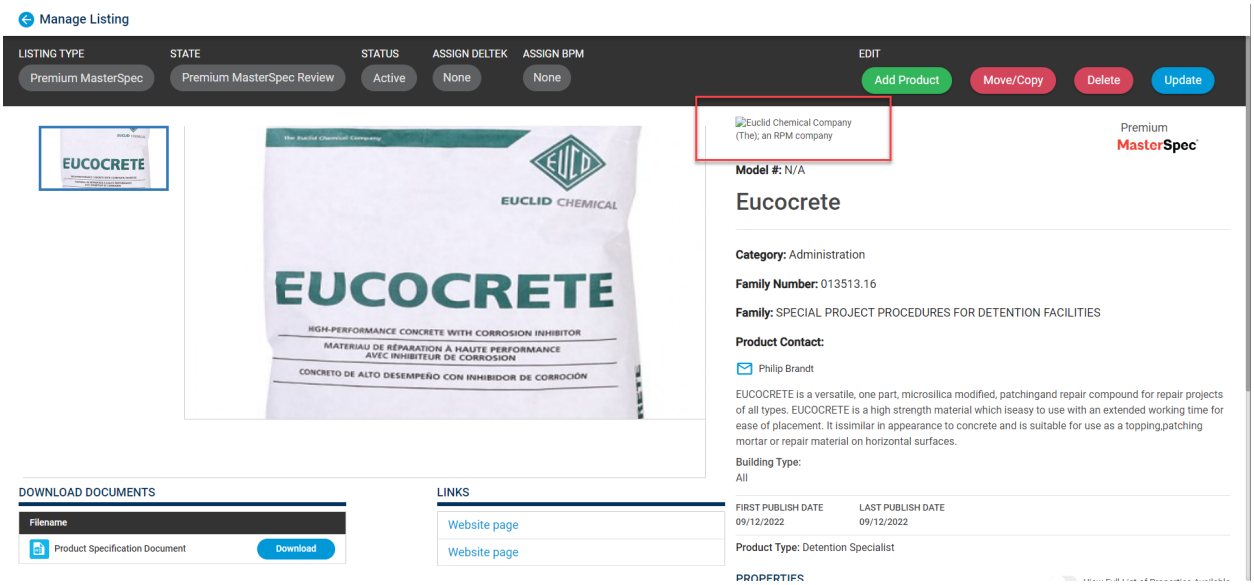
**Bug 1690038:** You encountered the following issues with the Product Type filter on the Product Listings page:

- The **Clear Filter** button was not available.
- When you navigated back to the Product Listings page from the Manage Listings page, the filter did not retain your product type property selections under Select Your Properties.



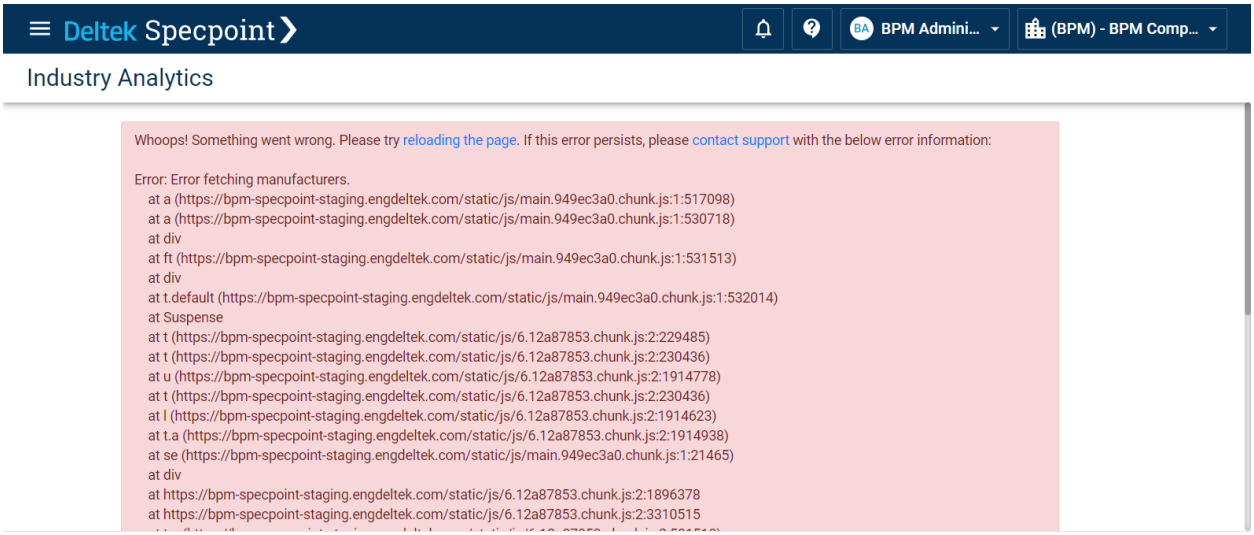
## Broken Images

**Bug 1727767:** Some images of product listings as well as corporate logos did not load on the Manage Listings page.



# Industry Analytics Page

**Bug 1704793:** When you navigated to the Industry Analytics page (by clicking **Industry Analytics** on the navigation menu), the page displayed an error message and failed to load its contents.



**Note:** The Industry Analytics feature is optional and may not be available for all BPM accounts. For more information, contact your Deltek onboarder.

# Release 1.3.14

**Released:** November 18, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.13

**Released:** November 3, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.12

**Released:** November 3, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Email Help Desk Option

**Bug 1763831:** On the Help menu ( ), the Email Help Desk option was unresponsive. You were unable to click » **Email Help Desk** to contact Deltek Specpoint's dedicated help desk or your firm’s designated account administrator as applicable to your permission.

# Release 1.3.11

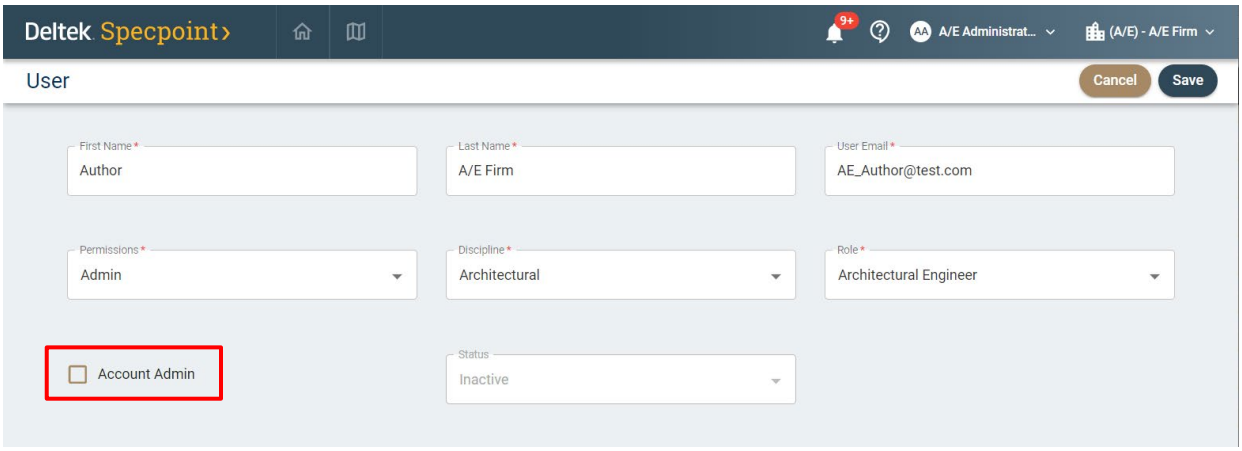
**Released:** October 17, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Unexpected Change in User Status

**Bug 1761036:** Whenever an administrator edited a user account and modified the **Account Admin** option on the User page, the user received a **Status** of **Inactive**.



This issue did not require any changes to the user's assignment as the designated account administrator. modifying the **Account Admin** option pertains but is not limited to the following:

- Selecting the option
- Clearing the option selection
- Selecting the option and then clearing the option selection
- Clearing the option selection and then selecting the option

# Release 1.3.10

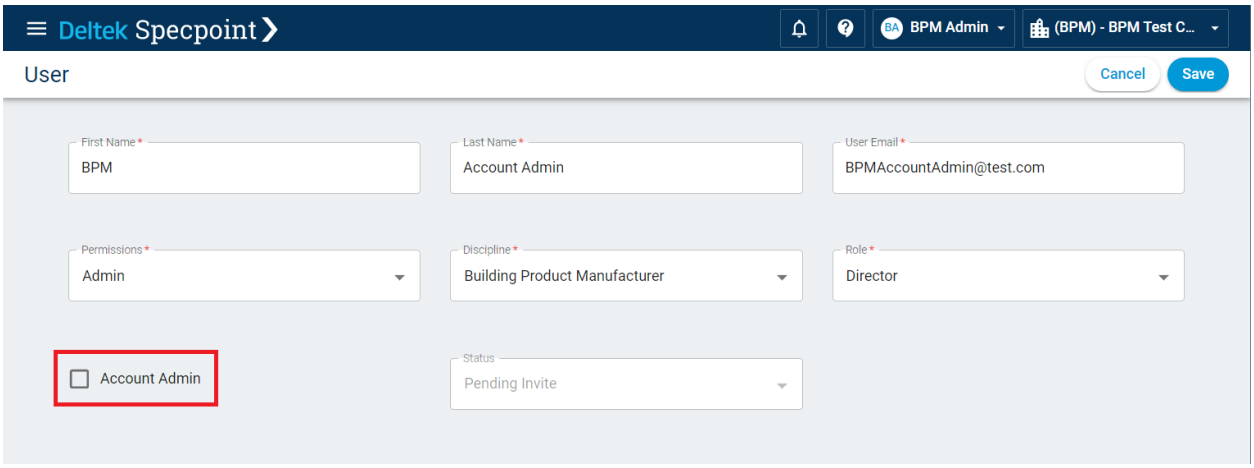
**Released:** October 12, 2022

## New Features

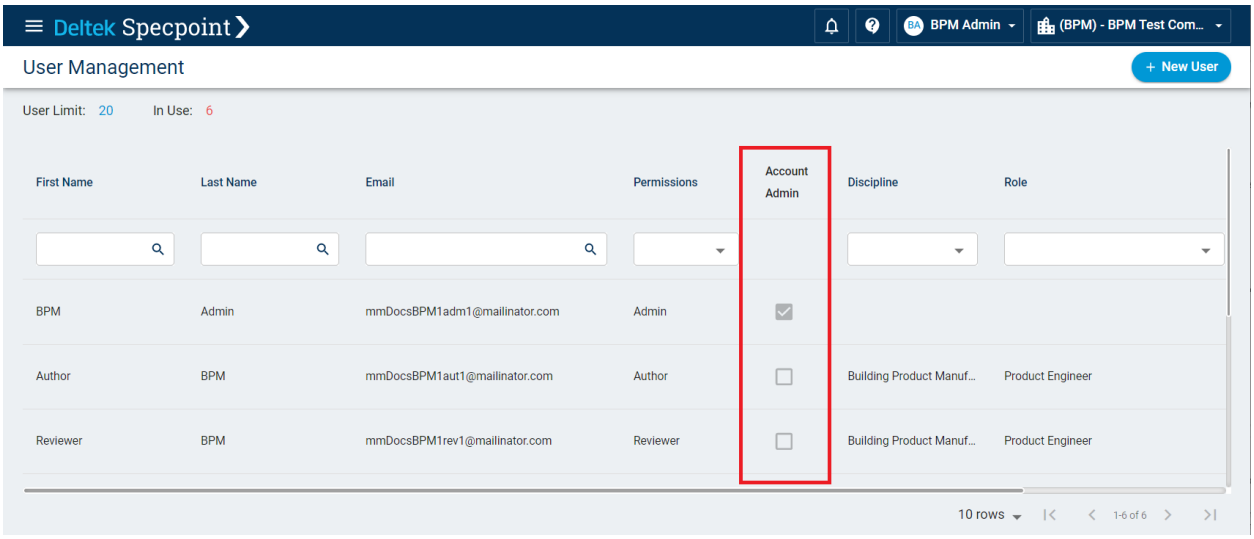
This section includes summaries of the new features in this release.

### Account Administrator Assignment

Administrators can reassign the designated account administrator role for their BPM firm. A BPM can have only one account administrator, which is typically the first Specpoint user of your BPM. You no longer need to contact your Deltek onboarder or Deltek customer care to assign a new account administrator.

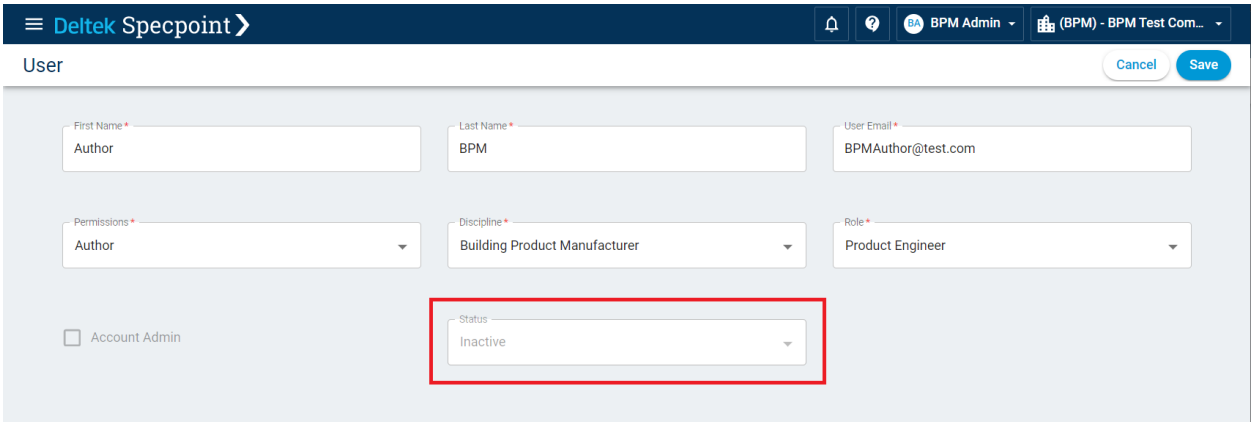


The User page includes the **Account Admin** option, which you can select to assign the user as the account administrator. This option is available for both creating a user and modifying a user. On the User Management page, the list of users includes an **Account Admin** column to allow you to easily identify the designated account administrator.



## Addition of Users over the User Limit

Administrators can add new users even if your BPM reached the **User Limit**. A new user added beyond the limit will receive a **Status** of **Inactive** and will not receive a welcome email, which enables the user to create a new password and set up a user account.



In addition, the User page displays a warning message regarding the user limit after you click **Save**.

This feature allows administrators to add users in a queue for standby while waiting for the user limit to increase or while waiting for a user count to free up.

# Enhancements

This section includes summaries of the enhancements made to existing features in this release.

## Updated Values for Construction Budget

To stay relevant with the current scaling of costs for construction, the Construction Budget project parameter has the following updated values:

- Not Listed
- $0–$5 Million
- $5–$20 Million
- $20–$50 Million
- $50–$100 Million
- $100–$250 Million
- $250–$500 Million
- More than $500 Million

This enhancement affects mainly A/E firms in Specpoint when they create and modify projects.

For BPMs, this enhancement applies to the available project data which you can use in your research. For example, the Project Research Map reflects both the updated values and the previous existing values based on existing project data. Similarly, the **Construction Budget** filter field contains both the updated values and previous values as applicable.

# Release 1.3.9

**Released:** October 5, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.8

**Released:** September 30, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.7

**Released:** September 27, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.6

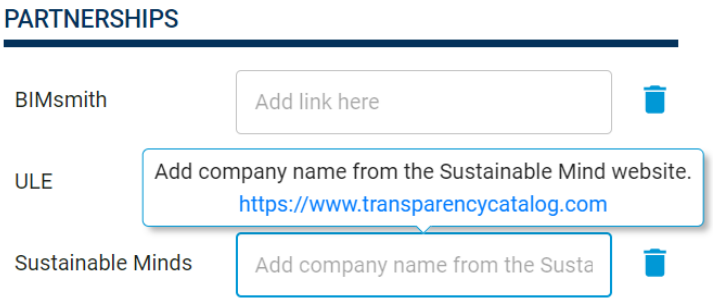
**Released:** September 23, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Default URL for Sustainable Minds Partnerships

The Sustainable Minds URL include the default base or prefix: https://www.transparencycatalog.com/



In edit mode of the Manage Listing page, entering a value in the **Sustainable Minds** field under Partnerships adds that value to the default prefix. For example, if you enter **CompanyName** in the **Sustainable Minds** field, Specpoint registers and saves the URL as https://www.transparencycatalog.com/CompanyName. This assists you in entering the correct URL for your product lisitng and for your company.

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Inconsistent Wires Category

**Bug 1696296:** Multiple locations of the platform listed the Wires category as Wire. All instances of Wire has been converted to Wires.

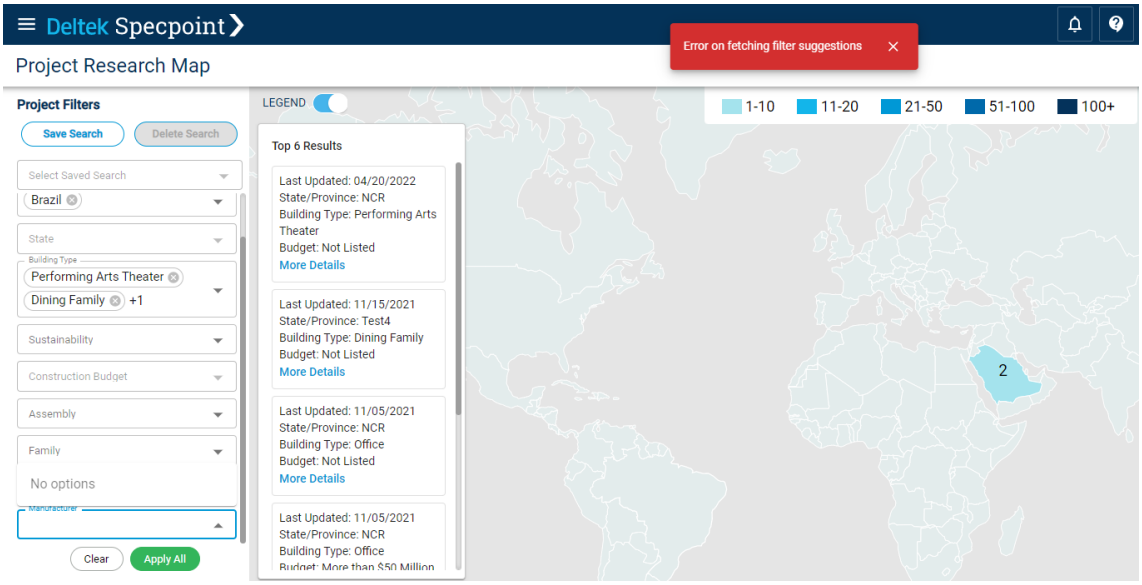
This includes the following locations:

- The Categories filter of the Product Listings page

- The Listing Categories tile of the Company page

## Project Research Map Filters

**Bug 1738789:** The Project Research Map displayed an error when you set filters that caused other filters to not have any available options. Your selection in a filter field affects the available options in other filter fields based on the remaining project data.



For example:

- In the **Country** field, you selected **Saudi Arabia** and **Philippines**.
- In the **Building Type** field, you selected **Performing Arts Theater**, **Dining Family**, and **Office**.

If these selections lead to no remaining project data and you clicked the **Manufacturer** and **Assembly** fields to select options, in which none are available, the platform displayed an error.

# Hotfix Release 1.3.5

**Released:** September 15, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Hotfix Release 1.3.4

**Released:** September 7, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.3

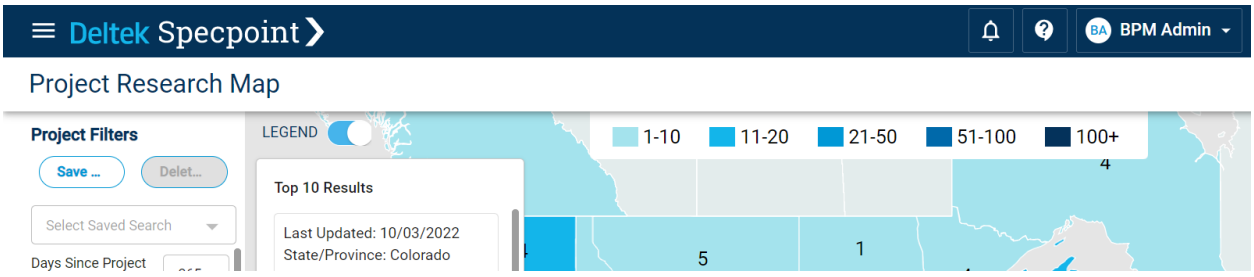
**Released:** September 1, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### MasterSpec Content Update Notifications

For version 1.3.3 and later, users from BPM firms no longer receive notifications for MasterSpec content updates. This reduces distraction and risk of misinterpretation for users in your BPM.



## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Inactive User Access

**Bug 1716859:** For reseller firms, inactive users were able to log into Specpoint.

### Manage Listing Page

**Bug 1725482:** For select product listings, the Manage Listing page failed to load the information and displayed a blank page.

### A/E Product Selection

**Bug 1729191:** This bug applied to users of Specpoint for A/E firms. With a product type element selected in the project workspace, the manufacturer paragraph did not include some manufacturers with active manufacturer listings as options in the paragraphs option set.

# Release 1.3.2

**Released:** August 11, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3.1

**Released:** August 1, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.3

**Released:** July 22, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Product Contact Information

On the Manage Listing page, a product listing now includes contact information for the product's manufacturer/BPM. A product listing can have multiple contact persons. For each contact person, the following information is available:

- : Click this icon to open your default email application and email the manufacturer.
- **Name**: This indicates the contact person's name.
- **Contact Number**: This indicates the contact person's phone or mobile number.

As an author or administrator, you can now manage the contact persons for your BPM's product listings. On the Manage Listing page in edit mode, you can select active registered users from your BPM as contact persons for a product listing. Product contacts are available only for product listings of type Premium MasterSpec, Premium, and Premium Proprietary.

# Release 1.2.21

### Displaying Product Listing Cards

**Bug 1663123:** Some product listing cards incorrectly or partially displayed on the Product Listings page.

# Release 1.2.6

**Released:** April 1, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.2.5

**Released:** March 31, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Resizing the Project Overview Data Window

**Bug 26176**: When you resized the Project Overview Data window, the window became blank and you were no longer able to view its contents.

# Release 1.2.4

**Released:** March 28, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Industry Analytics Availability

By default, the Industry Analytics feature is no longer automatically available to new BPM accounts. Affected customer accounts can neither click the **Industry Analytics** option on the navigation menu nor access the Industry Analytics page. This change does not affect existing BPM accounts.

For more information, contact your Deltek onboarder.

# Release 1.2.3

**Released:** March 25, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.2.2

**Released:** March 18, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.2.1

**Released:** March 16, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Searching for Added Accounts

**Bug 27089**: From the list of your added BPM accounts through the change account icon ( ), you were unable use the letter ‘S’ to search for your added BPMs. When you entered a search term that begins with the letter ‘S’ in the **Search Companies** field, the search did not proceed.

# Release 1.2

**Released:** March 11, 2022

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Specpoint Data in the Project Research Map

The Project Research Map now displays performance requirements, product selections, product characteristics, and installation requirements for projects across the Specpoint community. You can now use this data to research and learn more effectively than ever before.

# Release 1.1.18

**Released:** March 4, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Public Product Listings Page

This portion includes resolved software issues for the publicly accessible Product Listings page.

#### Last Publish Date

**Bug 26438**: On the Product Listing page, the LAST PUBLISH DATE label did not display the correct date when the respective BPM last published the product listing.

#### Categories of Manufacturer Listings

**Bug 25783**: On the Company Page, the Listing Categories tile included product categories of manufacturer listings offered by the respective company even though manufacturer listings are not available on the public Product Listings page.

# Release 1.1.17

**Released:** March 1, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.16

**Released:** February 25, 2022

## New Features

This section includes summaries of the new features in this release.

### Text Styles for Company and Product Descriptions

The following fields now support text styles:

- **Who We Are** field on the My Company page
- **Product Description** field on the Manage Listing page

With the necessary user permissions, you can now apply the following styles to text within the aforementioned fields in edit mode:

- Bold
- Italic
- Numbering or Ordered List
- Bullets or Unordered List
- Decrease Indent or Promote
- Increase Indent or Demote

# Release 1.1.15

**Released:** February 18, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.14

**Released:** February 11, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Manufacturer Specified Filter

**Bug 26343**: When you set the **Manufacturer Specified** filter to **No** and selected a manufacturer in the **Manufacturer** filter, the Project Research Map included incorrect search results. The search results included projects that have the selected manufacturer specified (**Manufacturer Specified** is set to **Yes**).

# Release 1.1.13

**Released:** February 4, 2022

## New Features

This section includes summaries of the new features in this release.

### Reseller Firms

Companies that resell products, such as wholesalers, retailers, and distributors, can now join Specpoint as reseller firms. In addition, Deltek will assign resellers to new and existing BPM firm accounts as part of provisioning.

A reseller firm can access all their assigned BPM firms in Specpoint to view an assigned non-reseller BPM firm's data on the product listings that they distribute. Users in a reseller firm are hidden guest users in their assigned BPM firms. They have similar access, which includes the access conditions, to a typical guest user but are not included in the user list of the associated BPM firm.

For more information, contact your Deltek onboarder or Deltek sales representative.

# Release 1.1.12

**Released:** January 28, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.11

**Released:** January 21, 2022

This release includes general maintenance and performance adjustments throughout the platform.

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Default Sorting and Grouping

**Bug 25784**: The default sorting and grouping configurations did not apply on the public Product Listings page when you sorted by Category and Company. You encountered this issue when you navigated from a Company Page (click **Product Listings**) of a given company/BPM to the Product Listings page.

### Short Form Document on the Manage Listing Page

**Bug 26199**: On the Manage Listing page, under DOWNLOAD DOCUMENTS and SHORT FORM DOCUMENT, the user interface displayed a zero (0).

# Release 1.1.8

**Released:** January 10, 2022

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Project Research Map Legend

**Bug 17158**: When you toggled the visibility of the Project Research Maps's legend on or off, Specpoint retained the legend's visibility state (on or off) for the next user login on the same browser and computer regardless of user account. The legend's visibility state should only save by user account.

### Product Specification Document Download

**Bug 26599**: On the public Specpoint page, users were unable to download the product specification document of a premium product listing. This issue applied to the following methods:

- On the Product Listings page, on a product listing card, click .
- On the product listing page for a product listing, under DOWNLOAD DOCUMENTS, click **Download**.

# Release 1.1.7

**Released:** January 4, 2022

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.6

**Released:** December 21, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Public Product Detail Page

**Bug 26440**: When you clicked a product listing card on the public Product Listings page, the Product Details page did not display.

As workaround, you needed to right-click the product listing card and select **Open link in new tab** (or the equivalent option for your browser).

# Release 1.1.5

**Released:** December 17, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Company Page Tiles

This portion includes resolved software issues for the tiles on the Company Page and the My Company page.

#### Layout of the Listing Categories Tile

**Bug 26146**: When you zoomed out on the Company page, the Listing Categories tile displayed the available categories in an incorrect layout and position.

#### Company Filtering for the Product Listing Page

**Bug 26341**: When you navigated to the Product Listings page by clicking the listing count on a tile on a Company page for a product or the My Company page, the Product Listings page did not correctly filter the product listings by company. The Product Listings page should filter the product listings by the respective company or BPM.

### Default Sorting

**Bug 26137**: The third default sorting criteria, which is **Company**, was unavailable in the Grouping and Sorting window when you opened the Product Listings page from the Recently Listed widget.

# Release 1.1.4

**Released:** December 10, 2021

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.3

**Released:** December 3, 2021

### Project Research Map

This portion includes resolved software issues for the Project Research Map.

#### Project Filters

**Bug 25581**: You encountered issues with using the following project filters on the Project Research map:

- **Family**
- **Manufacturer Specified**
- **Manufacturer**

When you set these filter fields, these project filters did not apply to the project data on the Project Research Map. In addition, some values from the filter fields were not available, such as **085313 - Vinyl Windows** in the **Family** field.

#### Project Overview Data Window UI

**Bug 19002**: When you resized the Project Overview Data window, a number of user interface elements overlapped with each other, such as the label and the border of the following fields:

- **Listed Manufacturer**
- **Manufacturer Specified**

### Product Listings Page

This portion includes resolved software issues for the Product Listings page.

#### Manufacturer Listing

**Bug 25820**: When you used the **Product Type** filter on the Product Listings page, Specpoint included Manufacturer listings that were previously of type Premium MasterSpec, Premium, or Premium Proprietary and had assigned product type properties in the search results.

## Grouping by Company

**Bug 25395**: When you grouped product listings by **Company** (through the Grouping and Sorting window), the Product Listings page grouped the listings by the companies' account names instead of the companies' display names.

# Release 1.1.2

**Released:** November 19, 2021

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.1.1

**Released**: November 12, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Show More Button

**Bug 25952**: The Product Listings page showed a No Results message after you scrolled down and clicked the **Show More** button multiple times. In addition, the **Show More (x of y)** button displayed an incorrect count of product listings and did not disable when the page loaded more listings.

# Release 1.0.11

**Released**: November 3, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### UI Responsiveness of the Public Specpoint Site

**Bug 25745**: In the public Specpoint site, the Product Listings page (which is equivalent to the Manage Listing page for BPM) had distorted images and text when you zoomed in to 150% text size while using 1920 × 1080 resolution.

### Sorting of Recently Listed Product Listings

**Bug 25541**: When you opened the Product Listings page from the Recently Listed widget (by clicking **View All**) on the dashboard, this page displayed incorrectly sorted listings based on the default sorting criteria.

# Release 1.0.10

**Released:** October 29, 2021

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Product Description Length

Product listings now have a maximum character limit of 10,000 (from 4,000).

On the Manage Listing page, the expanded description field accommodates the 10,000-character descriptions of product listings. In edit mode, the text area for the description accommodates the new character limit.

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Display the Product Description

**Bug 25810**: On the Manage Listing page, you encountered the following issues with lengthy product descriptions:

- The text area remained the same size and did not show the complete description.
- The text area expanded but not to the sufficient size to show the complete description.

# Release 1.0.9

**Released:** October 26, 2021

This release includes general maintenance and performance adjustments throughout the platform.

# Release 1.0.8

**Released:** October 22, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Description Length for Imported Products

**Bug 25711**: A number of product listings had descriptions that exceeded 10,000 characters. The descriptions of these product listings were trimmed to 10,000 characters.

The affected product listings were mostly imported listings from other Deltek Specification Solutions platform such as SpecAgent.

### Auto-Generated Documents for Product Listings

**Bug 25583**: The date in the Product Specification Document header did not align with the date of the original MasterSpec document, on which the download document is based.

In addition, the automatically generated Product Specification Documents included the following sustainability information under *PART 1 – GENERAL* and *1.2 ACTION SUBMITTALS*: paragraph "*B. Sustainable Design Submittals:"*

# Release 1.0.7

**Released:** October 18, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Show More Product Listings

**Bug 25399**: The Product Listings page reset to 200 records when you scrolled down and reached 2,000+ records. In addition, the **Show More (x of y)** button incorrectly reset to *(200 of y)* when it reached at least *(2,000 of y)*.

# Release 1.0.6

**Released:** October 14, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Viewing the Product Listings Page

**Bug 25394**: When you navigated to the Product Listings page, you were unable to immediately use the Page Up, Page Down, Up, and Down keys to scroll and view the available product listings. Navigating by pressing these keys required that you first click the product listing area or the scroll bar on the page.

# Release 1.0.5

**Released:** October 11, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Product Listings with Names that Include an Ampersand (&)

**Bug 25697**: The publicly available version of the Product Listings page did not include product listings that are under companies that have an ampersand (&) in their names. On the same page, you were unable to use the **Company** filter to search for product listings under companies that have an “&” in their names.

### Save Button in the File/Image Upload Utility

**Bug 25430**: The buttons in the file/image upload utility became unavailable when you performed an action while an upload process was ongoing. This issue was limited to uploading a photo for your BPM’s product listing on the Manage Listing page.

# Release 1.0.4

**Released:** October 8, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Order of Product Cards Changes after Saving

**Bug 25624**: The Product Listings page did not maintain the order of product listing cards when you modified and saved information about a product that should not affect the order, such as the product description, images, and links.

# Release 1.0.3

**Released:** October 5, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Recently Listed Product Listings

**Bug 25337**: The Product Listings page did not display any product listing cards when you opened it from the Recently Listed widget (by clicking **View All**) on the dashboard. The Product Listings page now correctly displays product listing cards with the following filters by default:

- **Listing Type**: Premium MasterSpec, Premium, and Premium Proprietary
- **Status**: Active

### Same Product Names

**Bug 25503**: When you updated your BPM's product listing, you were unable to use the same product name for products with the same family but different product types. Specpoint also did not allow the use of the same product name for products from different manufacturers/companies.

# Release 1.0.2

**Released:** October 1, 2021

## Software Issues Resolved

This section includes summaries of the resolved software issues in this release.

### Sorting Product Listings by Family, Product Type, and Status

**Bugs 25409** and **25392**: You encountered the following issues when you configured the following filter and sorting criterion combinations:

| Sorting Criterion | Filter | Issue |
|---|---|---|
| ▪ **Family**: Ascending | ▪ **More Filters » Status**: Active and Inactive | Missing family |
| ▪ **Family**: Ascending or Descending | ▪ **More Filters » Status**: Active and Inactive<br>▪ **Listing Type**: Premium | Incorrect sorting |
| ▪ **Family**: Ascending or Descending<br>▪ **Product Type**: Ascending or Descending | ▪ **More Filters » Status**: Active and Inactive | Incorrect sorting |
| ▪ **Status**: Descending | ▪ Any | Incorrect sorting |

### Visibility of Inactive Listings

**Bug 25540**: The Product Listings page displayed inactive product listings from other BPMs.

## Specpoint Customer Assistance Program

To access Specpoint FAQ and training videos, register for the Specpoint Customer Assistance Program.

## Deltek Support Center

The Deltek Support Center is a support website for Deltek customers who purchase an Ongoing Support Plan (OSP).

The following are some of the many options that the Deltek Support Center provides:

- Search for product documentation, such as release notes, install guides, technical information, online help topics, and white papers
- Ask questions, exchange ideas, and share knowledge with other Deltek customers through the Deltek Support Center Community
- Access Cloud-specific documents and forums
- Download the latest versions of your Deltek products
- Search Deltek's knowledge base
- Submit a support case and check on its progress
- Transfer requested files to a Deltek Customer Success analyst
- Subscribe to Deltek communications about your products and services
- Receive alerts of new Deltek releases and hot fixes
- Initiate a Chat to submit a question to a Deltek Customer Success analyst online

**Attention:** For more information regarding Deltek Support Center, refer to the online help available from the website.

### Access Deltek Support Center

**To access the Deltek Support Center:**

1. Go to https://deltek.custhelp.com.
2. Enter your Deltek Support Center **Username** and **Password**.
3. Click **Login**.

**Note:** If you forget your username or password, you can click the **Need Help?** button on the login screen for help.

# Available Documentation for this Release

The following table lists the Deltek documentation available for this release. Except where noted, all the user guides and quick reference guides listed in this table are available for download from the Deltek Support Center.

| Document Name | Description |
|---|---|
| Deltek Specpoint 1.0 Release Notes for BPM Users | These release notes contain a summary of the key features for the first release of Specpoint. |
| Deltek Specpoint Help for BPM Users | This guide contains descriptions of and procedural information about features included in Specpoint.<br>You can access this guide from Specpoint's help menu. |
| Deltek Specpoint SaaS Administrator Guide | This guide contains descriptions of and procedural information about features that are available for administrators who are responsible for the initial activation and ongoing management of Specpoint. |
