PEOPLE/BENEFITS/HBPFTE/Analyze Full-Time Equivalent Eligibility

Deltek Defect Tracking Number:

738767

Issues Resolved:

Description: The rounding of number of months in measurement period may cause unexpected results with the average hours per month. This is an issue because the average hours per month are used to determine Full-Time Equivalent (FTE) employees.

Customers Impacted: This defect affects Costpoint Benefits users.

Workaround Before Fix: Manually calculate the employee hours and then enter the values for employee records with incorrect calculation and which are missing in Affordable Care Act (ACA) reporting.

Additional Notes: None.

PEOPLE/BENEFITS/HBMBENYR/Manage Benefit Years

Deltek Defect Tracking Number:

745162

Issues Resolved:

Description: The screen should include controls that allow you to specify months/days for measurement, administrative, enrollment, and coverage periods. This will ensure using the appropriate measurement period months when determining **Average Hours Per Month** on the Analyze Full-Time Equivalent Eligibility screen.

Customers Impacted: This defect affects Costpoint Benefit users.

Workaround Before Fix: None.

Additional Notes: You must review the Ongoing Measurement Period Months since the application rounds this value to the nearest whole number. Verify that the result is as expected.
